Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Department of Revenue and Agriculture (Revenue), No. 78, dated 28th March 1911.

READ—

The annual report on the land revenue administration of the Punjab for the year ending 30th September 1910, forwarded with letter No. 168, dated 27th February 1911, from the Senior Secretary to the Financial Commissioners, Punjab.

REMARKS.—The year 1909-10 was one of the most prosperous of recent times. The monsoon broke early, and rain was well and evenly distributed until the middle of September. The later rainfall was deficient in the Rawalpindi division, but elsewhere it minimised the effects of the comparatively dry winter which followed. Both harvests were accordingly good, the kharif being estimated at 21 per cent. above the quinquennial average, while the area sown in the rabi was 19 per cent. above the normal. The matured percentage of the rabi crop was 89, and the outturn was 14 per cent. above the normal. All the staple crops, except jowar and maize, did well. Wheat showed a yield 19 per cent. above normal and the yield of gram is returned at the surprising figure of 99 per cent. above normal. The total matured area of the Province was $25\frac{3}{4}$ million acres, which is 16 per cent. above the average of the past five years.

Prices fell slowly, but were between 21 and 30 per cent. above what were the normal figures before 1906. It is interesting to notice that so many of the land-owning class held up their wheat stocks for the high prices which followed on the failure of the crop in North America.

2. The current land revenue demand was accordingly collected almost in its entirety. Drought in the sandy tracts of Jhelum and Shahpur and floods in Sialkot necessitated some suspensions, amounting in all to Rs. 73,000. The collections of outstanding arrears were satisfactory. At the close of the previous year the arrears stood at Rs. $38\frac{1}{2}$ lakhs. Of this Rs. 23 lakhs were collected during the past year, Rs. $7\frac{3}{4}$ lakhs were remitted, and Rs. $7\frac{3}{4}$ lakhs remain suspended. The heavy arrears in the Delhi division have been nearly wiped out. The Lieutenant-Governor notes with satisfaction that these large collections have been made with the greatest ease and with increased punctuality, and His Honour is pleased to endorse the commendation which the Financial Commissioners bestow on district officers in this behalf.

3. The amendment of the statement of coercive processes (No. XV) which was promised in last year's report has been carried out, and the further improvement now suggested will distinguish between processes issued and those actually executed. The fact that resort to compulsion is so rare is further evidence of the lightness of our assessments, if indeed such evidence were needed in view of the statistics of incidence, which show that the land revenue falls on the cultivated area of the Province at the rate of Re. 1-1-8 per acre, and on the population at the rate of Re. 1-8-4 per head.

4. The fluctuating land revenue demand increased by a lakh of rupees and stood at Rs. 54 lakhs, of which only Rs. 15,000 remained uncollected. In deference to the wishes of the revenue-payers, fluctuating assessments have been replaced by fixed assessments in Karnal and Rohtak. The Lieutenant-Governor attaches great importance to the elasticity of our revenue system and notes with pleasure the readiness of the revenue authorities to meet the reasonable wishes of the people, both as to the form of the assessment and the method of realisation. The increasing popularity of remittance by money order, and the suggestion that local banks should pay in the land revenue on behalf of the lambardar, are signs of the times and evidence of material and mental progress.

5. The increase of nearly one lakh in revenue assignments is due mainly to revisions of assessment. The consolidation of *jagirs* by the acceptance of the rule of integral descent proceeds slowly, and many large assignees do not seem yet to have realised the advantages the rule secures.

The demand for miscellaneous revenue presents few features of interest, but steps should now be taken to recover the Jalpana arrears.

Advances under the Loans Acts were naturally small in a year of prosperity, while the recovery of large arrears was satisfactorily effected. The Lieutenant-Governor agrees that as co-operative credit advances Government aid should be withdrawn.

6. Three survey parties were at work in the Punjab during the year and good progress appears to have been made. It is especially important, now that fixed boundaries have been laid along the Punjab rivers, to have reliable data from which to relay any boundary that may temporarily disappear. These data can best be supplied by the Survey Department, but it is desirable that some estimate should be framed of the time that will be taken in carrying out this riverain survey and of the expense of the process. His Honour is glad to learn that the supply of accurate district maps, which has long been a serious want, is now engaging the attention of the Survey Department.

In district boundaries the principal alteration during the year was the transfer of the Sharakpur tahsil from Lahore to Gujranwala. The Lahore district is still left with an area of 2817 square miles and a population of 1,034,696 persons which includes 228,318 persons in the Lahore city, civil station and cantonment. Even with a fully organised outpost at Kasur it may be difficult for the Deputy Commissioner of the head-quarters station of the Province to control efficiently so large an area and population.

7. In a Province so prone to litigation, the continued state of peace between landlord and tenant is gratifying. The total number of revenue cases has fallen off from 186,000 to 176,000—the lowest figure since 1904-05. This no doubt has enabled the pending files of appellate courts to be reduced to reasonable proportions, and His Honour is glad to notice that the congestion which was apparent in Rawalpindi has been removed. The appointment of a second Financial Commissioner should enable the highest revenue court of the Province to keep pace with its appellate work. The revenue work of district officers has been greatly simplified by the abolition of the old Land Revenue and Tenancy Act rules and the Revenue Circulars. With the new Standing Orders and the three volumes of Land Acts and Manuals, the revenue officer has now an adequate digest of authority. Fair progress is reported in the provision of better accommodation for the storage of records, and the work of destruction of obsolete records is up to date in all but a few districts. It is hoped that the issue of new rules for the copying department and the copying agency will not be further postponed.

8. Although the irrigated area decreased owing to the abundant rain, the major canals—with the exception of one division of the Lower Jhelum Canal—have worked well during the year, and the great Triple Project is showing good progress towards completion. The condition of the minor canals can hardly be called satisfactory. There was a decrease in irrigation, and consequently in income, from the Gurgaon bunds, the Grey Canals in Ferozepore, and the Shahnahr in Hoshiarpur. On the other hand, action has been, or is being, taken to improve their working, and better results may be anticipated. The construction by the Deputy Commissioner of Montgomery of two new inundation canals to replace the Kitchin bund is, as the Commissioner says, a notable achievement, and His Honour's acknowledgments

are due to Mr. Irving. The allotment of sums of money to Deputy Commissioners for expenditure on protective or productive embankments is a move in the right direction, and promises good results. The experiment to be undertaken on the Maili Cho will be watched with interest, and may be fraught with important consequences, as the question of the amendment of the law and of further experiments in reclamation must depend largely on the experience gained with this torrent.

Experiments and investigations on the subject of well boring have shown that the artesian principle is understood in the sub-montane tracts, though it is doubtful if there is great scope for Government enterprise in this direction.

9. Fresh light has been thrown on the important subject of land ownership and land-transfers by the preparation of the new statement No. III. The figures show that 62 per cent. of the mortgagees of land in the Province holding 53 per cent of the area mortgaged are themselves members of agricultural tribes, while in the heavily mortgaged district of Gurdaspur three-fourths of the mortgages are held by agricultural tribes. As the Financial Commissioner remarks, a large mortgaged area does not necessarily indicate a lack of prosperity, nor does the omission to redeem a mortgage invariably connote inability to do so. During the year under report the total area redeemed from mortgage was 415,000 acres and the area mortgaged was 310,000 acres. For these areas the money paid was 2 crores and 2½ crores respectively. Better testimony of the increased value of land could hardly be desired. In this behalf however the revised figures of the last nine years deserve to be quoted, and the average sale price of an acre of cultivated land from 1901-02 to 1909-10 is given in the margin.

	Rs.
1901-02	71
1902-03	71
1903-04	85
1904-05	86
1905-06	85
1906-07	103
1907-08	101
1908-09	114
1909-10	121

10. Under the Land Alienation Act slight alterations have been made to the schedule, so as to include the Tagas in Gurgaon, and to notify as separate groups various Brahman communities. The Financial Commissioners think it may be necessary to split up existing district groups into smaller groups, in order to protect the weaker members against land-grabbing at the hands of their agricultural brethren. The Lieutenant-Governor would assent to such a proposal with great reluctance, and trusts that the necessity may not arise. It is only natural that as the Act becomes better known, endeavours to evade it should become more common and more ingenious. It is clear, however, that Deputy Commissioners are on the look out for instances of evasion, and the Lieutenant-Governor is confident that so long as the working of the Act receives the attention which the present Financial Commissioners have bestowed on it, the benefits of its main provisions will be secured to those for whose protection it was framed. A more serious feature in the situation however is the fact that the net excess area alienated by agricultural tribes is returned as 15,066 acres. This disquieting result is brought out by the revised form of the statement (No. V), which now shows not only the persons redeeming land but also the persons from whom it has been redeemed. The figures have not been explained by the Financial Commissioners, but the Lieutenant-Governor would be glad if they could offer some explanation. No doubt the figures for mortgages and redemptions are not mutually exclusive, but if it is the case that the agricultural tribes are losing land even to the extent of 15,000 acres yearly, the position would appear to call for investigation.

11. This is perhaps the last revenue report in the compilation of which the Hon'ble Mr. Douie will take a part. The Lieutenant-Governor therefore seizes this opportunity to express to him the acknowledgments of the Punjab Government for the numerous improvements which during his long service as a

revenue officer and latterly as Settlement and Financial Commissioner he has effected in our revenue system. Not the least of these has been the compilation of the Settlement Manual, the Land Administration Manual and the revision of the Financial Commissioners' Circulars in the form of Standing Orders, a work which has greatly simplified the task of all those who have to make themselves acquainted with our necessarily intricate revenue administration.

ORDER.—Ordered that the above remarks be printed and circulated with the report; that they be published in the *Punjab Gazette*; communicated to the Financial Commissioners, Punjab, and forwarded to the Government of India, Department of Revenue and Agriculture, with the usual number of spare copies.

Ordered also that a copy of the report and of the above review be forwarded to the Surveyor-General of India with reference to paragraph 6.

By order of His Honour the Lieutenant-Governor,

H. P. TOLLINTON,

Revenue Secretary to Government, Punjab.

Punjab Government Press, Lahore—29-3-11—3035—400—K. C. M.

No. 168.

FINANCIAL COMMISSIONERS' OFFICE,
LAHORE, *dated 27th February*, 1911.

FROM

E. R. ABBOTT, ESQUIRE,
Senior Secretary to the Financial Commissioners, Punjab,

To

THE HON'BLE MR. M. W. FENTON, C.S.I.,
Chief Secretary to Government, Punjab.

The Hon'ble Mr. J. M. Douie, C. S. I.

SIR,

I AM directed to submit the Annual Report on the Land Revenue Administration of the Punjab for the agricultural year ending the 30th September 1910.

2. The office of the Financial Commissioner, Punjab, was held by the Hon'ble Mr. J. M. Douie, C.S.I., from 1st October 1909 to 4th August 1910 and by the Hon'ble Mr. A. Meredith from 5th August to the end of the year.

I have, etc.,

E. R. ABBOTT,
Senior Secretary to the Financial Commissioners, Punjab.

REPORT

ON THE

LAND REVENUE ADMINISTRATION

OF THE

PUNJAB

FOR THE

AGRICULTURAL YEAR, 1ST OCTOBER 1909 TO 30TH SEPTEMBER 1910.

Introductory.

1. The proposal to reconstitute the second appointment of Financial Commissioner, which was abolished in 1897, and to abolish the appointments of the Settlement Commissioner, then created, and of the Excise Commissioner, received the sanction of the Secretary of State in August last. The new arrangements, however, did not actually come into force until after the close of the year under report.

General summary of agricultural conditions. Kharif, 1909.

2. (*a*) A week of very wet weather in the latter part of April greatly assisted cotton sowings in the Delhi division and to a lesser degree sugar-cane and cotton sowings in the Central Punjab. The monsoon was an early one, general rainfall being reported by the 3rd week of June: well distributed rain was obtained until the middle of September, this being a normal date for the cessation of the monsoon fall. Throughout the province with a few local exceptions the monsoon was one of the best of recent years. The later rainfall was very deficient in Attock and Mianwali and parts of the Shahpur and Jhelam districts. The sown area was 11,947,321 acres, about 3 per cent. below normal and 16 per cent. of the crops sown failed. Taking area and yield together the crop is estimated as 21 per cent. above the quinquennial average which however is below what may be considered normal.

Rabi, 1910.

(*b*) The winter rainfall was considerably in defect throughout most of the province but the later monsoon fall made less rain necessary and, except in the tracts which were deprived of the later monsoon, the conditions were very favourable. The sown area amounted to 17,700,739 acres which is estimated to be 19 per cent. above normal. The percentage returned as matured was 89. The yields were in general excellent and the crop was a bumper one, 14 per cent. above normal.

General results of both harvests.

(*c*) The total matured area of the year was 25,724,729 acres, which is 16 per cent. above the average of the last five years. Outturns were distinctly satisfactory, except in the case of *jowar* and maize which suffered from the abundant rainfall. The all important wheat crop is returned with a yield 19 per cent. above normal, *toria* did excellently, and the yield of gram for the province is given as 99 per cent. above normal.

Irrigation.

(*d*) The favourable character of the rainfall in both harvests occasioned some fall in the irrigated area, which amounted to 34 per cent. of the total area sown.

Prices.

(*e*) The prices of food grains have gradually fallen but sold at harvest time at rates between 21 and 30 per cent. above the average of a normal year preceding 1906-07. A feature of this year's prices was that agriculturists were able to hold up the bulk of the wheat surplus of 1910 for

higher rates, which followed upon the failure of the North American crop, and large profits were made. The failure of American and Egyptian cotton occasioned an unprecedented rise in the price of cotton, while *gur* declined very slightly in price.

General statement of owned and mortgaged land. Statement III.

3. Statement No. III was sanctioned by Government upon the abolition of the report on the Land Alienation Act. It provides information not otherwise available, which is derived from Statement 6 of the Agricultural Statistics. It will be seen that the total area shown is some four million acres less than that in Statement I. This is due apparently to the exclusion in Kangra, Gujrat, Attock, and Montgomery of large areas of Government forest and waste areas, and in Lahore and Lyallpur of areas held by Government tenants in colony areas. Owing to the omission to ask for orders on the subject the practice in both respects has not been uniform and the necessary orders will now issue. The variations in Mianwali and Muzaffargarh are due to the transfer of the Leiah tahsil from the former to the latter district. All districts have not shown separately the area of *shamilat*, village *abadi* and Government property.

The statement shows that, leaving out of account village *shamilat*, approximately three and a half million proprietors distributed over three million holdings own an average of 12 acres each of which $7\frac{1}{4}$ are cultivated and on which the revenue assessment is Rs. 7-10-0. Approximately one-seventh of the revenue is paid by persons who do not belong to scheduled agricultural tribes. $12\frac{1}{2}$ per cent. of the total cultivated area of the province as shown in this statement (or approximately $3\frac{1}{2}$ million acres) are held on usufructuary mortgage, under more than a million mortgages; each mortgage includes an average of 4 acres of land, including 3 acres cultivated assessed at Rs. 3-6-0. Sixty-two per cent. of the mortgagees paying 53 per cent. of the revenue of the mortgaged land are members of scheduled tribes. The only districts in which more than 20 per cent. of the cultivated area is mortgaged are Sialkot and Gurdaspur. A large mortgaged area does not necessarily indicate lack of prosperity, and in Gurdaspur three-fourths of the mortgages are held by members of scheduled agricultural tribes. The above figures may be taken as fairly accurate though the provincial percentage is to some extent increased by the omission from the statement of the colony areas which are of course unmortgaged. The result shows a slight increase in the cultivated area mortgaged and in the percentage of that area to total cultivated over the figure shown against "ownership" in columns 22 and 23 of Statement III of last year, with which alone comparison can now be made. This is probably due to greater accuracy in the preparation of the figures.

Transfers. Statement IV.

4. *Gifts and Exchanges.*—The number of gifts and exchanges has again increased, though the area exchanged is less than in the previous year. In Lahore the transfers by several mahants at Nankana Sahib of land standing in their own names to that of the shrines in their charge have been treated as gifts. In Montgomery owners have been making alienations in favour of their sons in order to multiply holdings in the hope of getting land on the Lower Bari Doab Canal. A similar process has been noticed elsewhere. The exchanges are to a large extent transactions with a view to consolidate holdings, but the exchanges of right of occupancy are mainly Colony "tabadalas" or "killabandi" transfers.

Mortgages.—The orders referred to last year, under which the practice of recording mutations of fictitious redemption and remortgage in certain cases was discontinued, have not reduced the total number of transactions, as was anticipated, and there is a slight total increase under both heads, though the district variations are considerable. Many Deputy Commissioners point out that in consequence of the rise in the value of land many mortgages are being redeemed with the object of remortgaging a smaller area for the amount of the debt. The extent to which this is possible is obvious from the fact that the total area hypothecated was mortgaged at Rs. 81 per acre whereas the debt on the land redeemed was Rs. 48-1-0 per acre only. Moreover, as pointed out by the Deputy Commissioner, Jhang, many of the new mortgages are for periods of less than 20 years.

Sales.—It has been necessary to exclude from the sale statement an additional area of 60,704 acres part of land sold in Muzaffargarh in 1895 but only recently brought on to the record in circumstances explained last year. With this alteration the statement shows that almost exactly the same area was sold as in the previous year for a price greater by over Rs. 12 lakhs and amounting to Rs. 116 per acre cultivated.

An obvious deduction, as to the lightness of the land revenue demand in the province as a whole can be drawn from the multiple of the land revenue at which land sells in the Punjab. For ownership only the districts shewing the highest results (exclusive of Simla and Lyallpur) are—

Ferozepore	262 times.
Lahore	207 „
Jullundur	190 „
Mianwali	184 „

those shewing the lowest results are—

Rohtak	61 times.
Gurgaon	61 „
Gurdaspur	69 „
Gujranwala	69 „

Of course all data of this sort are affected by the high prices obtained for land near towns: but the effect of such sales on figures deduced from the sale price of over $2\frac{1}{4}$ lakhs of acres cannot be very great. Subject to the above, data of this kind furnish a good test of the comparative pitch of the assessments in different tracts and next year a column will be added to Statement IV to shew at a glance what the multiple is in each district.

Abstract of transfers. Statements V and VI.

5. Owing to an alteration in Revenue register No. 5 it has been necessary to recalculate columns 1-9 of Statement V and 1-6 of Statement VI and to show figures for "ownership" rights transferred only, exclusive of transactions in talukdari and occupancy rights. The change however is in itself desirable. The tendencies disclosed by the new figures do not differ from those previously observed.

On the figures of the present year the owner of a cultivated acre of proprietary land can now obtain Rs. 121 an acre for his right or Rs. 132 for every rupee of land revenue that he pays upon it.

The mortgage abstract discloses that for the last 6 years there has been a sustained excess of the cultivated area redeemed over that mortgaged. It is anomalous that the cultivated area under mortgage should show an increase when redemptions continue to exceed mortgages. The Financial Commissioner can only suppose that the present figures for cultivation are more accurate as regards area than those previously reported.

Fixed land revenue. Statements IX, X and XI. Demand.

6. (*a*) The fixed land revenue roll of the province is now Rs. 2,08,66,993: an increase of Rs. 3,20,070 over the previous year's figure. Re-assessments in the Delhi division account for a net increase of $3\frac{1}{2}$ lakhs and progressive assessments for a further Rs. 12,000. The heavy diluvion of the previous year, however, occasioned a reduction of some Rs. 35,000 and further substitutions of fluctuating for fixed assessments in Gujranwala reduced the roll of that district by over Rs. 10,000. Small sums shown as transferred from Montgomery and Jhang are not shown as increases in Lyallpur and Shahpur for the reason that on transfer the estates in question were placed under fluctuating assessment.

Collection of current demand.

(*b*) Ninety-nine per cent. of the current demand has been recovered. The uncollected balance is shown as Rs. 1,90,422 but of this some Rs. 1,06,000 is irrecoverable or "undetermined" and will be remitted. This irrecoverable balance is made up of amounts remitted on account of floods and diluvion, and also includes some Rs. 25,000 in Shahpur on account of fixed assessments which have been superseded by fluctuation in the Bhera Chenab Assessment Circle. The "undetermined" balance is chiefly occasioned by reductions of the demand on re-assessment in the case of individual villages in Karnal where the new assessments, though imposed during the year, have not yet been adjusted on the fixed land revenue roll.

The recoverable balance of the current demand amounts to Rs. 84,000 of which Rs. 73,000 are under suspension. Floods necessitated suspensions in several districts, notably Sialkot, but the bulk of the suspensions given were on account of drought in the Mohar and Thal tracts in Shahpur and Jhelam which have been suffering for some seasons from unfavourable conditions.

Collection of arrears.

(*c*). The recoverable balance outstanding at the close of the previous year was Rs. 38½ lakhs, practically the whole of which was under suspension. Of this Rs. 23 lakhs have been collected, Rs. 7¾ lakhs are still under suspension and about Rs. 7¾ lakhs have been remitted. The collection of suspended arrears in all the plains districts of the Delhi division has been particularly heavy, aggregating Rs. 18 lakhs. In the Gurgaon district alone the recoveries amounted to Rs. 7,38,000 or 59 per cent. of the annual demand. Comparatively speaking, the recovery of Rs. 1,48,000 in Gurdaspur and of Rs. 1,31,000 in Sialkot is equally satisfactory. The care with which these arrears have been collected reflects great credit on district officers generally.

The remissions have been given principally in the districts of Gurgaon, Rohtak, Karnal and Delhi, where the introduction of the new demand necessitated a review of the situation.

Summary of balances.

(*d*). The total collections of fixed land revenue on the roll aggregated Rs. 2,29,94,908 or 12 per cent. in excess of the current demand. The collections have been made, practically everywhere, with the greatest ease and with increased punctuality. The total outstandings have been reduced to Rs. 17½ lakhs and, what is more important, the recoverable balance, which two years ago stood at Rs. 56 lakhs, has now been reduced from Rs. 38½ lakhs reported last year to under Rs. 8¾ lakhs. The suspended arrears in the Delhi division now amount to Rs. 6¾ lakhs only and, except in the Delhi district, are not excessive, though attention is still required. On the other hand, the suspensions in Jhelam and to a lesser extent in Shahpur are now serious.

Alluvion and Diluvion. Statement XIII.

7. Dialluvion inquiries into the changes in fixed assessment occasioned by the action of the main rivers and torrents were held in 23 districts. In Statement No. XIII a distinction has been made this year between the changes due in each district to the rivers and to the torrents. As a result of the inquiries a sum of Rs. 29,847 was added to, and Rs. 50,129 deducted from, the demand. The nett *khalsa* amount which will be deducted from the fixed land revenue roll of the province next year is Rs. 18,920. Practically every district shows a loss, gains being returned only on the Jamna in Gurgaon, the Jhelam in Gujrat, and the torrents in Jalandhar, Shahpur and Dera Ghazi Khan.

New rules were introduced during the year in Gurgaon and are reported to have worked satisfactorily.

Fluctuating land revenue. Statement XII.

8. Excluding an item Rs. 1¾ lakhs in Karnal which represents the current year's demand from the increased fixed assessments imposed on resettlement but not yet brought on the roll, the demand for fluctuating land revenue temporarily off the roll is normal at about Rs. 50,000.

Small additional areas have been placed under permanent fluctuating assessments in Gurgaon, Delhi, Gujranwala, and Shahpur but on the other hand, in Karnal and Rohtak the previous fluctuating assessments have been abolished on resettlement because of the unpopularity of the system. On certain sections of the Chenab Canal the *malikana* rates have been enhanced under the conditions and the land revenue rates in the Sohag Para Colony have been slightly increased during the year, but elsewhere there has been no change. It is important to be able to compare the actual results of fluctuating assessments with the estimates framed by Settlement Officers and an addition has been made to the annual demand statements with this object. In Mianwali the rule that patwaris should in the first instance estimate the *kharaba* has now been altered, and in future the kanungo will make the estimate in this district, the patwari merely marking the field as one to be looked at for that purpose.

The current year's demand for permanent fluctuating land revenue is Rs. 54 lakhs, or Rs. one lakh in excess of the previous year's figures. The chief increases occur in Gurgaon, Mianwali and Lyallpur and have been explained above. Of this demand only Rs. 15,674 remained uncollected at the close of the year. The sum of Rs. 42,400 was outstanding at the close of the previous year. This has now been reduced to Rs. 7,334 by the collection of Rs. 28,499 and by the remission apparently of Rs. 6,567, the only considerable outstanding being now in Montgomery where, however, the previous balance has been greatly reduced. The total amount outstanding inclusive of previous year's arrears is Rs. 23,008.

Other land revenue. Statement XII.

9. The demand on account of other land revenue amounted to Rs. 19,36,221, of which Rs. 18,90,872 were collected. The greater part of the balance outstanding is due in Shahpur district where some difficulty appears to have been encountered in getting in nazrana demands. Rupees 9,60,000 were derived from the sale of Government estates in the Chenab and Sidhnai Colonies and of Crown lands in the Delhi and Muzaffargarh districts. The orders for the sale of the Muzaffargarh land were only recently given, but Rs. 17,000 have already been collected. Rupees 2,39,000 were obtained from nazrana and sale of waste land, almost entirely in the Jhelam and Chunian Colonies. Sale of town sites account for Rs. 1¾ lakhs, principally consisting of recoveries of balances due from Jaranwala in Lyallpur, the site of which was auctioned in the previous year. Tirni receipts (Rs. 1½ lakhs) are about normal, but the income from single harvest leases is lower than in the previous year, owing to shorter receipts in Multan and Montgomery. Under the head "Other items," the income was practically Rs. 2½ lakhs. This income will be greatly reduced if the imposition of rents on sites in villages in the Chenab Colony is discontinued, as is now proposed.

The balance outstanding of the previous year was Rs. 1,27,290. Of this Rs. 39,251 only have been recovered. Rupees 3,702 have been remitted and Rs. 84,337 are still outstanding. Of this balance Rs. 71,800 are due from the Jalpana estate, of which mention has been made in previous reports. Nothing apparently has been paid off during the year, but the estate has now cleared off the unsecured debts due to money-lenders, and should now begin to pay the nazrana due to Government. The total amount outstanding at the close of the year including both arrears and current demand amounted to Rs. 1,29,686.

Land Revenue Assignments. Statement XIV.

10. The total amount of assigned land revenue has increased by nearly a lakh of rupees over last year's figures and now stands at Rs. 29,41,357. Most of this increase is due to settlement operations, which in the Karnal District alone are responsible for an enhancement of Rs. 58,000 in the assignments. The Deputy Commissioner of Sialkot alludes to the numbers of petty *m'afis* with which the registers are burdened. As districts come under settlement the registers are being lightened by the operation of the procedure described in paragraph 570 of the Settlement Manual.

Coercive processes. Statement XV.

11. The improvements in Statement XV promised in paragraph 12 of last year's report have been carried out and the return now deals with land revenue arrears only. Processes of any description against lambardars were only resorted to in 3,837 cases for the collection of Rs. 7,86,370 of revenue, and of these practically half were "writs," a process which can hardly be said to be "coercive." On the application of lambardars 9,237 processes for the collection of Rs. 3,80,713 were issued. The great majority of the 2,897 writs for arrest probably fulfilled their object without the defaulting headman being actually detained at the tahsil. Serious cases of coercive processes may be considered to be those falling under the heads of imprisonment, 4 cases, sale of moveable property, 91 cases, transfers and farms, 4 cases, and attachment of immoveable property, 5 cases. In Rohtak and Gurgaon, from which 64 of the sales are returned, the figures seem to relate to orders for sale of moveables. It is explained by the Deputy Commissioner of Gurgaon, that, while there were 46 warrants for sale, in only 10 cases did sale finally take place. Arrangements will be made to obtain information in future as to the processes which are not only issued but also executed.

In Hissar the fewness of the processes is explained by a local order, now cancelled, that a reference should be made to the Deputy Commissioner before any process could be issued. In one of the Jhelam tahsils it was found to be the practice to include, in the amounts to be recovered for lambardars, interest on the outstanding amounts and writing fees, also malba. Steps were taken by the Financial Commissioner to make the prohibition of this practice generally known.

Process-serving establishment.

12. The actual income from process fees for the financial year 1909-10, was Rs. 14,534 and the actual expenditure Rs. 1,667. The fee was raised with the sanction of the Government of India from 12 annas to one rupee per service in all cases where the demand involved is more than Rs. 5: by Financial Commissioner's Notification No. 105, dated 9th May 1910. The increase took effect after the close of the financial year to which the above figures relate. Processes are now practically invariably served by the ordinary establishment, and Deputy Commissioners seldom find it necessary to supplement that establishment by temporary men.

Surveys.

13. The departmental topographical survey parties working in the Punjab were Nos. 12, 14, and 18. No. 12 Party was at work in the canal irrigated area of Jhang, Lyallpur and Shahpur; No. 14 in Rawalpindi, Jhelam, Gujrat and Shahpur; and No. 18, which has now been transferred to the United Provinces, in Attock, Mianwali and Shahpur. Except in the broken and intricate area of the Salt Range, where a 2″ survey was carried out, the survey was on the 1″ scale.

The cost of the riverain detachment of No. 18 Party is borne by the Punjab Government. Mr. Douie wishes to acknowledge the cordial co-operation of Mr. Maya Das Puri the officer in charge, in the work of surveying riverain villages. With the help of the marks set up by this party it will in future be a simple matter to relay a fixed riverain boundary between two estates or districts which has become obliterated. The cadastral survey of riverain villages is, moreover, now based on traverse points laid down by scientific agency. It seems desirable to obtain from the officer in charge an annual note on the work done, and the Financial Commissioner will take the necessary action to obtain one. The laying down of 25 acre rectangles in the area to be irrigated by the Lower Bari Doab Canal, where base rectangles were laid some years ago by the Survey Department, has been very recently begun.

An investigation into the standard district maps of the province was made during the year and a list published with Financial Commissioner's Circular Memo. No. 7, dated 8th September 1910. An unsatisfactory state of things was revealed as many districts have no suitable map, and in more than one case maps specially ordered for the use of district officers from the Survey Department have not been supplied to Deputy Commissioners and are not now obtainable. The attention of the department has been drawn to the matter.

Boundaries.

14. The principal changes in boundaries effected during the year have been the transfer of Sharakpur tahsil from the Lahore to the Gujranwala district and the re-arrangement of the Rohtak, Gohana, and Jhajjar tahsils of Rohtak in consequence of the abolition of the Sampla tahsil. A few additional villages have been transferred from Montgomery to Lyallpur bringing down the boundary of the latter district to the Deg stream.

The Deputy Commissioner of Mianwali reports that the boundary case between his district and Dera Ismail Khan has been settled but that the boundary with Kohat is still under dispute.

Mr. Douie met the Hon'ble Mr. Baillie in March and discussed the proposed fixed boundary on the Jamna between the Punjab and the United Provinces. A draft bill was prepared and forwarded to the United Provinces Government, but the Financial Commissioner has now been informed that the scheme has been rejected.

15. The accommodation required for new settlement records has been provided in Hissar, Delhi and Karnal. A new record room is under construction in Sialkot, and proposals for increased accommodation in Gurdaspur, Amritsar and Ludhiana are under consideration. The new record room at Gujranwala is reported to be too small to receive the records transferred from the Sharakpur tahsil.

Record Rooms.

The destruction of old records has been satisfactorily carried out. Arrears are reported large in Karnal, Ludhiana, Amritsar and Multan.

The new rules for the copying department and the copying agency have been delayed by a question affecting the financial aspect of the scheme. The working of the copying agency is generally satisfactory.

16. The Financial Commissioner has recently been asked to suggest an amendment of the Land Revenue Act, making it possible to draw up records-of-rights for towns which are not assessed to land revenue, and to report in what other respects the Act needs revision. In the recommendations made Mr. Douie has taken the opportunity to include certain changes rendered desirable by the appointment of the 2nd Financial Commissioner, and other amendments in partition procedure and in the provisions as to the management of lands held in common which seem to him to be required.

Amendment of the Land Revenue Act.

17. *Facilities for the payment of land revenue.*—The popularity of the money-order for the payment of small sums due to Government is well established. The Deputy Commissioner of Attock suggests that it should be made one of the patwari's *duties* to assist lambardars by filling in the money-order form. The report on the permission given in Lyallpur, Shahpur and Gujranwala districts to remit land revenue in whole currency notes, which was required by Punjab Government letter No. 27, dated 12th January 1910, was due after the year under notice and the subject has not been dealt with by the Deputy Commissioners of the districts in question in their annual reports.

Other matters.

The Deputy Commissioner, Lyallpur, reported emphatically during the year against the proposal referred to last year to allow the local banks to pay in land revenue for lambardars. Mr. Maynard, however, was in favour of giving a trial to a system under which the lambardar would send in by registered letter an *arz-irsal* and cheque on an approved bank for the sum due. Mr. Meredith ordered further enquiries to be made this cold weather and was prepared to make a recommendation to Government if any general desire was shewn for the facility suggested.

Dates of instalments. –In Multan, Jhang and Muzaffargarh one instalment only has now been fixed for kharif payments (January 5th). In Karnal single instalments have been ordered but the date for two assessment circles is different from that adopted for the others. The object is to mitigate the inconvenience caused to headmen and the tahsil staff when very large payments are made on a single date. In Amirtsar, with the same object, separate dates are fixed under local orders for each zail. In the Ballabgarh tahsil of the Delhi district the date of payment of the kharif instalment has been changed from the 15th December to the 15th January, and in the Delhi civil division the date of the kharif instalment of canal revenue has been changed from 15th to 30th January. In Mianwali two instalments—15th December and 15th January—have been fixed for the kharif instalment and one – the 15th July – for the rabi.

Publications.—The old Land Revenue and Tenancy Act rules and the Revenue Circulars were cancelled with effect from April 1st, 1910, from which date the new rules and Standing Orders came into effect. A translation of the Land Administration Manual is in the press and the translation of the Standing Orders is being taken in hand. On the suggestion of the Commissioner of Jalandhar forms of decree have been authorized for use in certain common classes of rent suits and the forms will shortly be issued. It is hoped that the forms will lead to greater preciseness in the terms of the decrees passed.

18. The total number of decided suits for the enhancement or reduction of cash rents of occupancy tenants shews practically no variation from that of the previous year. The only special features of the figures returned are the increase in litigation in Rohtak and Gurgaon due to the settlements recently completed and the smallness of the reduction in Hoshiarpur, where it was thought that most of the cases arising had been cleared off. More than one Deputy Commissioner deplores the want of provision in the Tenancy Act enabling the Settlement Officer to alter executively a lump sum rent originally fixed with reference to a revenue demand which has been altered on re-assessment. It appears, however, that the required adjustment, even in Rohtak and Attock where there has been most difficulty, is usually made by consent of the parties.

Enhancement and reduction of cash rents of occupancy tenants, Statement XVI.

19. (*a*) Decrees for ejectment were passed in eight cases only, of which seven were in Attock. The number of notices of ejectment served under section 44 (*i*) rose to 121, the increase being practically confined to districts about to come under resettlement. How unimportant this class of work is may be judged from the fact that ejectment of occupancy tenants was made in 14 cases only in the whole province.

Ejectments. Statement XVII. Occupancy tenants.

(*b*) Proceedings against tenants-at-will have been far more numerous than in the preceding year. This is ascribed in part to the continuance of favourable seasons and the increase in prices which enable landlords to deal more firmly with recalcitrant tenants. Settlement proceedings usually lead to activity among landlords against tenants-at-will, both in the direction of obtaining a judicial decision that the tenant has no occupancy right and, after the new revenues have been announced, of securing higher rents from the tenant by a threat of ejectment.

Tenants-at-will.

20. Declarations of a rule of integral descent were notified during the year in the case of four jagirs, two in the Ludhiana and two in the Gurdaspur district. In all cases the declarations were based on written instruments. The approximate value of the jagirs with which the notifications were concerned was Rs. 4,450 in Ludhiana, and Rs. 5,650 in Gurdaspur. Up to date 128 jagirs, valued at Rs. 7,80,000, have been gazetted under the Act. Further action is being taken by district officers, and several cases are under consideration.

Descent of Jagirs Act. (Punjab Act IV of 1900).

21. Owing to the favourable rainfall the general report is that supplies in the canals were sufficient during the year. The Deputy Commissioner of Hissar, however, complains of lack of water and expresses a hope that, if extensions of the Western Jamna Canal are carried out, the needs of the villages which at present receive an inadequate supply will be considered first of all. Obviously the proper policy to pursue, should more water become available, is that indicated by Mr. Watson. The Deputy Commissioner of Jhang reports that efforts have now been made with success to supply the proprietary villages at the tail of the Lower Chenab Canal: he draws attention to the unsatisfactory condition of irrigation in the 3rd Division of the Lower Jhelam Canal, where it is stated that there are general complaints of rotten banks, constant breaches, and intermittent supplies. The Deputy Commissioner of Multan gives a satisfactory account of the working of the departmental inundation canals in his district, but adds that "there is a general desire for the restoration of the chher system as people think that clearances were done better and in time."

Northern India Canal and Drainage Act (VIII of 1873).

22. By notifications issued during the year—

Minor Canals Act (Punjab Act III of 1905).

(1) Revised schedules of water rates have been prescribed for—
   (*a*) The Sarusti Canal.
   (*b*) The Grey Canals.
   (*c*) The Kiran Canal.

(2) The Delhi bands and Najafgarh drain have been included in Schedule I; water rates have been prescribed and rules issued.

(3) The Puran stream in Karnal District has been included in Schedule II.

(4) "Chher" has been abolished in the proprietary villages on the Kitchin Canals and the water rates already levied in Government estates have been extended to private estates also.

(5) The liabilities specified in section 52 (*i*) (*a*) of the Act have been held to apply to the Gurgaon bands.

Working of minor canals.

23. The transfer of the Rangoi Canal from departmental management to that of the Deputy Commissioner, which has been held in abeyance for some years, pending the Settlement Officer's proposals, will now be carried out.

Recently, on a reference by the Commissioner of Jullundur, the Financial Commissioner has recommended that service on canals notified under the Minor Canals Act should be exempted from the rule requiring a minimum pensionable service of ten years in order to permit of young and active men being transferred to this class of work, and it is understood that the Government of India have been addressed.

Gurgaon bands.

The enhanced schedule of water-rates for the Gurgaon bands came into force at the beginning of the year, but the management of these embankment was not taken over by Government until the 1st April 1910. The matured area irrigated fell to 5,825 acres, owing to poor winter rainfall, and the water-rate demand to Rs. 7,647. It appears that the increase in water-rates has led to a tendency to refuse to take water. The District Board is now concerned only to recover arrears of demands due for the period of its management. For the six months of Government control the demand due, including a small income from trees and grass, but excluding fees to lambardars for collection of the demand, amounted to Rs. 7,172, of which Rs. 6,715 were collected. The demand is well above the estimate of Rs. 6,000 per annum furnished in Financial Commissioner's letter No. 147-S., dated 21st June 1909. The balance outstanding is less than usual. The above figures do not include the initial grant by Government of Rs. 5,000, nor the annual grant of Rs. 6,000. The expenditure reported amounts to Rs. 3,184 mainly on establishment. It is too soon yet to form any opinion on the new arrangements so recently introduced.

Delhi bands.

The Delhi bands remain under the District Board and the Najafgarh drain under the Deputy Commissioner. The new water-rates came into force in Kharif 1910.

Sarusti Canal, Karnal.

The Sarusti Canal, which is managed by the District Board, has been more successful than in the two preceding years: the matured area, 16,610 acres, is 50 per cent. higher than the figures of the previous year: and the water-rate demand, the new schedule for which came into force in Rabi 1910, amounted to Rs. 29,038. The actual receipts were Rs. 27,255 and expenses Rs. 38,960, resulting in a nett loss to the District Board of Rs. 11,705. Of this expenditure, however, Rs. 14,213 represented repayment of instalments of the loan taken for the construction of the canal. The District Board has under consideration a proposal to abolish the canal patwari staff and to entrust the canal work to the revenue patwaris, thus reducing expenditure.

Part of the Sarusti steam and the Puran Ghagar will shortly be included in schedule I. The notifications, schedules of water-rates and rules are now under the Financial Commissioner's consideration. Meanwhile the small additional staff sanctioned by Government has been employed in directing the spontaneous efforts of the people. Major Buck, however, reports that the ardour of the people has cooled down considerably since he first submitted his proposals.

Shahnahr.

Irrigation on the Shahnahr has further shrunk during the year to 14,286 acres, from which, however, Government has derived the substantial sum of Rs. 21,175 in land revenue. The canal account again shows a surplus:

the receipts having been Rs. 22,792 and expenditure Rs. 17,197. The accumulated surplus is now Rs. 58,886. Mr. McGregor, Assistant Engineer, was deputed during the year at the expense of the canal fund to advise on the best method of utilising the surplus to effect improvements. His report has been received and is still under consideration.

Grey canals, Ferozepore.

The condition of the Grey canals still causes anxiety. The irrigated area has decreased from 188,163 to 178,482 acres and the decrease in the sown area is 38,487 acres. Remodelling is going on in the Mamdot parts of the system, where the Mamdot estate is spending a large sum under the supervision of an Engineer paid from the Mamdot Fund.

Kiran Canal.

The receipts on the Kiran Canal, which is managed by the District Board amounted to Rs. 610 and expenditure to Rs. 173. The enhanced water-rates will increase the income in future and the District Board is taking up the question of improving the irrigation.

Montgomery canals.

Owing to a change in the river the Kitchin Band ceased to hold up water and two new inundation canals, the "Kitchin canals", have been dug to assist the villages which depended on the band. These canals will be able to irrigate some 56,000 acres of land and actually irrigated last year, while under construction, some 27,000 acres. The work was carried out without any cash outlay by Government and, as remarked by Mr. Maynard, the Commissioner, has been a very notable achievement for which the credit is due to the Deputy Commissioner Mr. Irving. It has now been decided to give up the old "chher" system which obtained in proprietary villages and water-rates will in future be charged throughout.

The other small canals in the Montgomery District have done satisfactorily during the year and call for no comment.

Mianwali irrigation.

Minor improvements were made in tahsil Isakhel. The Deputy Commissioner brings to notice the work of M. Sher Ali Khan, Offg. Tahsildar, owing to whose energetic supervision the year's results in this tahsil were satisfactory. In Mianwali the irrigation from cuts from the river was very successful, the matured area rising to 49,000 acres. Owing to the poorness of the 1909 monsoon the hill torrent irrigation was less satisfactory, but 13,905 acres of crops were recorded as matured.

No work was necessary in the Bhakkar tahsil and the special establishment worked in Mianwali and Isakhel only.

Land Acquisition Act (I of 1894.)

24. The area of land acquired for public purposes was 8,763 acres. Of this 3,911 acres were required for railway construction and extensions in various parts of the Province, the chief projects being the Digana-Hissar, the Patti-Kasur, the Sutlej Valley, Chichoki-Shorkot, and Kalabagh-Bannu lines, and the doubling of the N.-W. Ry., main line in the Ambala and Ludhiana districts. For the new works on the Upper Chenab and Upper Jhelum Canals and for extensions of existing canals 2,481 acres were acquired. Other objects for which land was taken up under the Act were Grass Farms in Sialkot and Delhi, the new town at Churatta in the Dera Ghazi Khan District, and court-houses and residences for civil officers in Jallandhar and Dharmsala.

Statement No. XVIII now shows the number of years'-purchase of the land revenue represented by the price of land acquired which is subject to assessment. Unfortunately this additional information, as reported by Deputy Commissioners, is of little assistance in comparing the rate of compensation awarded in different districts. With one or two exceptions no care has been taken to exclude from the compensation the price paid for buildings or trees. Unless this is done the calculation is meaningless. Detailed instructions will be issued for the preparation of next year's report. The Deputy Commissioner of Lahore notes the importance of land acquisition proceedings in his district. The area

required for extensions of the railway works at Lahore Junction and Badami Bagh amounted to 843 acres, the cost of acquisition amounting to some Rs. 800 per acre. These cases are now pending in the civil court and a special Divisional Judge has been sanctioned to work off the arrears. The Deputy Commissioner suggests that a more summary procedure is desirable. Recent land acquisition proceedings in Lahore should furnish material for a discussion of land values in the environs of that city, which would serve as a guide for officers acquiring land in urban areas elsewhere. The Deputy Commissioner has been asked to submit such a report on the conclusion of the proceedings now pending. It is noticeable that references to the civil court are rarely made in cases where land is acquired for canals. In the Sialkot district 135 acres were acquired for the Upper Chenab Canal without a single objection to the Collector's award. On the other hand, acquisition for a railway or a market appears to stimulate references to the civil court. Nor is the result of these references discouraging to those objecting to the Collector's award. The Deputy Commissioner of Hissar, for instance, reports that compensation for land acquired for the remote Dabwali market was raised by the civil court from Rs. 160 to 640 per acre, a rate which compares favourably with compensation given for land in the vicinity of Ambala city and Kalka town.

25. Owing to favourable seasons the amount advanced under Act XIX of 1883 (Land Improvements Loans) was smaller than that in any of the five preceding years with the exception of 1905-06, while advances under Act XII of 1884 (Agriculturists Loans Act) fell below the figure for any of these years. Good harvests afforded an excellent opportunity for clearing accounts, and recoveries both of principal and interest were satisfactory, as the following figures indicate :—

Loans Acts. Statements XVIII, XIX, XX, XXI, XXII, and XXIII.

	Principal Account.				Interest Account.			Arrears overdue.
	Demand for the year.	Arrears.	Collected.	Balance outstanding less, amount written off as irrecoverable.	Demand for the year.	Arrears.	Collected.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Act XIX of 1883 ...	2,03,077	13,388	2,11,918	4,547	77,679	6,784	81,628	2,600
Act XII of 1884 ...	6,97,647	1,76,630	8,19,554	54,386	55,329	26,430	72,548	2,018

Rupees 6,599 on account of interest have been remitted during the year in the Hissar district. Under Act XII of 1884 suspensions of principal due were large only in the Hissar district, (Rs. 17,478). Realizations in the Lahore district were very satisfactory.

The present state of the loan account throughout the province is an appropriate opportunity for the introduction of the greatly simplified system of accounts contained in the new Loans Circular which issued in September last. If revenue accountants are adequately instructed in the use of the new system when the work is comparatively light much confusion will be avoided in times of scarcity and heavy advances.

The total of the advances during the year under Act XIX of 1883 amounted to Rs. 1,52,639. Over Rs. 20,000 were advanced in Gurgaon and Multan for masonry wells, while loans amounting to over Rs. 10,000 were made in Montgomery for wells and water-courses, in Muzaffargarh for wells, and in Attock for wells and dams. In the last district 17 new wells and 39 dams were completed during the year under report. The Commissioner of Rawalpindi remarks, "the distribution of takavi loans is a most important branch of revenue administration in the Attock district. It is, I think, being conducted with very satisfactory results." Twenty-four new dams were also constructed with the aid of loans

from Government in the Rawalpindi district. Works appear to have been regularly inspected, and care to have been taken that the loans are applied to the objects for which they are granted. Three hundred and sixty new wells were completed from takavi advances, the largest numbers being reported from Gurgaon (32), Jalandhar (24), Ludhiana (86), Sialkot (22), Multan (57), Muzaffargarh (35). The number of wells sunk without the help of a Government loan was, according to Statement XX, 3,320. Of these 1,159 were in the single district of Ludhiana, from which, as pointed out in paragraph 26 of last year's report, no new wells had been returned for ten years. Apparently very many wells have now been credited to the year under report, which were actually constructed at an earlier date.

Advances amounting to Rs. 1,78,520 were made during the year under Act XII of 1884. Loans amounting to over Rs. 30,000 were distributed in Muzaffargarh and Mianwali, over Rs. 20,000, in Montgomery, and over Rs. 10,000 in Amritsar (chiefly in the Ajnala tahsil), Gurdaspur, Sialkot, Multan, and Dera Ghazi Khan. On the other hand Rs. 4,380 sufficed for the whole of the Delhi division. The Commissioner of Lahore notes the high prices of plough cattle in the Gurdaspur and Sialkot districts, which is attributed, and with reason, to the hide and bone trade. The *zamindars* are said to prefer selling for a few rupees animals which have become weak or lame rather than as formerly to attempt to nurse them to health again. The Deputy Commissioner of Gurdaspur considers that the amounts lent for the purchase of plough bullocks should be greatly increased. As appears from paragraph 38 of the last report on Co-operative Credit Societies, 25 per cent. of the amounts advanced by village banks is for the purchase of seed and bullocks, and Mr. Douie hopes that where the Co-operative Credit system takes firm root the banks may become able in ordinary years to relieve Government of the necessity of using Act XII of 1884 to any large extent. The Commissioner of Multan considers that systematic attempts should be made to verify the proper application of loans granted under this Act in view of the large advances made in the Multan division.

Statement No. XX shows that Government has gained Rs. 98,236 in the operations under both acts. The result for the past six years has been a net gain of Rs. 93,969 under Act XIX of 1883 and a net loss of Rs. 79,652 under Act XII of 1884. The figures in Statement XX are supplied by the Accountant General. They differ widely from those given in Satatement XXI.

Forest Act (VII of 1878).

26. There is no further progress to report on the forest settlement of the Lahore rakhs referred to in last year's report nor on the reservation of the areas required for irrigated plantations on the canals of the Triple Project, except that the proceedings in one of the rakhs selected on the Upper Chenab Canal have been practically completed. The notification is delayed till the boundaries of the *rakh* with adjoining villages has been rectified.

The revised rules for cutting wood in protected forests in Rawalpindi were sanctioned and issued during the year. The Deputy Commissioner reports that the new rules introduced last year for the management of the Government owned trees on private and common lands in the hill tracts of this district have so far worked admirably and given a genuine relief to the people. The Commissioner states that his impression is that in Murree and Kahuta the people are generally content with the management of the protected forests and guzaras. The policy initiated last year of associating men of distinction and influence in the management and protection of Government trees has been quite successful, and an attempt will be made to find more men of suitable class to entrust with the necessary authority.

Government lands. Statement XXIV.

27. The report of the special officer deputed to enquire into the Crown lands in and around Delhi city has not yet been received by the Financial Commissioner. The Settlement Officer, however, has reported on the action taken by him to sell to the tenants agricultural lands in that district not in the immediate neighbourhood of the city. The instalments fixed are being paid up and before long this property, which has always given considerable trouble, will have been finally disposed of. In Muzaffargarh in a similar case the sale of the Government land at the price offered is proceeding steadily.

Two rakhs in Dera Ghazi Khan, previously unclassed forests under the management of the Forest Department, have been transferred to the Deputy Commissioner and thrown open to cultivating leases. A considerable increase in establishment was sanctioned for the management of the rakhs in the charge of the Deputy Commissioner of Montgomery, where the demand for wood has risen, owing to the opening up of the country by the Sutlej Valley Railway. The extra outlay will be more than covered by the additional receipts. Thus in the year under report the total income from the rakhs from all sources exceeded that of the previous year by Rs. 41,018.

Punjab Land Preservation (Chos) Act.

28. A committee to consider the subject of arresting the denudation of the Punjab hill tracts met at Rawalpindi in March 1910 and submitted its recommendations to Government. The committee's proposals for the amendment of the Act and for the constitution of a land improvement committee entrusted with the expenditure of a lakh of rupees yearly were negatived.

A small sum of money was placed at the disposal of the Deputy Commissioner of Hoshiarpur for expenditure on reclamation work in the beds of chos. The construction of two embankments at a cost of Rs. 662 seems a meagre result. In the plains an attempt at action under Section 8 of the Act is to be undertaken on the Mahli Cho. It is anticipated that at first about Rs. 10,000 per annum only will be required.

It has been found unnecessary to take any action under the Act in Karnal and Ambala, but Rs. 2,000 have been placed at the disposal of the Deputy Commissioner of the latter district for expenditure on small protective works, rewards, and small grants-in-aid.

Land Alienation Act: Notification of Tribes.

29. The only alteration in district groups of agricultural tribes was the notification of the Gurgaon Tagas. The notifications constituting as separate groups, the Gaur Brahmans in the Delhi division, the Una Brahmans in Hoshiarpur, the Rawalpindi Brahmans, and the Jhelum Muhial Brahmans and Gadhiok Kanungos referred to last year, were published during the year. Similar action has also been taken in the case of the agricultural divisions of the Kangra Brahmans and of the Kakezais in Jhelam. The Deputy Commissioner of Rohtak reports that some dissatisfaction is felt by the Gaur Brahmans of his district, owing to the impossibility of alienating, without sanction, to Jats; and the Deputy Commissioner of Hoshiarpur reports that the Brahmans of Una are not altogether satisfied with the action taken.

Continual applications for notification are presented. Action has been refused in many cases, as for example those of the Bedis of Gurdaspur, the Kalals of Ambala, the Sadikis of Karnal, the Datt Brahmans of Gurdaspur, the Gadhioks of Chakwal town and the Babla Bhatias of Multan. Government has been asked to affirm once more the refusal to notify the Shekh Ansaris of Jalandhar whose case has again been re-opened. Several Deputy Commissioners refer to the land-grabbing carried on by many members of agricultural tribes. It may ultimately be necessary in some classes to split up existing district groups into smaller groups.

Rules and orders.

30. Standing Order No. 1 now deals with orders under the Land Alienation Act, but the special mutation procedure is included in Standing Order No. 23. The Act itself with the notifications issued under it has been printed in the volume of Land Administration Acts. The separate Alienation Hand Book has in consequence become obsolete.

The Deputy Commissioners of Ambala and Gujrat bring to notice a matter which had also come to the Financial Commissioner's notice when on tour in Gujranwala. It appears to be a general custom to enter the holder of an illegal mortgage, in whose name mutation has been refused, as a tenant-at-will. Orders have now issued that his name must not appear in the jamabandi at all unless he himself cultivates the land, in which case he will be entered as a tenant-at-will under the owner of the land.

Evasions.

31. A good deal of attention has been paid to *benami* transactions in the district reports. In some districts these transactions are not uncommon. The Deputy Commissioner of Ambala writes:—

"*Benami* transactions are becoming numerous in the district especially in the Ambala, Jagadhri, and Naraingarh tahsils.

The names of the zamindars are entered in the revenue papers, yet the actual landlords are the Banias who take produce or realize rents from the tenants. And as the Bania takes a bond from the nominal vendee or mortgagee which he keeps hanging over his head like the sword of Damocles, the latter is powerless to do anything. It has not been possible to collect accurate statistics of such transactions, because a large number of the members of the subordinate revenue agency being of the same class, sympathises with the Banias but in the Naraingarh tahsil alone, there were 54 such transactions of sale for Rs. 9,000 involving an area of about 150 acres, and 19 of mortgage for Rs. 3,175 for an area about 50 acres during the year under report. The above figures are only a fraction of the evil that is being wrought. Though the Banias are not in cultivating possession of such lands yet they have managed to get themselves entered as tenants-at-will at revenue rates. Such fictitious tenants were ordered to be struck off by the Director of Land Records, and his orders are being carried out as cases come to light."

The order referred to in paragraph 30 should do something to check this abuse. Mutation should always be refused when the transferee shown in the deed is known not to be the real mortgagee. And there should be no hesitation in reviewing the mutation order at any time when the unreal nature of the transaction comes to light. Any wilful winking at fictitious mortgages by revenue subordinates or officers attesting mutations should be severely dealt with. Mr. Douie doubts whether such transactions will ever be numerous enough to seriously interfere, with the working of the Act, if care is taken that no sort of recognition of them in our records is permitted.

Working of the Act. Statement V.

32. Statement V shews that agricultural tribes have gained 5,844 acres on sale transactions. They have lost ground in 6 districts only during the year. The chief changes are, in acres Hissar+2,310, Ferozepore+1,074, Lahore—952, Sialkot—887, Shahpur+1,041, Montgomery+1,135.

The excess of area mortgaged *by*, over that mortgaged *to*, agricultural tribes is given as 24,829 acres. The figures for the last four years shew a continuous rise in this excess which is not by any means counterbalanced by the excess of area redeemed *by*, from that redeemed *from*, agricultural tribes.

Complete figures for redemptions have not hitherto been obtained, as in previous reports returns for the persons redeeming have alone been obtained without regard to the persons with whom the land was previously mortgaged. The figures show that the area redeemed *by* agricultural tribes exceeded that redeemed *from* them by 4,919 acres only and was actually less in eleven districts. The nett result from sales and mortgages is as follows,—

	acres.
(*a*) Gain on sales	5,844
(*b*) Gain on redemptions	3,919
Total ...	9,763
(*c*) Loss on mortgages	24,829
Nett loss ...	15,066

Business Returns. Statements XXV and XXVI.

33. Except in Delhi judicial appellate work was heavier in all divisions and particularly in Rawalpindi. There was, however, a considerable reduction in the Financial Commissioner's Court. Disposals have kept pace with the increase in institutions. Executive appeals shew a considerable reduction, though in the offices of the Settlement Commissioner and Financial Commissioner there was some increase. The pending file has now been reduced to reasonable proportions, the mass of outstanding cases in Rawalpindi having been worked off during the year. In only 16 per cent. of cases were executive appeals successful. Judicial revision cases in the Financial Commissioner's court were far fewer than in the previous year, but executive revision cases were somewhat

greater in number. In the former 6 per cent. and in the latter 5 per cent. of the cases obtained any measure of success. The fact that the chance of success is minute has little or no effect in cooling the ardour of litigants.

The total number of revenue cases disposed of in district courts and offices has again fallen and is now returned at 176,604, the pending file moreover has been reduced from 19,794 to 17,863. The largest number of outstanding cases is shewn by Hoshiarpur, but comparatively speaking, the number of cases pending is largest in Gujrat, Shahpur, Jhelam, and Dera Ghazi Khan, where it amounts to more than two months' work. The chief decrease is shewn under miscellaneous Revenue Officer's cases, mainly accounted for by the Lahore figures. There appears to have been some change in classification in this district, as Revenue Officer's cases under the Land Revenue Act shew a corresponding increase. Under this latter head, however, Karnal shows a very large decrease which is explained as being due to the completion of the settlement. A large increase in work is shewn under the Land Alienation Act, chiefly caused by the high figures returned from Rawalpindi. The Deputy Commissioner explains that the increase is mainly due to the number of applications for leave to sell to artisans under Financial Commissioner's circular letter No. 14 of 25th March 1909. The constitution of additional groups in various districts also increases the number of cases in which sanction to sell has to be obtained. The state of the work is generally reported to be satisfactory, but the Commissioner of Rawalpindi complains of the character of the partition work in Shahpur. It is too much to hope that this is the only district in which partition work, which is one of the best tests of the quality of a tahsildar or Extra Assistant Commissioner as a revenue officer, is not satisfactory. Mr. Douie, when Commissioner of Rawalpindi, issued instructions pointing out how the defects which came to notice in cases belonging to that division could be prevented.

Tours of Commissioners.

34. The returns for touring done by the Commissioners are, for the financial year 1909-10:—

Delhi.—The Hon'ble Mr. A. Meredith, was Commissioner for the whole year and spent 71 days on tour.

Jullundur.—The Hon'ble Lieut.-Colonel H. S. P. Davies was Commissioner for the whole year and spent 110 days on tour.

Lahore.—The Hon'ble Lieut.-Colonel C. C. Parsons was Commissioner for the whole year and spent 121 days on tour.

Rawalpindi.—The Hon'ble Mr. J. M. Douie, C.S.I., held charge for 117 days and spent 13 days on tour; Mr. C. J. Hallifax for 183 days and spent 31 days on tour; Mr. P. J. Fagan for 65 days and spent 16 days on tour; Mr. Hallifax was in charge during the first four months of the cold weather, but the fact that he was also carrying out the duties of the office of Excise Commissioner probably interfered with his touring.

Multan.—Mr. P. J. Fagan held charge for 221 days and spent 52 days on tour; Mr. H. J. Maynard for 144 days of which he spent 82 days on tour.

Settlement.—The Hon'ble Mr. A. H. Diack, C.V.O., was Settlement Commissioner for the whole year and spent 142 days on tour.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Department of Revenue and Agriculture (Revenue), No. 39, dated 23rd March 1912.

READ—

The annual report on the land revenue administration of the Punjab for the year ending 30th September 1911, forwarded with letter No. 183, dated the 26th February 1912, from the Junior Secretary to the Financial Commissioners, Punjab.

REMARKS.—The year 1910-11 witnessed great changes in the revenue administration of the Punjab. By the abolition of the posts of Settlement Commissioner and Excise Commissioner, the Financial Commissioners have been brought into more direct control of two important departments, while the responsibilities of Commissioners and district officers have considerably increased. The saving of report writing and of delay in the disposal of cases has already been very noticeable and the change promises to conduce largely to efficiency.

The year 1910-11 was typical of the Punjab climate. The weakness of the monsoon gave rise to serious fears, which were dispelled by heavy rain in August. The splendid prospects of the rabi crop were dimmed by untimely rain in March. Both harvests illustrated the proverbial uncertainties of farming. It is always difficult to say when the crop returns are sent in if the outturn is really good or bad. The tendency is to find fault with it and the real results only come out a year later. Judging by the immense export of grain both to Karachi and to other provinces the Lieutenant-Governor believes the outturn of kharif 1910 and rabi 1911 must have been better than was anticipated.

For those with surplus produce to sell, the year was exceptionally favourable. With cotton selling at a record figure and wheat and rapeseed commanding a high price, the farmers made large profits.

2. For the second year in succession the fixed land revenue demand was collected almost in its entirety. Last year 99·1 per cent. of the demand was collected. This year the percentage was 99·3. Our fixed assessments are framed to meet bad years as well as good, and the Lieutenant-Governor is pleased to notice that in a year which was perhaps inferior to its predecessor, the high standard of collections has been maintained. This is the more satisfactory, inasmuch as the Provincial revenue roll, which for nine years had been nearly stationary, rose in this year from 208 to 213 lakhs of rupees. The outstanding arrears have been reduced to less than six lakhs, which compares notably with the average for the previous nine years which was 35 lakhs. Thus, as the Financial Commissioners point out, the current year starts with arrears amounting to only 2 per cent. of the current demand.

3. The fluctuating land revenue demand has increased by 17 lakhs over last year's figures, though even now it only stands at 71 lakhs. The increase is entirely due to re-assessment in the Chenab colony, which is by no means complete. The Lieutenant-Governor notices with especial pleasure that, as the result of the inquiries instituted by Government, the realisations both in Jhang and Mianwali are at last approaching the Settlement Officer's estimates. His Honour approves strongly of the measures recently taken by the Financial Commissioners to examine the working of fluctuating assessments in the province. It is quite wrong that even in good years the return from such assessments should be considerably below not only the estimates of the officers who made the assessment but also the fixed assessments framed thirty and forty years ago. The result is apparently due to an improper working of the rules and to inadequate supervision on the part of Collectors.

4. It is apparent that the revenue-payers are coming to appreciate the system of sending their land revenue by money order. In Karnal nearly 2½ lakhs were remitted in this way, and the total amount thus sent was 14 lakhs,

received from nearly every district in the province. Any large extension of the system involves, no doubt, considerable difficulties. If, however, the headmen of the province realise that the present method of paying the land revenue is both troublesome and primitive, some means of surmounting these difficulties must be found. It must, however, be remembered that the practice of paying in sovereigns which is common in the richer tracts obviates many of the difficulties formerly experienced in transporting large sums in rupees.

5. The range of settlements is moving northward. The Delhi division is now finished, and settlements of old established districts are practically confined to the Jullundur and Lahore divisions. His Honour is pleased to find that the duration of settlement operations is being sensibly lessened. It is highly creditable to Mr. Dunnett that the Ludhiana settlement should have been finished in 3 years instead of $3\frac{1}{2}$, and to Mr. Kennaway that the cost of re-assessment in Gurdaspur should be less by 2 lakhs than the sanctioned estimate. Sir Louis Dane has recently had occasion to repeat his opinion that there is still room for reduction in settlement establishments. The process of repartition necessitated by the introduction of *killabandi* in proprietary villages is no doubt long and tedious, but the results to be obtained are worth a good deal of time and trouble and the process once completed is complete for all time.

6. The Survey Department continues to pursue its programme for the revision of the topographical maps of the country with activity. During the year operations were in progress in no less than 11 districts in the Punjab, and 21 1-inch standard sheets were published.

7. Suits for the enhancement of rent against occupancy tenants are increasing, while suits against tenants-at-will show a marked decrease. It is clear that at present the position of tenants-at-will in the Punjab is for practical purposes as secure as that of occupancy tenants. In face of this fact the remarkable rise in cash rents which has come to notice in recent re-assessments is indisputable evidence of the agricultural prosperity of the province and the amount of spare cash in the purses of the tenants. The general decrease in revenue litigation, a natural corollary of agricultural well being, is a welcome sign.

8. There is little to note in the progress of Major Irrigation Works. The great triple scheme is not yet complete, and no other extensions of importance have been undertaken. It is, however, satisfactory to notice that the imperfections of supply and distribution on the Lower Chenab and Lower Jhelum Canals have been remedied. The most important subject in this connexion at present is water-logging and the subject has received the attention it demands. At the suggestion of the Lieutenant-Governor the experiment of lining the canals is being tried in two places. This method is of course very expensive, but the problem must be faced and Government may have to acquiesce in the curtailment of the large revenue returns of some of the canals, to prevent the ruin of the riverain tracts and narrow doabs. His Honour notes with satisfaction that the Irrigation Department are experimenting with drainage and silt-filling in water-logged areas on the Western Jumna Canal.

9. Advances under the Loans Acts were naturally small in a year unmarked by special calamities. The total amount outstanding under both Acts is only 17 lakhs, which is less than the amount advanced in the one year 1907-08. The interest due was recovered without difficulty. Action under the Chos Act is being taken, both in Hoshiarpur and Ambala. In both districts it is too early as yet to judge of results, but it is clear that Government is working on the right lines, and His Honour shares Mr. Diack's hopes for eventual success.

10. The price of land is still rising, and the value of a cultivated acre is now Rs. 124 to sell and Rs. 101 to mortgage. The new column in statement XXIV, showing the multiple of the land revenue which the sale money represents, is interesting and instructive. It brings out prominently the lightness of the assessment throughout the province which is particularly noticeable outside the Delhi division. His Honour trusts that Settlement Officers will study these figures carefully.

11. The position of affairs under the Land Alienation Act, which was the subject of comment in last year's report, has been to some extent cleared up. In mortgages the agricultural tribes lost 25,000 acres; in sales they gained 14,000 acres, and in redemptions they gained 20,000 acres. Thus on paper the agricultural tribes gained some 8,000 acres. In effect these figures are valueless as they obscure the main facts of the situation. As the Financial Commissioner points out, sufficient evidence that the Act is fulfilling its purpose is given by the following comparison. For the three years preceding the passing of the Act the area sold was thrice and the area mortgaged was more than twice what it is now. And yet the area redeemed now in a year falls little short of the area redeemed in 1899, while the mortgages now are ordinarily only for a term.

12. His Honour has to thank the Financial Commissioners for a concise and instructive report. The form of the report has been changed since the last one was written, and the improvement is welcome.

ORDER.—Ordered that the above remarks be printed and circulated with the report; that they be published in the *Punjab Gazette*, communicated to the Financial Commissioners, Punjab, and forwarded to the Government of India, Department of Revenue and Agriculture, with the usual number of spare copies.

Ordered also that a copy of the report and of the above review be forwarded to the Surveyor-General with reference to paragraph 6.

By order of His Honour the Lieutenant-Governor, Punjab,

H. P. TOLLINTON,

Revenue Secretary to Government, Punjab.

Punjab Government Press, Lahore—25-3-12—2796—400—H. L. S.

No. 183.

FINANCIAL COMMISSIONERS' OFFICE :

Dated LAHORE, *26th February* 1912.

FROM

H. S. WILLIAMSON, ESQUIRE, I.C.S.,

Offg. Junior Secretary to the Financial Commissioners, Punjab,

To

THE HON'BLE MR. C. A. BARRON, C.I.E.,

Chief Secretary to Government, Punjab.

The Hon'ble Mr. A. H. Diack, C.V.O.
The Hon'ble Mr. M. W. Fenton, C.S.I.

SIR,

I AM directed to submit the Annual Report on the Land Revenue Administration of the Punjab for the agricultural year ending the 30th September 1911.

2. The Hon'ble Mr. A. Meredith officiated as Financial Commissioner from 1st to 19th October and as First Financial Commissioner from 20th October to 9th November 1910, and again from 28th April to 12th August 1911. The Hon'ble Mr. (now Sir J. M.) Douie held the office of the First Financial Commissioner from 10th November 1910 to 27th April 1911, and again from 13th August to 30th September 1911.

The office of the Second Financial Commissioner was held by the Hon'ble Mr. A. H. Diack from 20th October to 9th November 1910, and on his proceeding on leave Mr. A. Meredith officiated as Second Financial Commissioner from 10th November 1910 to 27th April 1911, and again from 13th August to 30th September. Mr. H. J. Maynard officiated from 28th April to 12th August 1911.

I have the honour to be,

SIR,

Your most obedient Servant,

H. S. WILLIAMSON,

Offg. Junior Secretary to the Financial Commissioners, Punjab.

REPORT

ON THE

LAND REVENUE ADMINISTRATION

OF THE

PUNJAB

FOR THE

AGRICULTURAL YEAR ENDING THE 30TH SEPTEMBER 1911.

Introductory.

1. During the year effect was given to the arrangements sanctioned last year by which the posts of Excise Commissioner and Settlement Commissioner were abolished and the post of Second Financial Commissioner was created. The change was made from October 20th, 1910. The report of settlement operations in the Punjab has been amalgamated in this report on the Land Revenue Administration of the Punjab in accordance with the orders conveyed in Punjab Government endorsement No. 2214 S. (Revenue) of 18th September 1911.

General summary of agricultural conditions.

2. (*a*) *Kharif*, 1910.—The monsoon was fitful and until the end of August seemed likely to fail: but showers sufficient to save the crops were received from time to time and ended in heavy general rain at the close of the month of August. There was no rain in the north and west of the Punjab in September, while in October the heavy rain in the Delhi division did some damage to millets and cotton.

(*b*) *Rabi*, 1911.—The heavy rain at the end of August generally left enough moisture for rabi sowings, and this was supplemented by unusual rain in the east of the province in October. There was general rain in January and heavy rain in March. The latter did some damage to what would have otherwise been a bumper rabi crop. Frosts prevailed in December which damaged the sugarcane crop and are alleged to have led to the recurrence of boll-worm in the present cotton season.

(*c*) *General result.*—The sown area of the year exceeded the normal by 2,000,000 acres, but was less than the sown area of the preceding year. The outturn of the rabi harvest is generally reported to have fallen short of expectation, the heavy rains of March having militated against a full outturn. Generally speaking, the results of the kharif crops on unirrigated lands were below average, and on irrigated lands normal. The rabi crop was inferior to that of 1909-10 in area and probably below normal in outturn. Plague is said to account for a marked decrease in cultivation in Rohtak and Ambala.

(*d*) *Irrigation.*—There is no marked variation in the irrigated area except in Hissar, Dera Ghazi Khan and Amritsar. In spite of the increase of irrigation in Hissar, the irrigated area of that district is only 11 per cent. of the total cultivated area: and the failure of 16 per cent. of rabi crops on unirrigated land, even in this favourable year, forms a powerful plea for the extension of irrigation here if water can be made available by the scheme for increasing the Western Jumna Canal supply through the Sardah Ganges Feeder.

(*e*) *Prices.*—The price of cotton was higher than it has ever been in the Punjab. Wheat and rapeseed also commanded high prices. The prices of other staples were somewhat lower than in the preceding year.

3. The fixed land revenue roll of the province stands at Rs. 2,13,26,353, which is an increase of Rs. 4,59,360 on the figures of the previous year. Re-assessments in Karnal, Delhi, Hissar and Gurdaspur account for increases aggregating 5½ lakhs, while the introduction of fluctuating assessments in the Bhera-Chenab circle of Shahpur and diluvion cause reductions of over a lakh. The other additions and deductions are normal. Of the current demand 99·3 per cent. was recovered. The outstanding balance of the current demand is Rs. 1,53,703, of which Rs. 50,681 are under suspension, Rs. 1,516 undetermined, and Rs. 8,172 recoverable arrears not under suspension. The irrecoverable balance is Rs. 93,834 on account of lands where diluvion has occurred, wells have fallen out of use, or fluctuating assessments have been introduced.

Fixed land revenue.
Statements Nos. V, VI and VII.

The collections on account of tribute are Rs. 65,500 less than in the previous year. The reason of the decrease is that with the permission of Government the second instalment of the tribute due from the Maharaja of Kapurthala has been paid in the United Provinces instead of in the Punjab.

The balance at the close of last year was Rs. 17,42,464, of which Rs. 8,70,908 were classed as recoverable and Rs. 8,71,556 as undetermined or irrecoverable. Of these sums in the year under report, Rs. 8,52,108 have been struck off and Rs. 4,72,157 have been recovered. Rupees 4,25,727 remain as balance. The difference in the totals of Rs. 7,528 is due to revenue being counted twice over in the local returns in the case of the territorial changes in the Lyallpur-Montgomery boundary and the Lahore-Gujranwala boundary. The year 1911-12 thus starts with balances of years previous to 1910-11 of Rs. 4,25,727 and balances of the year 1910-11 of Rs. 1,53,703. The balance is only 2 per cent. in excess of the revenue roll for the year 1910-11, and would have been smaller still had the outturn of the rabi crop of 1911 been at all up to expectation.

4. Alluvion and diluvion occurred in 22 districts, resulting in a net decrease of Rs. 23,026 in the fixed land revenue roll. The loss due to Chos and minor streams is a little more than one-seventh of the whole sum involved, the remainder being due to the action of the great rivers. Gurgaon is the only district which reports a gain; the largest loss is reported in Gurdaspur owing to the action of the Beas and Ravi. But the statement does not show the total gain and loss of revenue due to alluvion and diluvion, because in the districts in the west of the province where changes are greatest they are dealt with by means of systems of fluctuating assessments.

Alluvion and diluvion.
Statement No. IX.

5. Land revenue temporarily off the fixed land revenue roll amounted to Rs. 90,000 from which the item of Rs. 50,000 due to new assessments in Hissar has to be deducted, leaving the account at the normal figure of Rs. 40,000.

Fluctuating land revenue.
Statement No. VIII.

The total demand for permanent fluctuating land revenue is Rs. 71 lakhs or 17 lakhs better than last year. In the land revenue on canal-irrigated land assessed by the Deputy Commissioner there is a decrease of 1½ lakhs, chiefly due to a bad season in Multan, but in the case of land revenue and malikana assessed by the Irrigation Department there has been an increase of 1 lakh in Gujranwala, 14½ lakhs in Lyallpur, and 2½ lakhs in Jhang. This is due to the new assessments in the Chenab colony introduced in rabi 1911.

It is interesting to note that the assessments of fluctuating land revenue in Jhang, which have hitherto fallen far short of the Settlement Officer's estimate, in the present year realised only Rs. 5,000 less than that estimate, while in Mianwali the Settlement Officer's estimate was attained. At the close of each rabi harvest the Financial Commissioner receives a statement from districts under fluctuating assessments showing the demand of the past year, and the average of the demand yearly since settlement as compared with the demand anticipated by the Settlement Officer. The submission of the statement has only been recently prescribed, and it is too early to give a general review of the working of fluctuating assessments on the imperfect returns

of two years only; but the Financial Commissioner hopes to be in a position to give the results of his examination of the general working of fluctuating assessments in next year's report. Up to date the assessment which falls short of the Settlement Officer's estimate in the most marked and regular way is that of the Bet circle of the Pakpattan tahsil of Montgomery where the Settlement Officer seems to have based his forecast on years of exceptionally good river floods and to have assumed that dofasli crops would pay revenue in both harvests. The system and working of the kharaba remissions in the Multan division and particularly in Mianwali is receiving special attention.

Other land revenue.
Statement No. VIII.

6. The demand for the year was Rs. 24,83,969 or nearly 5½ lakhs better than last year. Of this Rs. 24,45,702 were collected. The increases were under head "Sale-proceeds of Government estates" (+ Rs. 4,34,639), chiefly in Lyallpur, Jhang and Muzaffargarh, under head "Sale of town sites" (+ Rs. 1,44,273), due to recovery of price of sale of sites in Tandlianwala in Lyallpur, and under the head "Recovery of the cost of settlements from assignees" (+ Rs. 94,318). The decreases were under the head (*i*) "Sale-proceeds of waste land and nazrana" (—Rs. 74,825), due to the demand for nazrana in the Chenab colonies having been largely realized, (*ii*) under the head "Acreage rate", due to the acreage rate account in the Chenab colonies having been nearly cleared, and (*iii*) under the head "Tirni" (—Rs. 15,711), due chiefly to a lower demand in Montgomery and arrears of collection in Multan. The variations under the other heads are normal. The chief arrears are in Shahpur where there is always a difficulty in collecting nazrana from large stud farm grantees and where the collection from the Jalpana estate proceed very slowly.

Land revenue assignments.
Statement No. X.

7. Assignments of land revenue amounted to rather over 29½ lakhs, a slight increase on last year's figures. Of this over 20½ lakhs are assigned for the benefit of private individuals. The percentage of land revenue assigned to the total land revenue of the province is 9·5 as against 9·7 in the preceding year.

The assignments in Ludhiana and Gurdaspur were revised during the year in the course of settlement operations in those districts.

Assignments to military pensioners were made in Rohtak, Ludhiana, Gujranwala and Rawalpindi to the total value of Rs. 2,400.

Coercive processes.
Statement No. XI.

8. Coercive processes issued against lambardars in 4,683 cases, representing an increase of 846 cases on last year. The amount of land revenue involved was more than last year. Coercive processes against others issued in 9,589 cases, or 352 more than last year. From the lambardars concerned 97 per cent. of the demand was recovered and from the others 90 per cent. Warrants of imprisonment against lambardars were executed in 4 cases in Rohtak and 6 cases in Montgomery, and processes for distress against moveable property in the case of lambardars were executed in 67 cases in Ferozepore, in 26 in Lahore, in 38 in Gujranwala, and in 24 in Dera Ghazi Khan. In Ferozepore there were 26 sales of moveable property. In proceedings against others processes for the distress of moveable property were executed in 32 cases in Ludhiana, in 39 in Lahore, in 96 in Amritsar, in 27 in Gurdaspur, and in 51 in Dera Ghazi Khan, but recoveries were made mostly without consequent sale. Stringent methods to secure payment from lambardars were necessitated in Ferozepore, Gujranwala, Muzaffargarh and Dera Ghazi Khan, while the lambardars appear to have most required assistance from the Act in the districts of Rohtak, Amritsar and Gurdaspur.

Process-serving establishment.

9. The processes issued were mainly served by the agency of the tahsil establishment; but in 17 districts some special extra establishment was employed under the provisions of paragraph 9 of Standing Order 29. The receipts from *Talbana* amounted to Rs 18,485 as against Rs. 14,053 in the preceding

year. The increase is a result of the orders referred to in paragraph 12 of last year's report.

Progress made in remeasurements, revision of records, reassessment and miscellaneous settlement operations. Statement No. XII and XIII.

10. Settlement operations were in progress during the year in the districts of Kangra, Hoshiarpur, Ludhiana, Ferozepore, Gujranwala, Gurdaspur, Amritsar and Hissar, and in the colony areas irrigated by the Lower Chenab Canal, and in the colony and proprietary areas irrigated by the Lower Jhelum Canal. The Kulu sub-division of Kangra is being reassessed by Mr. Coldstream, the Sub-Divisional Officer, while the Dera and Hamirpur tahsils of Kangra and the Una tahsil of Hoshiarpur form a separate settlement charge under Mr. Connolly. Map correction was completed in half and revision of records in one-third of the Kulu sub-division. In the Kangra-Una settlement, where remeasurement has to be carried out nearly everywhere, difficulty has been experienced in enlisting competent local men as patwaris, and service in the hills is unpopular with outsiders, and progress has not been made to the extent anticipated. Another cause of delay was the omission to appoint an Extra Assistant Settlement Officer until June. The work actually done is neat and accurate. In the remaining three tahsils of Hoshiarpur the work of map correction and preparation of jamabandis has been finished in half the villages. In Ferozepore satisfactory progress has been achieved in map correction and record work: except in the riverain villages remeasurement will be unnecessary. In the Gujranwala settlement the rectangular survey of Crown waste has been finished, and killabandi was completed in proprietary villages. The tedious and intricate work of repartition of the villages on the killa system demands close personal attention on the part of the inspecting staff. Record and mapping work is complete in Ludhiana and Gurdaspur and in the areas of the Lower Jhelum Canal and Lower Chenab Canal colonies. In Amritsar map correction is complete in two-thirds of the villages of the Amritsar and Tarn Taran tahsils, and the jamabandis of one-third of the villages in these two tahsils have been completed. Here as in Ferozepore, owing to the excellence of the maps prepared on the square system at last settlement, it is possible greatly to abbreviate the work. The orders of the Financial Commissioner on the Assessment Report of the Fatehabad tahsil of Hissar were passed on 4th October 1910. Mr. Townsend announced the new demand and wound up the operations of this difficult settlement by the end of May 1911. Orders were passed in July on a preliminary report on the assessment of the Waziris of Kulu, Saraj and Rupi, and Sir James Douie visited the settlement in October 1911 in order to help the Sub-Divisional Officer in framing and announcing the new demand for each estate. The preliminary Assessment Report of the Dehra and Hamirpur tahsils was also dealt with by the Financial Commissioner before the close of the calendar year 1911. In Ludhiana the Settlement Officer announced the new demand in the Jagraon tahsil. He also submitted a report on the Ludhiana tahsil which, as the increase involved exceeded the tentative limit for the district adopted at the time of the forecast, had to be referred to the Government of India. Their orders were received in September and the new *jamas* were then announced. The Financial Commissioner passed orders on the Wazirabad Assessment Report in April 1911, and the Gujranwala report was received after the close of the year. In Gurdaspur the new assessments were announced in Batala and Gurdaspur. Mr. Kennaway's Assessment Report of Shakargarh was received in August and orders on it were issued in September 1911. The Pathankot report reached the Financial Commissioner after the close of the year and orders on it were passed before the close of the calendar year. The orders of Government were received on the Assessment Reports of four circles of the Lower Chenab Canal colony in January 1911 and the new demand was announced there before April 1911. The assessment of the remaining part of the Gugera Branch was begun in August 1911. Mr. Rudkin's Assessment Report on the Lower Jhelum Canal was received at the end of August 1911 and is under the consideration of Government.

The rectangular survey of the area to be irrigated by the Lower Bari Doab Canal was begun by Lala Maya Das, an officer of the Survey Department,

with a settlement staff. This staff was largely increased in September 1911 at the desire of the Irrigation Department so as to secure the early completion of the work. Arrangements were made also to carry out similar work in the area to be irrigated by the Upper Jhelum Canal by a settlement staff under the directions of the Settlement Officer, Gujranwala.

Final settlement reports.

11. The final settlement report of Gurgaon was received with the Settlement Commissioner's review in April 1910 and disposed of during the year under report. The final settlement reports of Rohtak and Delhi were received during the year and dealt with,—the former by the end of the year, and the latter shortly after its close. That of Karnal is under the consideration of the Financial Commissioner.

Comparison of estimates and forecasts in regard to duration, cost and results.
Statement No. XIV.

12. The settlement of Kulu, it is anticipated, will be finished in the summer of 1913 and yield an increase of Rs. 25,000 *per annum* and cost somewhat less than the estimate of Rs. 78,000. The settlement of Dehra-Hamirpur and Una, owing to the difficulties referred to in paragraph 10, may take longer and cost more than was anticipated; but the Financial Commissioner has recently issued instructions which he hopes will tend to expedite the work without impairing its accuracy. It is expected that the Hoshiarpur settlement will be completed in the time and at the cost estimated in the forecast. The Ludhiana settlement has now been completed in a little over 3 as compared with the estimate of $3\frac{1}{2}$ years. It was estimated to cost $5\frac{1}{4}$ lakhs and has cost less than 4 lakhs. The increase in land revenue obtained amounts to 4 lakhs. The Settlement Officer is to be congratulated on his energetic and economic conduct of operations. The Ferozepore settlement is at present proceeding swiftly and economically. In Gurdaspur the duration and result of the settlement have worked out exactly as was estimated in 1907 when the forecast was prepared; while the cost of the operations will be 2 lakhs less than was then anticipated. On the Lower Chenab Canal the Settlement Officer's estimated increase of the reassessment operations, concluded in the year under report, is Rs. 16,80,000; but owing to the abolition of holding-to-holding kharaba in the majority of the villages dealt with, the increase is likely to be actually much larger. The only staff employed under the assessing officers in these operations consisted of two Settlement Naib Tahsildars and a clerk. In the Wazirabad-Gujranwala-Sharakpur settlement, while operations are not likely to be more costly than was anticipated, their duration will probably be extended by a year, because, as observed in paragraph 10, the re-arrangement of holdings by killas in the area to be canal-irrigated calls for much patient enquiry and advice on the part of the inspecting officers. The Settlement Officer of Gujranwala has had much of his time taken up with miscellaneous enquiries relating to the irrigation and colonization about to commence in the Upper Chenab Canal area and has now to superintend the rectangular survey of the Upper Jhelum Canal tract in addition to his other duties.

Proposed future settlement operations.

13. The forecast report of the portion of the Shahpur district which lies outside the present irrigation from the Lower Jhelum Canal was sent to the Government of India during the year, and the inception of the settlement has been sanctioned from October 1911. The resettlement of the Sialkot district also formed the subject of report, and settlement operations there began in October 1911. Revision of maps and records prior to settlement proceedings has been carried out in Gujrat, and good progress has been made under Rai Sahib Hira Singh. When the settlement begins there will be little record work for the Settlement Officer to do, except the killabandi of the villages to be irrigated by the Upper Jhelum Canal in the Bar circles, and he will be able to start reassessment at once. Similar preliminaries are to be carried out in Lahore this year under Rai Sahib Hotu Singh. The forecast reports of Gujrat, Lahore and Jullundur will be submitted to Government in the present year.

Settlement staff.

14. At the close of the year 1910-11 the position was in regard to staff that Hissar, Ludhiana, Gurdaspur and the Chenab colonies could be left out of consideration, but that there were six settlements still in the active stage, while the settlements of Sialkot and Shahpur were about to commence. Map revision in Gujrat and Lahore and the rectangular survey of the Lower Bari Doab and Upper Jhelum Canal tracts all required men. Considerable difficulty has been found in the provision of kanungos and patwaris to meet these demands. This difficulty will continue until the rectangular surveys which lie outside the ordinary programme of settlements come to a close in 1912-13. The position has been commented on in the review of the annual working of the Department of Land Records.

Surveys.

15. The riverain detachment of the Survey Department continued the work of traversing and laying down base lines for the 4″ compilation of riverain village boundaries and for the cadastral surveys of riverain estates. Lengths of 435·81 lineal miles of preliminary frame work and 1,737·17 miles minor traverse were run ; 7,940 theodolite stations were fixed along the banks of the rivers Jumna, Sutlej, Beas, Chenab, Jhelum and Indus in the districts of Ambala, Ferozepore, Lahore, Hoshiarpur, Gujranwala, Gujrat, Shahpur, Jhelum and Mianwali, and 456 corners of 88 squares and 64 rectangles were marked with permanent stones on both banks of the Sutlej and the Chenab to serve as base lines for future demarcation of boundaries in the beds of the rivers. Settlement mapping sheets were completed for 259 villages to the number of 2,178 showing the village boundaries, and 21 four-inch sheets were traced during the year and supplied to the Settlement Officers of Gujranwala, Ferozepore and Hoshiarpur ; 12 four-inch sheets of riverain village boundaries were compiled.

The rectangular survey of the area to be commanded by the Lower Bari Doab Canal was begun in February 1911 and temporarily closed in the period from 10th June 1911 to 1st September 1911, when field work in this desert tract became impossible. By the end of the year 4,164 twenty-five-acre rectangles were broken. Nearly 26 per cent. of the work was examined by the Settlement Tahsildar and Naib Tahsildars working under the officer of the Survey of India, and 25 per cent. was checked by an ordinary theodolite traverse allowing a maximum error of one in five hundred.

The total cost of the riverain work was Rs. 26,328 and of the rectangular survey Rs. 47,041.

The rectangular survey of the area to be irrigated by the Upper Chenab Canal is now complete except in a few rakhs in the trans-Ravi portion of the Gugera tahsil of Montgomery. It is anticipated that the Settlement Officer of Gujranwala, will finish the work in this area also in the early part of the cold weather of 1911-12.

In July 1911 the Irrigation Department asked to have the rectangular survey of the area to be irrigated by the Upper Jhelum Canal taken in hand without delay. As the Survey Department were unable to supply staff for the field work of this survey, it was decided to carry out this work on data supplied by the Survey Department by the agency of a settlement staff working under the settlement officer of Gujranwala. The topographical parties continued work in Attock, Shahpur, Gujrat, Sialkot, Delhi, Gurgaon, Mianwali, Lyallpur, Jhang, Montgomery and Lahore. Twenty-one one-inch standard sheets relating to the Punjab were published during the year.

Boundaries.

16. A slight change was made in the boundaries of the province by the transfer of 10 acres belonging to the North-West Frontier Province village of Bakka in the Hazara district from the Marghalla reserved forest of the Rawalpindi district in which this area had been wrongly included.

A slight change was made in the boundaries of the Lyallpur and Montgomery districts with a view to securing the principle that only those proprietary villages of Montgomery should be included in the boundaries of the Lyallpur district which receive irrigation from the Lower Chenab Canal.

An exchange of territory of 75 acres was made between the Maler Kotla State and the Ludhiana district in order to allow for the expansion of the Maler Kotla town of Ahmadgarh in the direction of the Chhapar railway station.

Seventy-seven estates and rakhs of the Bhera tahsil of the Shahpur district were transferred to the Phalia tahsil of the Gujrat district with the double object of lightening the charge of the Deputy Commissioner of Shahpur which had become heavy owing to the development of the deserts of the Jech Doab by irrigation into the Lower Jhelum Canal colony, and of collecting together within the limits of the district of Gujrat all the areas to be irrigated by the new Upper Chenab Canal.

In the district reports forwarded by the Commissioner of Delhi the Financial Commissioner notices two cases of long standing boundary disputes with Native States, one in the Ambala district with the Nahan State and the other in the Gurgaon district with the Alwar State. These should receive early attention.

In Mianwali the boundary dispute with Kohat noticed in last year's report has been settled.

Record-rooms.

17. Accommodation for records is reported to be insufficient in Simla, Gujrat and Dera Ghazi Khan, and in Hissar, where the rooms were re-arranged only last year to admit the records of the recent settlement. The new record-room in Sialkot is approaching completion. But enlarged accommodation is required at once in Ludhiana where the new record-of-rights are still lying in the tahsils, and in Gurdaspur, the latter case being particularly urgent. In both cases administrative sanction for increased accommodation has been received and the work will be taken in hand without delay. Arrangements are being made to prevent leakage in the roofs of record-rooms by means of corrugated iron in Lahore and rubberoid in Rawalpindi.

The Imperial Entomologist was consulted with regard to the ravages of insects among the old records at Gujranwala, and, at his suggestion, naphtaline has been used.

Efforts have been made in Amritsar to expedite the destruction of old records. Similar action might be taken in Ferozepore.

Fees for inspection of records are now taken in stamps which has caused a certain amount of loss to Provincial revenues. The matter is under enquiry.

The copying agency is reported to have worked well throughout the province. The amalgamation and reconstitution of the copying department and copying agency are still delayed, owing to inquiries being necessary in order to determine the amount of compensation which will be claimable by provincial funds if the method of taking copying fees in stamps is introduced.

Other matters.

18. In Karnal nearly 2½ lakhs of Government demands were remitted to the treasury by money order and over a lakh of rupees was remitted in each case from the districts of Gurgaon, Jhang and Gujranwala. Fourteen districts used this method extensively, while in twelve other districts there was a limited resort to this manner of remitting money to meet Government demands. The total sums of land revenue, malikana, occupiers' rate and cesses sent by money order amounted to 14 lakhs of rupees. Some Commissioners and Deputy Commissioners think that a reduction in the charges for money order commission would popularise this system still more and result in a gain rather than a loss to the Postal Department. If the method however became general, the expenses connected with the custody and remittance of treasure from rural post offices might be a serious item; but the Postmaster-General will be consulted on the suggestion.

The system of remittance by currency notes is to be continued experimentally till May 1912 in the Khangah Dogran tahsil of Gujranwala where Rs. 59,120 were remitted by this method during the present year.

19. There is an increase in the suits instituted under section 24 of the Punjab Tenancy Act of 54 as compared with last year. Of the 1,813 cases of this kind instituted during the year, enhancements of rent were granted in 1,416. The districts in which institutions were numerous are Hissar (708), Hoshiarpur (376), Jullundur (175), and Gurdaspur (220). In Hissar and Gurdaspur the numerous institutions are ascribed to the announcements of new jamas and settlement operations. In Jullundur the cause list under this section is always heavy. In Hoshiarpur the cases have decreased by 469, while in Rohtak and Delhi, where the cases were numerous in 1909-10, the position is now, with the close of settlement operations, normal again. Colonel Parsons remarks that these cases tend to become numerous at two periods, that immediately preceding the inception of settlement operations and that immediately succeeding the announcement of the new jamas, and he suggests that Revenue Courts should hold over the cases instituted in the earlier period till reassessments have been announced. The best agency, however, for the disposal of such suits is available when settlement operations are actually in progress, and if landlords prefer to institute their suits at that time, the Financial Commissioner doubts whether it would be either right or advantageous to hold them over. Tenants are sufficiently protected by the provisions of section 24 of the Tenancy Act from a double enhancement.

Enhancement of rent of occupancy tenants.
Statement No. XV.

20. Proceedings relating to the ejectment of tenants with a right of occupancy continue unimportant in the province.

Ejectments.
Statement No. XVI.

In regard to tenants-at-will, a noticeable feature is the marked decrease during the last ten years in the use of all the sections of the Punjab Tenancy Act by which a landlord can proceed towards the ejectment of a tenant-at-will, while the suits by tenants to contest liability to ejectment show an increase. The ravages of plague which have decreased the ranks of the tenant and menial class and the great demand and lucrative prospects for tenants in the new colonies have placed the tenant class in a strong position. Colonel Douglas remarks in regard to Lyallpur: "The position of the tenants is safe. The landlords have no wish to eject them. There are over 70,000 non-occupancy holdings in the district. Ejectment notices were issued only against 135 tenants."

The strong position of tenants and the delicacy with which the landlords have to treat them in order to retain them, when considered in relation to the rise of cash and other rents which has been brought out in the statistics of so many recent reassessments in this province, support the conclusion that agricultural prosperity has in the last decade made steady progress despite the ravages of plague and the increase in the cost of labour.

21. Two jagirs were notified during the year under Punjab Act IV of 1900, both in the Gujrawala district. The declarations of a rule of integral descent were based on written instruments. The approximate value of the jagirs thus notified was Rs. 636-8-0. The total number of jagirs gazetted under the Act is now 130, valued at Rs. 7,80,636-8-0.

Descent of Jagirs Act.

Proposals to notify one other jagir have been received and orders of Government are awaited.

22. On the perennial canals the water-supply was generally sufficient. A small extension of irrigation was made on the Upper Bari Doab Canal to rakh Bhail Bhochoke in the Lahore district and on the Lower Chenab Canal to mauza Kuhl and the adjoining waste in the Lyallpur district. The remodelling of the Massan and Ghazni distributaries of the Lower Jhelum Canal is noted by the Deputy Commissioner of Jhang as having decidedly improved the supply at the tail of those channels. The Sultan Pakhra distributary of the Lower Chenab Canal is said to need improvement and remodelling. Decreases of irrigation generally however were due to good rain and slack demand for

Northern India Canal and Drainage Act.

water on the part of the irrigators. The working of the *nahri parta* rules in connection with extension or decrease of irrigation in the Delhi division is noticed in the district report by the Deputy Commissioner of Gurgaon only and will form the subject of enquiry by the Financial Commissioner. In connection with the Sardah Ganges Feeder Scheme for an extra supply to the Western Jumna Canal the Financial Commissioner was consulted by the Chief Engineer, and Sir James Douie gave his opinion in regard to the income to be expected and the tract to which the extra supply, if secured, should be applied.

The Financial Commissioner notes with satisfaction the steps taken by the Chief Engineer to rent from landowners near Indri on the Western Jumna Canal areas damaged by water-logging and the measures proposed for their improvement under the management of the Irrigation Department by silt filling and drainage. The question of water-logging and reduction of rabi supplies on the Lower Chenab Canal and Lower Jhelum Canal was considered exhaustively by Revenue and Irrigation officers during the year, and the recommendations of the Financial Commissioner have been submitted to Government. Water-logging on the Upper Bari Doab Canal in the vicinity of Amritsar also formed the subject of enquiry, and a preliminary step towards securing a better drainage is being taken by the temporary acquisition and improvement of the bed of the Hudiara Nala. It has become of late an increasingly pressing problem of revenue administration that the great perennial canal system of the Punjab involves damage to the fertility of the soil and the health of the people in localities where large bodies of water have to be carried through a country in which spring water levels are near the surface or the khadir land is close to the canal. The remedy most to be desired would appear to be the lining of large branches to prevent percolation.

The policy of the abolition of the holding-to-holding kharaba system of remission for crop failure in the canal colonies is being carried out, and measures are also under consideration for reducing the staff of revenue patwaris where the assessments are made by the canal staff. The question of the changes in the so-called "haq" rules on the Upper Bari Doab Canal, which were meant to limit the water-supply of a village to the equivalent of the quantity received at the last settlement, has been referred by the Financial Commissioner to Government.

The inundation canals in the Central and Western Punjab, with the exception of the Indus Canals in the Dera Ghazi Khan district and the Lower Sutlej Series in Multan, gave a lower return of irrigation owing to low floods, and on the Indus Canals there was a very large proportion of crop failure owing to failure of water at a critical time. The working of the kharaba remissions and the checks on fluctuating assessments on these canals are receiving attention. The Financial Commissioner has under his consideration the propriety of undertaking the quinquennial revision of the occupiers' rates in the Dera Ghazi Khan district and of notifying rates for the new irrigation from the Talai Canal system in the southern part of that district. Irrigation should now have become more profitable there by the opening of the new railway to Chachran.

Minor Canals Act.

23. During the year the Changarwan Canal in the Dasuya tahsil of Hoshiarpur was included under schedule II of the Minor Canals Act.

A rate of Re. 0-8-0 per acre for grass grown with canal water from the Kitchin Canals in Montgomery was notified in Punjab Government notification No. 98 of 26th May 1911.

• Working of Minor Canals and Irrigation Works.

24. The satisfactory working of the Najafgarh drain under the Deputy Commissioner of Delhi has been brought to the notice of Government. The Rangoi Canal has now been transferred from the Irrigation Department to the District Board of Hissar. Government have been addressed in regard to the

obligation of the Alwar Darbar to take measures to secure to the Gurgaon villages in the Firozpur tahsil their proper share of the floods passing down the Landoha stream. The working of the bunds in Gurgaon and the Sarusti Canal in Karnal was satisfactory.

The case of the Shahnahr Canal in Hoshiarpur is being taken up, and a survey as a basis for remodelling and improvement is being carried out by an officer of the Irrigation Department.

The working of the Grey Canals during the year can scarcely be regarded as entirely satisfactory, but the Financial Commissioner reserves his opinion on the subject until he has had an opportunity of seeing the canal system during the present cold weather. The question of their improvement is complicated by their possible eventual absorption in the Harike Weir project. This latter project also affects the eventual destinies of the Kitchin Canal system on the other bank of the Sutlej. The state of the Kitchin Bund Canals has during the year formed the subject of a special reference to Government. Remodelling and alterations are being carried out which may result in a temporary renewal at any rate of the extensive irrigation done by the canal in the past.

The experiment was made in Muzaffargarh, for the first time, it is said, in the history of that district, of running an inundation canal through the cold weather. From the Deputy Commissioner's remarks it appears that owing to apprehensions of water-logging the experiment is not likely to be repeated. He will be asked to notice the subject further in the next report.

25. Nearly 7,000 acres were acquired for public purposes during the year, of which some 3,200 acres were for railway extensions, 3120 for canals, 43 for roads and 635 for buildings and miscellaneous works.

Land Acquisition Act. Statement No. XVIII.

In Hissar 1,663 acres were acquired for the new railway from Jakhal to Hissar, and 1,038 acres in Multan for the Sutlej Valley Railway, the Lyallpur-Khanewal and Khanewal-Lodhran extensions, and for the enlargement of the station yard at Khanewal. In Gujranwala 652 acres were taken up for the new canals and 1,061 in Multan for the Lower Bari Doab, Lower Sutlej and Inundation Canals. In Dera Ghazi Khan 553 acres were acquired for the remodelling and extension of inundation canals and 267 acres for the new city at Chorutta.

Deputy Commissioners were instructed to exclude from calculation the price paid for buildings or trees in estimating the number of years' purchase of the land revenue represented by the piece of land acquired. These instructions have not been complied with in all cases, but it is possible to gather a fair idea of the incidence of land revenue from the figures now given. The Deputy Commissioner of Ambala remarks that it is an established fact that the land revenue assessed in his district is no longer a real guide for the valuation of the land. The Commissioner of Lahore comments on the volume of work under the Land Acquisition Act which the Deputy Commissioner of Lahore has to deal with annually. "Distribution," he remarks, "is a most onerous and difficult task, entailing minute attention, complicated statements and careful receipts." He recommends that a special Land Acquisition Officer should be permanently attached to the Lahore district. Such an officer has always been provided by Government in any district in which land acquisition work has been heavy, and provision has been made in this way for Lahore in the past. It is not to be assumed that the work of acquiring land in this district will always need a special officer. Only 106·64 acres were so acquired in the year under report. The rise in the value of agricultural land is a commonplace of Punjab economics, but the enormous prices paid for urban and suburban sites are a phenomenon of no less importance. The Financial Commissioner doubts whether Settlement Officers take sufficient cognizance of such developments when submitting their proposals for assessment circles containing urban areas.

26. The account of the Local Government with agriculturist borrowers (Statement XX) shows that loans under the Land Improvement Loans Act and the Agriculturists' Loans Act, the principal of which amounted to nearly 19 lakhs, were outstanding in September 1910. Some 3¼ lakhs were advanced under both Acts during the year, making a total outstanding of some 22¼ lakhs. Collections together with some small remissions amounted to 5¼ lakhs, leaving the outstanding balance nearly 17 lakhs, against nearly 26 lakhs on 1st October 1909. Interest on the outstanding under both Acts due for collection within the year was about 1¼ lakh, all of which with the exception of Rs. 4,200 was recovered during the year. The profit to the Provincial Government representing the difference between the rate of interest (3½ per cent.) charged on mean outstandings by the Government of India to the Punjab Government and the rate of interest charged by the Punjab Government to the agriculturist borrowers (6¼ per cent.) was Rs. 31,686.

Loans Acts.
Statements Nos. XVII, XVIII, XIX, XX, XXI, and XXII.

The total of advances made during the year under both Acts hardly exceeded that of 1909-10, when, as was noted in last year's report, advances were with one exception less than in any of the preceding five years.

Rupees 1,45,262 were advanced under the Land Improvement Loans Act, of which Multan took Rs. 26,547, Attock Rs. 22,920, Montgomery Rs. 18,502, Gurgaon Rs. 16,905 and Muzaffargarh Rs. 11,450. No advances were made in Delhi, Karnal, Hoshiarpur, Lyallpur or Jhang. In Multan, Montgomery and Muzaffargarh the advances are taken for sinking wells; in Attock and Gurgaon for the construction both of wells and embankments. In Multan the borrowers appear to be dilatory in executing the works for which the loans are made, and recoveries of the loan in full have very properly been made. Works are reported to have been systematically inspected. Under the Agriculturists' Loans Act Rs. 1,89,466 were advanced; Sialkot being responsible for Rs. 48,556, Mianwali and Muzaffargarh some Rs. 31,200 each, Montgomery Rs. 24,915, and Dera Ghazi Khan Rs. 16,478. No advances were made in Hissar, Rohtak, Delhi, Hoshiarpur, Jullundur, Lyallpur or Jhang. The large figures for Sialkot are due to the loss of cattle through disease, and to the failure of the kharif crop of 1911, to meet which timely advances for fodder were arranged.

27. The Deputy Commissioner of Rawalpindi gives a favourable account of the working of the rule regarding Government trees growing on private or common lands in tahsil Murree and a portion of tahsil Kahuta which were sanctioned by the Punjab Government in March 1909. Two retired Subedars and one Jamadar and a pensioned Inspector of Police have been associated in the management and protection of these trees, and it is satisfactory to learn that they have administered their charges with success and have secured the confidence of both the officials and the people.

Forest Act.
Statement No. XXIII.

The preparation of a record for certain jagir forests in Kangra is proceeding under the Settlement Officer. The suitability of the present system of forest conservancy in Kangra has been questioned by the Forest Department in consequence of the opinion expressed by Mr. Fisher, Conservator of Forests, that protected forests in Kangra, both demarcated and undemarcated (outside the Kulu sub-division), are suffering a rapid deterioration. The cause he considered to be excessive grazing, and the remedy which he suggested was an amendment of section 29 (*b*) of the Forest Act. A note by Sir James Douie in which he has indicated the main lines of enquiry in connection with the question of the existence of serious deterioration and of its cause and cure, if it is found to exist, has been sent for report to the Commissioner of Jullundur and the Deputy Commissioner and Settlement Officer of Kangra. Mr. Diack has had an opportunity of enquiring into the position with the local District and Forest Officers in a recent tour in the Dehra and Hamirpur tahsils, and when he has been able to see some of the forests in the remaining tahsils and to consult the Conservator, he will address Government on the situation.

Government lands. Statement No. XXIII.

28. In the Multan district the village contract assessment of tirni expired in October 1910. Fresh assessments were sanctioned by the Financial Commissioner amounting to Rs. 19,333—an increase of Rs. 2,528 over the previous quinquennial assessment. A sum of Rs. 12,389 out of this is assessed for five years on villages using grazing grounds outside the Lower Bari Doab Canal irrigation boundary. The balance, Rs. 6,944, is assessed on villages using grazing situated inside this boundary and is subject to reconsideration after three years, *i.e.*, in October 1913. The camel tirni was fixed at Rs. 15,000—a decrease of Rs. 2,399 from the previous figures due to a large decrease in the number of camels. The arrangements for cattle grazing are not likely to be disturbed if the recommendations of the Camel Browsing Committee in regard to the provision of browsing for the 54th and 57th Camel Corps in Multan are adopted, because it is likely that cattle will continue to be admitted by the Commandants of the corps to those parts of the rakhs under their charge which are not closed for rotation or regeneration purposes. The rules suggested by the committee to regulate financial arrangements secure that the Punjab Government will not lose the income previously obtained from cattle grazing in such rakhs. The auction of leases on the chak system in Multan for two years took place and resulted in a total increase of Rs. 730 over the last biennial bids.

In rakhs Kotla Isan and Shikarpur in the Dera Ghazi Khan district which had been handed over to the Deputy Commissioner for management some leases for cultivation were given out. The rakhs in this part of the Dera Ghazi Khan district were formerly worked at a loss by the Forest Department owing to their great distance from a timber market, the absence of any local demand for wood and the inaccessibility of the rakhs themselves for purposes of inspection and management ; but the opening of the railway to Chachran has altered the situation and increased the value of the wood crop and a departure from the policy of abandoning these rakhs to cultivation, and a return of the system of forest management is under consideration.

Punjab Land Preservation (Chos) Act.

29. With a view to confining the destructive action of the torrents in Ambala a further grant of Rs. 1,000 was made to the Deputy Commissioner of Ambala in the present financial year. The grant of Rs. 2,000, made last year, was only allotted in August, and the Deputy Commissioner was unable to spend more than Rs. 335 before the close of the year. In spite of the limited period of last year's operations, 5,185 bighas of land were partially reclaimed by planting grass. Operations this year are confined to the Rupar sub-division, and the grant will be spent in further planting and in rewards to those who erect protective works.

Under section 8 (1) of the Act a notification has been issued in the case of seven villages affected by the Dada Cho in Hoshiarpur directing persons possessing proprietary or occupancy rights in the bed of the cho to take measures within three years, to secure the regulation of the flow of water within and the prevention of extension of the bed of the cho and the protection and reclamation of land within it by planting *kharkhana* grass and trees in the bed of the cho in places demarcated by the Deputy Commissioner. The notification issued in September and in spite of the difficulties of the limited application of the section itself and the apathy of a number of the persons concerned which is noted by Colonel Barton, it is hoped that the experiment may begin to show results next year.

An area of 3,083 acres was acquired in perpetuity under section 8 (2) of the Act in 31 villages affected by the Mahli Cho. It was decided to spend Rs. 10,000 this year in planting *kharkhana* grass and trees and building ten masonry dams. The Deputy Commissioner has asked for the benefit of further professional advice : and while the Financial Commissioner agrees with the Commissioner (Mr. Fagan) in deprecating the introduction of much professional technicality into cho reclamation, he has on the Commissioner's recommendation asked the Irrigation Department to depute a competent sub-overseer for six months to advise the Deputy Commissioner. The object is to fix upon

an approximate bed gradient to work to, which will enable the operations to be conducted towards securing a minimum width of bed. The land, when reclaimed, is to be handed back to the people at the price of reclamation, and accounts have to be kept to enable the eventual expenditure to be distributed over the sections of the bed in each estate. From every point of view accordingly it is desirable not to delay the work and to keep expenditure down as low as is compatible with efficiency.

Mr. Diack has had an opportunity of observing the re-afforestation of cho catchment areas in a recent tour. He considers the progress made considerable and the eventual prospects hopeful.

General statement of owned and mortgaged land. Statement No. III.

30. The decrease of 35 shown in the number of villages in the province is due to errors in the figures of last year in some districts and to diluvion and to amalgamation of villages in others. The differences in the area totals in the statement are due to the fact that the instructions for its preparation issued somewhat late in 1910 and it was not possible to comply with them in every case in the statement for 1909-10, *e.g.*, in Lyallpur no shamilat, abadi and Government property figures appeared in the 1909-10 returns. Omitting village common and Government lands, 3,523,685 persons hold 39,489,388 acres of land in 3,082,348 holdings. Seven acres in each holding on the average are cultivated and the average assessment per cultivated acre is Re. 1-1-9. One-sixth of the total owned area is owned by persons who are not members of an agricultural tribe and five-sixths by members of the notified tribes. Only 11 per cent. of the cultivated area is under mortgage, the proportion between the property of the notified tribes and the property of others which is under mortgage is much the same as last year. The percentage of the total cultivated area mortgaged is heaviest in Sialkot and Gurdaspur, and omitting Lyallpur, where conditions are abnormal, lightest in Rawalpindi, Montgomery and Hissar.

Transfers. Statement No. XXIV.

31. The area involved in the gifts made in the year under report does not differ materially from that of the previous year. Exchanges are unimportant because the differences in the figures, as was explained in the report of last year, are generally due to regrants of Government land in the Canal colonies or to adjustments made in the course of killabandi operations. The number of mortgages was 97,877 as compared with 112,061 in the previous year. Last year a cultivated acre of mortgaged land represented a value secured of Rs. 95 per acre. In the present year the mortgage money secured per acre is Rs. 101. The area sold is less than last year ; but the price obtained per cultivated acre has risen from Rs. 115 to Rs. 124. A column has now been added in Statement No. XXIV to show the multiple of the land revenue which the sale money represents. The multiple is large in all districts except Delhi and Gurgaon, where it is 39 and 42, respectively, indicating that the purchaser expecting a 5 per cent. return on the purchase money estimates the rent to be three times the land revenue in these two districts. Omitting Lahore and Simla, where sales of urban property influence the results, the figures indicate an extreme lightness of demand in the districts of Hoshiarpur, Jullundur, Ludhiana, Ferozepore, Amritsar and in all the districts of the Rawalpindi and Multan divisions.

Abstract of transfers. Statements Nos. XXVI and XXVII.

32. Statements XXVI and XXVII relate to sales of agricultural land held in proprietary right only. As regards sales, an owner now can expect to get Rs. 129 per cultivated acre for agricultural land, and on the average the price he receives per acre is 123 times the land revenue assessed thereon, which shows the purchaser's estimate of the net income from land to be seven times the land revenue. Owners of agricultural tribes gained some 8,000 odd acres on sales. The total cultivated area under usufructuary mortgage by owners was somewhat less than last year, and the area released from mortgage exceeded the area newly mortgaged.

There is a steady increase in the value of land for the purpose of mortgage. Though owners in agricultural tribes mortgaged 25,000 acres more than was mortgaged to them, the area redeemed by them exceeded the area mortgaged by them by 47,000 acres.

Notification of tribes under the Land Alienation Act.

33. Several additions were made to the list of agricultural tribes during the year. The Gaur Brahmins of Hissar, excluding tahsil Sirsa, were included in the Gaur Brahmin group in the Delhi division referred to in paragraph 29 of last year's report. The Koreshi Sheikhs of Hoshiarpur were included in the general group of agricultural tribes in the Hoshiarpur district. Bodlas, Mahtams and Kharrals were added to the Gujranwala district group of agricultural tribes owing to the transfer to that district of the Sharakpur tahsil of Lahore where they were already gazetted as an agricultural tribe. Mazhabi Sikhs were notified as an agricultural tribe in a separate group in each of the districts of Lyallpur and Gujranwala.

Applications from the Harnis of Ludhiana, the Suds of Hoshiarpur, and the Bairagis of the Karnal and Delhi districts to be notified as agricultural tribes were refused after an investigation of their claims.

Several other applications for inclusion among the notified agricultural tribes are under investigation or consideration.

Rules and orders.

34. The instructions in regard to the cases in which sanction to sale by members of an agricultural tribe may be given have been amplified by directions published as a correction slip to paragraph 37 of the Land Administration Manual. Deputy Commissioners have been directed not to withhold sanction in cases where the *bonâ fide* object of the purchase is to obtain a site for a workshop or a factory or a building site close to a town or village, if they are satisfied that the intention is not merely to evade the Act. It is not the intention of the Act to offer any obstacle to legitimate desire for commercial development.

Evasions

35. The question of *benami* transactions and other evasions of the Act is being carefully watched by the Financial Commissioner. These transactions have received ample notice in the district reports: but in the absence of a detailed study of the cases alluded to by Deputy Commissioners it is difficult to say whether all the cases actually quoted were in effect attempts to evade the Act. *Benami* transactions and evasions are reported to have come to light in the districts of Rohtak, Ambala, Kangra, Amritsar, Sialkot, Gujranwala, Gujrat, Jhelum, Rawalpindi, Attock, Mianwali and Muzaffargarh. A case quoted in the Amritsar district report shows how insecure the position of the real mortgagee is in the *benami* transaction, as in the case in question the puppet put in possession by the real mortgagee colluded with the mortgagor in denying the claims of the mortgagee to the profits from the land. One case of exchange of land quoted in the Rohtak report was undoubtedly an instance of evasion, and mutation was rightly refused. The two cases reported from Muzaffargarh were brought to notice in the public press. In neither were the provisions of section 21-A of Act XIII of 1900 observed by the Civil Court; and one of the cases rested on a receipt which was alleged to have been given to the plaintiff when he was a statutory agriculturist, but which is believed to be a forgery because the stamp upon it was a unified postage and revenue stamp issued subsequent to the date of the supposed transaction.

The efforts of tribes to get themselves recorded by designations other than those which they have formerly adopted in the revenue papers still continue, and instances are quoted in the district reports of Delhi, Rohtak and Dera Ghazi Khan.

Working of the Act. Statement No. XXV.

36. Out of 279,124 acres mortgaged, 236,510 acres were mortgaged by agricultural tribes and 42,614 acres by others, while 210,686 acres were mortgaged to agricultural tribes and 68,438 acres to others. The loss by agricultural tribes on these mortgages was 25,824

acres. However, in sales the agricultural tribes bought 14,220 acres more land than they sold. The agricultural tribes also redeemed from mortgage 284,085 acres of their property which had been mortgaged. The area redeemed by them exceeded by 20,373 acres the area redeemed from them; so the item of 20,373 acres represents gain in redemptions by agricultural tribes from others. The result of all transactions taken together is a gain of 8,769 acres to agricultural tribes, while it must be remembered that much of the mortgage by agricultural tribes to others is now for a limited period only.

The following figures are interesting; they include transfers of occupancy rights and superior ownership as well as transfers of ordinary proprietary rights :—

	Acres.
(*a*) Average area sold for three years before the Act came into force	398,672
Area sold in present year	133,270
(*b*) Average area mortgaged for three years before the Act came into force	603,894
Area mortgaged in present year	279,252
(*c*) Average area redeemed in the three years before the Act came into force	412,813
Area redeemed in present year	395,418

The area sold was three times what it is now, the area mortgaged was more than twice as large as now, but the area being redeemed in spite of decrease in new mortgages falls little short of the area then being redeemed. The Act appears to be fulfilling its purpose.

37. Except in regard to the head of "Revenue Officers' cases under the Land Alienation Act," the original work done was less under every head than last year, while 2,117 cases more than last year were pending at the end of the year.

Business returns.
Statement Nos. XXVIII and XXIX.

The new institutions in appellate and revisional work amounted to 4,424 as compared with 4,374 last year: 4,459 cases were decided during the year, leaving a pending file of 626, that is, of 156 less cases than at the close of the previous year.

In regard to original cases, the pending file is heavy in Kangra, Hoshiarpur, Ferozepore, Sialkot, Gujrat and Multan. In Kangra, Ferozepore and Gujrat the total number of revenue cases disposed of was less than 6,000, and probably more work should have been done. In Hoshiarpur, Sialkot and Multan the disposals were over 6,000 in each instance and the work was kept up to date. Land Alienation Act cases continue to be numerous in the Rawalpindi district.

Twelve per cent. of revenue judicial appeals and revisions and 13 per cent. of revenue executive appeals and revisions resulted in decrees in favour of the appellants.

38. The returns for touring done by the Commissioners are for the financial year 1910-11—

Tours of Commissioners.

Delhi.—The Hon'ble Mr. A. Meredith held charge for 106 days, the Hon'ble Mr. Fenton for 30 days, and Lieutenant-Colonel C. M. Dallas for 229 days. The last-named officer spent 2 months and 11 days on tour.

Jullundur.—Lieutenant-Colonel H. S. P. Davies was Commissioner for 265 days and spent 56 days on tour. Mr. R. Sykes held charge for 100 days and spent 35 days on tour.

Lahore.—The Hon'ble Lieutenant-Colonel C. G. Parsons was Commissioner for the whole year and spent 122 days on tour.

Rawalpindi.—Mr. P. J. Fagan was Commissioner for the whole year and spent 143 days on tour.

Multan.—Mr. H. J. Maynard was Commissioner for the whole year and spent 101 days on tour.

APPENDIX.

STATEMENTS.

No.

I.—Analysis of chief statistics.
II.—Cultivating occupancy of land.
III.—Owned and mortgaged land.
IV.—Incidence of revenue.
V.—Fixed land revenue (including service commutation and tribute) demand, collections and balances.
VI.—Amount of land revenue held under suspension.
VII.—Alterations in the fixed land revenue demand.
VIII.—Collections and balances of fluctuating and other revenue.
IX.—Alluvion, diluvion and destructive inundation.
X.—Land revenue assignments.
XI.—Coercive processes for collection of land revenue.
XII.—Progress made in re-measurement and attestation.
XII A.— Ditto ditto.
XIII.—Progress made in re-measurement.
XIV.—Duration and cost of settlement operations.
XV.—Enhancement or reduction of cash rents.
XVI.—Ejectment proceedings under the Tenancy Act.
XVII.—Disbursements, collections and outstandings on account of Act XIX of 1883.
XVIII.— Ditto ditto ditto Act XII of 1884.
XIX.—Remission orders and certificates of exemption.
XX.—Account of Local Government with agriculturist borrowers.
XXI.—Loans made under the Land Improvement and Agriculturists' Loans Acts.
XXII.—Result of loan operations to Local Government.
XXIII.—Area and income of unclassed forests and of other Government lands.
XXIV.—Sales, mortgages, redemptions and other transfers.
XXV.—Abstract of mortgages, sales and redemptions.
XXVI.—Sales of land.
XXVII.—Mortgages of land.
XXVIII.—Work done by Revenue Officers.
XXIX.—Appellate and revisional work of Commissioners and Financial Commissioners.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Department of Revenue and Agriculture (Revenue), No. 42, dated 27th March 1913.

READ—

The annual report on the Land Revenue Administration of the Punjab for the year ending 30th September 1912, forwarded with letter No 181, dated the 27th February 1913, from the Junior Secretary to the Financial Commissioners, Punjab.

REMARKS.—

The report deals with the last year of the quinquennial period ending the 30th September 1912, and the statistics which have been brought up to date indicate a general and satisfactory progress during that period. There has been no appreciable change in the cultivated area. The falling-off in the sailab area is considerable, but this is mainly due to a decrease of 469,995 acres in Dera Ghazi Khan, for which the vagaries of the Indus are probably responsible, but the matter requires further investigation. The decrease in both masonry and temporary wells in work is of minor importance, as it is fully counterbalanced and accounted for by the increase of the canal-irrigated area by 129,488 acres and the barani area by 565,618 acres. The rainfall in the rabi was good, so it was not necessary to work the wells. The extension of canal irrigation has led to an increase of over 39 lakhs in fluctuating revenue, while the fixed revenue roll has also risen by over 8 lakhs, the total increase amounting to over 48½ lakhs.

The increase of the incidence from the reassessments during the quinquennium from Re. 1-0 2 per acre of cultivation to Re. 1-3-0 is by no means excessive in view of the high prices that have prevailed and the gradual substitution of a fluctuating for a fixed demand. The districts which have been under settlement during the period include many of the richest tracts in the province, so the work, though unusually heavy and involving much anxious thought on the part of all concerned, has been specially remunerative to Government.

2. Agricultural conditions during the year were average, as an excellent rabi made up for a short kharif. The early burst of the monsoon promised to make up for the drought of April and May and the short kharif sowings, but its subsequent failure resulted in a kharif harvest well below the average. Prospects improved again with good autumn and winter rains, and there was every hope of a bumper rabi harvest throughout the province. These expectations were to some extent realised as the crop was on an average a good 18-anna one, and in some parts a record one, but the extensive failure of the kharif harvest was not altogether counterbalanced, and the total matured area was 2,000,000 acres below the normal. Fodder also was very scarce even in canal-irrigated districts.

3. In spite of the partial failure of the rains, however, the collections of revenue were extremely good, and the Lieutenant-Governor agrees that a recovery of 97·2 per cent. of the current demand was satisfactory in view of the circumstances of the year. Of the 13¾ lakhs suspended in the kharif harvest, 10½ lakhs were recovered at the rabi, and the balance remaining under suspension at the end of the year amounted to a little over 5 lakhs only. The recovery of over 2 lakhs of last year's outstanding balance is also satisfactory. That the collections have not been unnecessarily severe is indicated by the voluntary payments in excess of the demand which occurred in the Rawalpindi division, which is for the most part a barani tract.

4. The fluctuating land revenue demand has undergone a further increase of 16 lakhs as compared with the previous year and now stands at 87 lakhs. The reassessment of the canal colonies is almost entirely responsible for the increase, which in Lyallpur alone amounts to 10 lakhs. The Lieutenant-Governor has read with interest the Financial Commissioner's remarks on the general working of fluctuating assessments, and is glad to observe that at last owing to the special attention directed to the matter in most districts the Settlement

Officer's estimates have been reached or exceeded. He agrees with the Financial Commissioner that on the whole the results are now not unsatisfactory, but is still inclined to doubt whether the remarkable divergences from the estimates in Montgomery and Hissar are fully accounted for. His Honour would still point out that it is quite unreasonable that the average of a fluctuating assessment at present prices now in Mianwali, to take one instance, should be less than an admittedly very lenient assessment imposed by Mr. Thorburn over 40 years ago. These fluctuating assessments require most careful watching by Collectors if Government is not to be defrauded by collusion between the subordinate revenue staff and cultivators.

An interesting feature of the year is the enormous rise under the head of 'Other land revenue,' due almost entirely to the sales of proprietary rights in the Chenab Colony, which account for 61 lakhs. The completion of the various colony towns is responsible for the lack of any receipts under 'Sale of Town-sites.'

5. It is gratifying to learn that in spite of the excellent collection of revenue there was a considerable decrease in the number of coercive processes issued. Amritsar is again prominent for the large number of processes issued for lambardars; but, as there was only one execution though 917 processes issued, the lambardars would appear to have been unduly apprehensive. His Honour is glad to observe that there were very few cases in which it was necessary to resort to imprisonment of lambardars or to the sale of their movable property. Revenue-payers are rapidly appreciating the system of remitting their land revenue by money order, the amount so paid in having increased by 5½ lakhs. In view of the growth of the popularity of the system and the undoubted convenience which results to the revenue-payer, His Honour does not consider that it is necessary to attempt to obtain any reduction in the money order fee. The system adopted in Jullundur and Ludhiana of requiring lambardars to pay their instalments in batches is convenient to the tahsil officials, but it is doubtful whether it can ever be successfully enforced, as it entails extra journeys to the tahsils for the lambardars who pay in their revenue personally.

6. Settlements are in process principally in the central Punjab. The Ludhiana and Gurdaspur settlements have been finished, and good progress has been made in Hoshiarpur, Amritsar, Ferozepore and Kulu. In Sialkot and Gujranwala considerable delay has been caused by the heavy partition work and killabandi operations. It is hoped that in the former district the settlement will be completed in the due time, but in Gujranwala the estimate has already been exceeded. The despatch and economy with which the Kulu settlement is being conducted deserve commendation. The large increases expected from the assessments in Lyallpur and the Lower Jhelum Colony are fully justified by the prosperity of those tracts and by the fact that the first assessment now under revision was tentative and largely nominal.

7. The Survey Department has been continuing to give valuable assistance in measurement operations. Their work has been chiefly confined to the riverain areas and the rectangular surveys of the areas commanded by the Upper Jhelum Canal and the Lower Bari Doab Canal both of which are now complete. Thirty-seven 1-inch standard sheets were published. There have been no important alterations in boundaries during the year.

8. There has been a satisfactory decrease in litigation, the total number of revenue cases being 161,661 as against 163,532 last year; and, though the outturn of cases is smaller than that of last year owing to fewer revenue officers being employed, work both original and appellate is well in hand. Relations between landlord and tenant may be considered remarkably satisfactory for so litigious a province Owing to the demand for cultivators in the canal colonies, the tenants in the old districts are in a strong position, and it is only in Hoshiarpur and Jullundur that institutions of cases for enhancement of rent have been heavy. That landlords for the most part are not over exacting is proved by the fact that out of 1,666 applications, enhancements were decreed

in 1,314 cases. Ejectment cases have fallen off considerably in districts where the settlement has been completed, and risen where it is impending. Applications were successful in about half of the cases instituted. The prominence of Hoshiarpur in connection with litigation between landlord and tenant has been noticed in previous years, and is possibly explained by the small size of proprietary holdings in that district and the increasing pressure of population.

9. It is gratifying to find that the working of the canals has been so effective, and that they were usually able to meet successfully the great demand for water, and to irrigate an area of 57,000 acres more than in last year. Complaints of imperfection in the supply and distribution still exist, but it is only to be expected that, in a dry year when the demand exceeds the supply, and when errors in distribution become particularly noticeable, cultivators will not be fully satisfied. His Honour is glad to hear that attention is being paid to the question of rotational closures in the spring, though it is doubtful whether these can ever be arranged so as to give no cause for complaint. Experiments for the prevention of water-logging on the Western Jumna still continue.

Judged by the harvests ripened and the area cropped, which are the real tests, the operation of the canals is very satisfactory and is steadily improving under the attention that is being paid to it by all concerned.

The inundation canals ran satisfactorily, on the whole, though owing to the poor rainfall they began to flow late and closed early. There is considerable room for improvement on the Lower Sutlej Canals, where the percentage of 'kharaba' still appears to be unduly high.

Minor canals and irrigation works also did well for the most part, though the decrease in the area watered by the Grey Canals is disappointing. His Honour notes with satisfaction that an enquiry is being made into the working of these canals, and also that a new scheme has been prepared for the improvement of the Shah Nahr, which will, it is hoped, result in a large increase of irrigation and also check the damage at present done by swamping in places.

10. Considerable attention has been paid to reclamation works and to the checking of the denudation of the lower hills in the Siwaliks. In Hoshiarpur it has been found that the stone bunds erected are unable to withstand the terrific force of the flood in the Maili Cho, and it has recently been decided to abandon the old system of constructing bunds in the bed of the Cho. The Lieutenant-Governor agrees with the Financial Commissioners that the subject is one of great importance, and that a forest expert should be placed in charge of reboisement operations in the Siwaliks. To this end, the co-operation of the Patiala and Nalagarh Darbars has been invited. The reply of the former has only recently reached Government, and some time must necessarily elapse before a comprehensive scheme can be worked out and operations commenced.

11. Advances under the Loans Acts have risen considerably, as is natural in such a dry year, but recoveries were good. The progress made by co-operative societies undoubtedly tends to reduce the need for takavi, but in a year of scarcity it may so happen that societies themselves, especially when in their infancy, need Government assistance. As the law stands at present, however, loans cannot be granted to societies, and the Lieutenant-Governor has recently asked for a report from the Financial Commissioner as to whether any practical inconvenience has resulted from this and whether any amendment of the Act is called for.

His Honour is glad to observe that better progress has been made during the year in extending the rule of primogeniture to the jagirs of the province, though out of a total of 29½ lakhs assigned, jagirs amounting to 8 lakhs only have as yet come under the Descent of Jagirs Act of 1900. The question of delegation of powers to approve successions has been considered, but Sir Louis Dane is of the opinion that no immediate action is necessary.

12. The transfer statistics again afford ample evidence of the growing value of land. The sale price of land dropped from Rs. 124 per acre of cultivated land to Rs. 119, but the number of sales was greater than in any year since 1900-01, and the area sold exceeded the quinquennial average by 13 per cent. In spite of this, however, the price was higher than the quinquennial average by Rs. 9 per acre of cultivated land. Still better testimony of the value of land and the general prosperity of the province is provided by the mortgage figures. Though the failure of the kharif and the consequent acute scarcity of fodder would naturally be expected to lead to a decrease in the mortgage price, it has again risen from Rs. 101 to Rs. 106 per acre. The variations in the multiple of land revenue in districts are extraordinary, and the Lieutenant-Governor agrees that if District Officers are able to explain the cause of the differences, the information to be obtained from these statistics should be most valuable.

Agricultural tribes have continued to hold their own, in spite of heavy sales, and the area now held by members of non-agricultural tribes is only one-seventh of the total. A few additions have been made to the list of agricultural tribes to include tribes whose claim to that title has been fully proved. Those that are not notified continue to make every effort to obtain the privilege. The Financial Commissioners' remarks on this subject are most interesting and instructive. The Act continues to work well, though fresh methods of evasion are brought to light every year. The Lieutenant-Governor is satisfied, however, that transactions are carefully scrutinized by District Officers, and that attempts to evade the provisions of the Act are usually discovered.

13. Sir Louis Dane desires to thank the Financial Commissioners for their interesting report and able administration of the Revenue Department of the province generally. His acknowledgments are also due to all District Officers for the manner in which they discharged their duties during the year and for the high level of administration which they have maintained during his term of office. A firm, yet sympathetic, revenue system is the best in the interests both of the owners and of Government, and, though at times he has been constrained to indicate temporary defects, Sir Louis Dane believes that such a system—thanks to the loyalty and hard work of the District Officers—has now been effectively secured in the Punjab.

ORDER.—Ordered that the above remarks be printed and circulated with the report; that they be published in the *Punjab Gazette*, communicated to the Financial Commissioners, Punjab, and forwarded to the Government of India, Department of Revenue and Agriculture, with the usual number of spare copies.

Ordered also that a copy of the report and of the above review be forwarded to the Surveyor-General with reference to paragraph 7.

By order of His Honour the Lieutenant-Governor of the Punjab,

H. P. TOLLINTON,

Revenue Secretary to Government, Punjab.

Punjab Government Press, Lahore—27-3-13—3214—370—K. C. M.

No. 181.

FINANCIAL COMMISSIONERS' OFFICE :

Dated LAHORE, 27th February 1913.

FROM

H. A. SMITH, ESQUIRE,

Junior Secretary to the Financial Commissioners,

Punjab,

To

THE HON'BLE MR. C. A. BARRON, C.I.E., I.C.S.,

Chief Secretary to Government, Punjab.

The Hon'ble Mr. A. H. Diack, C. V. O.
The Hon'ble Mr. M. W. Fenton, C.S.I.

SIR,

I AM directed to submit the Annual Report on the Land Revenue Administration of the Punjab for the year ending the 30th September 1912.

2. The office of First Financial Commissioner was held from 1st October 1911 to 5th November 1911 by Sir James Douie and from 6th November 1911 to the end of the year by the Hon'ble Mr. A. H. Diack.

The office of Second Financial Commissioner was held from 1st October 1911 to 6th January 1912 by the Hon'ble Mr. A. Meredith and from 7th January 1912 to the end of the year by the Hon'ble Mr. M. W. Fenton.

I have the honour to be,

SIR,

Your most obedient Servant,

H. A. SMITH,

Junior Secretary to the Financial Commissioners, Punjab.

REPORT

ON THE

LAND REVENUE ADMINISTRATION

OF THE

PUNJAB

FOR THE

AGRICULTURAL YEAR ENDING THE 30TH SEPTEMBER 1912.

General. Statement I.

1. The year 1911-12 marks the end of a quinquennial period, and the figures in statement I have accordingly been brought up to date. No new districts have been formed during the period. The Leiah tahsil was transferred from Mianwali to Muzaffargarh and the Sharakpur tahsil from Lahore to Gujranwala. The Mianwali district was transferred from the Multan to the Rawalpindi division, Montgomery from Lahore to Multan, and a much needed relief thereby given to the Commissioner of Lahore.

Settlements during the last five years have been unusually important, and the districts that have been subjected to re-assessment are Hissar, Rohtak, Gurgaon, Delhi, Karnal, Kangra (including Kulu), Hoshiarpur, Ludhiana, Ferozepore, Gurdaspur, Amritsar, Sialkot, Gujranwala, Lyallpur and part of Shahpur. More than half the province has thus been under settlement during the past five years. The total cultivated area of the province stands much where it did five years ago. The actual figures show a decrease of ·4 per cent. The largest decrease is under *sailab* which shows a falling-off of 695,000 acres, nearly balanced by an increase of 565,000 acres of *barani* cultivation. Pure *chahi* shows a decrease of 201,000 acres corresponding to a decrease of 5,942 in the number of masonry wells in use. The decrease in wells is partly due to increased irrigation from canals, but principally to the prosperity of the seasons, wells in the Punjab being in many localities maintained as a reserve supply in case of failure of the rains. The increase in *barani* cultivation also indicates a period of good rainfall and prosperity.

The total assessment of land revenue has risen by 48½ lakhs since 1906-07, of which 40 are fluctuating revenue. In 1906-07 the incidence of the land revenue demand per acre of cultivation was Re. 1-0-2 per acre. It is now Rs. 1-3-0.

General summary of agricultural conditions.

2. (*a*) *Kharif* 1911.—Drought during April and May made the kharif sowings 36 per cent. below normal. The monsoon arrived early, but after the first burst in June there was no rain till late in August. The rains ended in September, and of the small kharif crops sown 31 per cent. failed.

(*b*) *Rabi* 1912.—Welcome rain, however, was received on the 26th of October and again in November, and unusually large areas were sown for the rabi harvest. Good rain fell also in January, but little from then till April, and of the area sown, which was 13 per cent. above the average, 14 per cent. failed to mature. The harvest was, however, a good 18-anna crop and, though below expectation in some districts, created a record in Delhi and Rawalpindi

(*c*) *General result.*—From the point of view of Government the excellence of the rabi made up for the failure of the kharif, though there was considerable shortage of fodder crops. The total matured area of the year was 2,000,000 acres below the normal.

(*d*) *Irrigation.*—The feature of the year's irrigation is the large increase as compared with the previous year of 400,000 acres in well cultivation and of 570,000 acres watered from canals, due to the shortage of rain first in July and August and afterwards in February and March.

(*e*) *Prices.*—Prices rose considerably with the exception of cotton which, however, fell but little below the record price it reached in the previous year. Wheat touched Rs. 3-13-0 per maund in April, and was never lower than Rs. 3-2-9, while the cheapest grain varied from Rs. 2-3-6 to Rs. 2-10-6.

Fixed land revenue.
Statements V, VI and VII.

3. The fixed land revenue demand of the Province stands at Rs. 2,13,73,969, an increase of Rs. 47,616 only over last year's figures. Increases due to re-assessment occurred in Hissar and Ludhiana, partly counterbalanced in Hissar by the substitution of a fluctuating assessment in parts of the Fatehabad tahsil. Other additions and deductions are normal. Of the current demand 97·2 per cent. was recovered, a remarkable result considering the extensive failure of the kharif, and due to the balance being redressed by a bumper rabi. The outstanding balance of the current demand is Rs. 5,95,391, of which Rs. 5,10,856 are under suspension and Rs. 5,465 recoverable arrears not under suspension. The irrecoverable balance is Rs. 77,919, of which Rs. 21,274 were remitted on account of calamities of season.

At the close of last year the outstanding balance was Rs. 5,79,430, of which Rs. 3,86,345 were classed as recoverable and Rs. 1,93,085 as undetermined or irrecoverable. Of these sums, in the year under report, Rs. 1,80,353 were struck off, while Rs. 2,12,050 were recovered, and Rs. 1,90,206 remain as balance. The increase in the balance of Rs. 3,179 is due to refunds.

Collections of the current demand were over 90 per cent. in all districts except Jhelum and Shahpur. This high percentage of collections is due, as observed above, to the splendid rabi of 1912 which enabled district officers to collect a large proportion of the revenue suspended in the kharif. The suspensions of that harvest amounted to 13¾ lakhs (principally in the Delhi and Rawalpindi divisions and in the Gurdaspur, Sialkot and Gujranwala districts of Lahore), and the suspended revenue which was collected in the rabi was upwards of 10½ lakhs. There is reason to suppose that the tendency in allowing suspensions was to err on the side of liberality, for a scrutiny of the monthly collection statements sometimes brought to light payments considerably in excess of the demand as reduced in consequence of suspensions. In the Rawalpindi division, for instance, revenue-payers had paid in by the end of July half a lakh more than they were required to pay, *i.e.*, about 30 per cent. of their arrears.

Alluvion and diluvion.
Statement No. IX.

4. Owing to the scanty monsoon there were fewer large floods than usual and consequently fewer changes in the course of the big rivers. Last year 43,376 acres were removed from assessment owing to river action. This year the figure is 29,648 acres only, which corresponds almost exactly with the area newly assessed owing to alluvion during the year. The nett decrease in the fixed land revenue demand from this cause is Rs. 12,442 only.

The big rivers are again responsible for nearly all the changes, the action of chos and minor streams being comparatively unimportant. The largest loss of revenue, Rs. 5,759, is reported from Lahore, and is due entirely to the action of the Ravi. Nett increases of assessment are shewn by Gurgaon, Delhi, Jullundur, Sialkot, Gujranwala, Attock and Dera Ghazi Khan.

Fluctuating land revenue.
Statement No. VIII.

5. The amount of land revenue temporarily off the fixed land revenue roll was Rs. 92,000, of which Rs. 42,000 is due to the revision of assessment in Gurdaspur. The amount of land revenue permanently off the fixed land revenue roll rose from 71 lakhs to 87 lakhs. The important increases are entirely due to reassessment in the Canal Colonies, Lyallpur showing an increase of 10 lakhs, Shahpur 6 lakhs, and Jhang 1 lakh. Land revenue assessed by the Deputy Commissioner on canal-irrigated land

shows decreases of Rs. 73,000 in Multan and of Rs. 12,000 in Dera Ghazi Khan. In Multan the canals began to flow late and closed early. The largest decrease of irrigation is on the Lower Sutlej series.

In last year's report the Financial Commissioner expressed his intention of examining the general working of fluctuating assessments. The results of this examination show that in Jhang the Settlement Officer's estimate has been gradually worked up to and has been in 1911-12 exceeded by 14 per cent., showing that the development anticipated by Mr. Abbott has now been fully attained. In Mianwali the Settlement Officer's estimate was reached for the first time last year, while the average collections since settlement have been Rs. 43,000 below it. In 1911-12 the collections were Rs. 34,000 below the estimate. It is explained that the failure of the rains in Mianwali and Isa Khel tahsils caused crop failure in the kharif to the extent of 39 per cent., which the Commissioner considers fair. In Muzaffargarh the Settlement Officer's estimate has been exceeded for the last two years, while the average demand since settlement falls short of the estimate by Rs. 25,000. In Dera Ghazi Khan the average demand since Settlement coincides with the Settlement Officer's estimate. In Multan the Settlement Officer's estimate was ten lakhs. This figure has been exceeded in the last two years, but the average since settlement is 9½ lakhs, the shortage being in the Shujabad tahsil and in the Sidhnai Colony. The Financial Commissioner has called for further figures and is investigating the cause of this. In Montgomery, which was cited last year, the Settlement Officer's estimate was Rs. 60,000. The highest amount realised since settlement is Rs. 38,000 in 1910-11. In 1911-12 the demand was Rs. 23,000. Here, as observed last year, the Settlement Officer's estimate appears to have been based on a series of exceptionally good years.

The most notable divergence from the estimate occurred in Hissar, where the demand was Rs. 12,000 against an estimate of Rs. 59,000. The scanty floods in the Ghaggar, Rangoi and Joya streams account for this difference.

In last year's review the Lieutenant-Governor attributed the poor collections of fluctuating revenue to improper working of the rules and inadequate supervision on the part of Collectors. Though the Financial Commissioner's enquiries are not yet complete, he is inclined to think that on the whole the results are not unsatisfactory; but it is essential to the proper working of a fluctuating system that the district officer should himself take an interest in it and by examining its operation from harvest to harvest should secure that the revenue due to Government is obtained, or, if that is prevented by defects of system, should take measures to remedy the defects.

Other land revenue.
Statement No. VIII.

6. The demand which stood last year at less than 25 lakhs rose in the year under report to nearly 70 lakhs, of which 69 were collected. This enormous increase is due to the sale of proprietary rights in the Chenab Colony, from which a sum of 61 lakhs was realised. There is a large uncollected balance in Delhi (Rs. 43,000), due to the failure of certain purchasers of Government land to fulfil their engagements. The large balance in Shahpur is due, as before, to the Jalpana estate. The largest decrease is under the head "Sale of Town-sites," whose receipts fell from Rs. 3,20,000 to *nil*. Recovery of cost of assessment from assignees fell from nearly one lakh to practically nothing. Receipts from *tirni* show a falling off of Rs. 9,000, mainly in Montgomery, where the failure of the winter rains produced a grass famine.

Land revenue assignments.
Statement No. X.

7. The total land revenue assigned, including the emoluments of zaildars and inamdars, amounted to rather less than 29½ lakhs, a slight decrease on last year's figures. The percentage of land revenue assigned to the total land revenue of the province was 9·2 or ·3 less than last year. Two military reward grants, each amounting to Rs. 600 per annum, were sanctioned in the Kangra district, and seven new grants aggregating Rs. 67 were made in the

Ludhiana district. The jagir of Abdul Satar Shah in the Mianwali district was forfeited for a period of three years under the Frontier Crimes Regulations.

Coercive processes.
Statement No. XI.

8. Coercive processes against lambardars issued in 3,386 cases as against 4,683 last year. The amount of land revenue involved was over eight lakhs of rupees, of which 97 per cent. was recovered. Coercive processes issued at the request of lambardars were 8,176 as against 9,589 last year. The amount involved was 2 lakhs, of which 81 per cent. was recovered. The decrease in the number of processes issued is considerable and satisfactory. Warrants of imprisonment were issued against two lambardars only, but were executed in both cases. Processes of distress against the movable property of lambardars were issued in 44 cases in Amritsar (none being executed) and 42 in Shahpur. In the case of six lambardars only in the province were sales of movable property necessitated. It is generally found that the issue of a warrant is sufficient to ensure payment without its execution.

In Ambala, Amritsar and Montgomery the policy of confiscating *pachotra* is producing a marked improvement in the punctuality of payments. In Kangra the number of non-residents and in Lahore the general lawlessness of the Manjha are given as reasons for unpunctual payments to lambardars. Lambardars appear to be backward in their payments in Gujrat, Karnal, Mianwali and Ludhiana, while the lambardars themselves are most in need of Government aid in Amritsar, Gurdaspur, Muzaffargarh, Kangra, Lahore and Mianwali.

Process-serving establishment.

9. As usual the processes issued were served by the tahsil chaprasis in most districts. Special establishment was, however, employed for short periods in 13 districts. The receipts from *talbana* amounted to Rs. 20,326 as against Rs. 18,485 in the previous year.

Progress made in remeasurements, revision of records, etc.

Statements XII, XII A and XIII.

10. The districts under settlement during the year were Kangra, Hoshiarpur, Ludhiana, Ferozepore, Gujranwala, Gurdaspur, Amritsar, Sialkot, Shahpur and part of Lyallpur. Revision of records as a preliminary to settlement was in progress in Lahore and Gujrat. As reported last year the reassessment of Kulu is in charge of the Sub-Divisional Officer while the Settlement Officer of Kangra has the Dehra and Hamirpur tahsils of that district *plus* the Una tahsil of Hoshiarpur to re-assess. In Lyallpur the area watered by the Lower Chenab Canal is under settlement.

Kulu.—The records were practically complete by the end of the year and the assessments announced in Kulu proper. The remaining announcements were to be made shortly after the close of the year, and the Settlement Officer is now winding up the settlement.

Kangra.—In last year's report the difficulties experienced in the Dehra-Hamirpur settlement were noticed. In the year under report they were accentuated by the illness and eventual departure on leave of the Settlement Officer. Before he left, however, Mr. Connolly had succeeded in getting the work well under way. Additions to the staff were sanctioned and the record work is now complete for about two-thirds of the estates concerned. Orders were passed on the preliminary report, and village inspections are well in hand. The Commissioner believes that the settlement will be completed by the end of 1913 in Una and in the course of 1914 in the other two tahsils.

Hoshiarpur.—Measurement work is finished in the Hoshiarpur and Dasuya tahsils and was to be finished in Garhshankar shortly after the end of the year. Record work has not kept pace with measurements, but will be finished in February 1913. The Hoshiarpur assessment report was completed, and village inspections in Dasuya are nearing completion. The assessment report of Dasuya is now in the press.

Ludhiana.—The Ludhiana settlement was concluded in December 1911.

Ferozepore.—Measurements were finished in Moga and nearly finished in Ferozepore. They are making good progress in Muktsar and Zira. It was

found necessary to subject the maps in Fazilka to a more complete revision than had in the forecast been anticipated to be necessary and in some estates to remeasure. The Moga assessment report was received, and that of Ferozepore was written before the close of the year, and the former has been submitted to Government.

Gurdaspur.—Assessments in the remaining tahsils—Shakargarh and Pathankot—were announced and distributed, and the settlement concluded at the end of the year.

Amritsar.—The new maps and records have been completed in Amritsar and Tarn Taran, and the work is in full swing in Ajnala. The assessment reports for the first two tahsils were sent up and orders passed on them. Ajnala alone remains to complete the settlement.

Sialkot.—Work was in progress during the year in Daska, Raya and Pasrur tahsils. Half of Raya and two-fifths of Daska have been resurveyed, while *killabandi* is in progress in that part of Pasrur which is to be irrigated by the Upper Chenab Canal. Fair progress has been made, and the Settlement Officer hopes to finish in the scheduled time. The prospect of canal irrigation involved very heavy partition work in Pasrur.

Gujranwala.—Field work was practically finished during the year—final attestation remaining in some 200 estates. The assessment report of Wazirabad was disposed of last year and those of the other two tahsils, Gujranwala and Sharakpur, during the summer of 1912. Announcements have been delayed as *killabandi* brought to light important changes in soil classification which involved recasting the village assessments.

Shahpur.—Record work was completed in Shahpur for all the villages in the year's programme and a few more. Final attestation has not kept pace with field work, but was to be completed for these villages early in the current year. Orders were passed on Mr. Rudkin's assessment report of the Lower Jhelum Canal area and the settlement of that area concluded.

Lyallpur.—The assessment report of the Gugera Branch II Circle, was submitted and orders passed on it during the year.

Lahore.—Map correction and revision of records in preparation for the settlement were in progress during the year in Lahore and Gujrat. In Lahore two-fifths of the records were brought up to date by the abbreviated system of map correction which is here under trial.

Gujrat.—In Gujrat the work has been in progress for two years and is now complete.

Final settlement reports.

11. Government orders were received during the year on the final settlement reports of Karnal, Delhi and Ludhiana. Those of Hissar and Gurdaspur were sent to Government after the close of the year.

Comparison of estimates and forecasts in regard to duration, cost and results. Statement XIV.

12. In Kulu the settlement will take 3 months less than the sanctioned period, and will cost 22 per cent. less than the estimate. The sanctioned enhancements will be taken and the cost of settlement recovered in $2\frac{1}{2}$ years. In Hoshiarpur the settlement should be completed by the end of 1913, and the total cost will not be more, and will probably be less, than the estimate. The other current settlements are not sufficiently advanced to permit of an accurate forecast of results or cost, but all bid fair to be completed within time, except Dehra-Hamirpur and Gujranwala. The case of Dehra-Hamirpur has been discussed in paragraph 10.

In Gujranwala the estimate of time was 3 years and of cost 4 lakhs. The settlement will take $3\frac{3}{4}$ years, and cost rather more than $4\frac{1}{2}$ lakhs. The revision of maps and records here took the form of *killabandi*, which cannot be hurried, but it is to be regretted that the duration has so much exceeded the estimate.

In Lyallpur the Gugera Branch II assessment is estimated to bring in Rs. 14,71,784, an increase of 109 per cent. In the Lower Jhelum Colony

the re-assessment is estimated at Rs. 13,45,562, an increase of over 200 per cent. It is again to be noted that re-assessment in these colony areas costs practically nothing beyond the pay of the Settlement Officer, as no revision of records is required.

Proposed future settlement operations.

13. The resettlement of Lahore and Gujrat was sanctioned during the year, and the settlements began in October and November 1912, respectively. The Jullundur forecast was dealt with during the year and the settlement has been sanctioned by the Local Government and will begin in October 1913. A new scheme of settlement operations was prepared during the year and sanctioned by Government. Under this scheme the remaining tahsils of Kangra are due for resettlement in 1913, but work will not be commenced till establishment is available from the Dehra-Hamirpur settlement. It is hoped, however, that with the experience there gained, and with help from the Survey Department, it will be possible to push measurements through quickly in the remaining tahsils. Simla and Montgomery are due for resettlement in 1914, and the Simla forecast will be sent for this year. As to Montgomery the Colonization Officer, Lower Bari Doab Canal, will probably have to undertake part at least of the settlement.

Settlement staff.

14. At the close of the year under report the Kulu settlement was nearly finished, seven settlements were in full swing, and two just beginning. The completion of the Lower Bari Doab survey set free a considerable staff, but even so, great difficulty has been found in getting trained kanungos, especially in Sialkot. Settlement Officers are reducing their staff wherever possible as field work progresses. In Kangra and Amritsar it has been found impossible for one Tahsildar to cope with the final attestation work of a whole tahsil, and the attestation of certain Naib Tahsildars has been accepted as final. The Commissioner of Jullundur reports that the amalgamation of the lists of District and Settlement Naib Tahsildars, which was effected two years ago, has made transfers more frequent than they were formerly, because all Naib Tahsildars are required to serve for a time in the settlement line and the reversion of men at the close of a settlement makes it necessary to find places for them elsewhere. It will necessarily take some time to get the new system into smooth working order, but as it involves the principle that every Naib Tahsildar should be employed as such throughout at least one settlement (a period of two or three years), it ought not to entail an inordinate number of transfers.

Surveys.

15. The riverain detachment of the Survey Department continued its work of traversing and laying down base lines during the year: 332·95 linear miles of main traverse and 1,911·26 linear miles of minor traverse were run; 8,541 theodolite stations were fixed along the banks of the rivers Sutlej, Ravi, Chenab and Jhelum in the districts of Hoshiarpur, Ambala, Ferozepore, Lahore, Montgomery, Sialkot, Gujrat, Shahpur and Jhelum; and 492 corners of 164 squares were marked with permanent mark-stones on both banks of the Sutlej and the Jhelum, to serve as bases for the future demarcation of boundaries in the beds of the rivers. One thousand nine hundred and ninety-seven plotted and 485 boundary "musavis" (settlement mapping sheets) of 328 villages were completed, and 30 four-inch sheets were traced and supplied to the Settlement Officers of Hoshiarpur, Una, Ferozepore, Sialkot and Shahpur. Besides these, 129 miscellaneous traces were prepared, and all the traverse stations laid out during the season were plotted on 28 four-inch sheets.

Of the four-inch compilation of riverain boundary sheets, 20 sheets were plotted and compiled, 23 sheets finally completed, 10 sheets typed and 371 villages were reduced by pentagraph to the scale 4 inches = 1 mile.

The rectangular survey of the area to be commanded by the Lower Bari Doab Canal was carried over the remaining tract. The settlement staff continued joining the detachment till late in December 1911, and consequently a

considerable time was spent in training the hands. As after May 1912 it became very difficult to work during the day time on account of excessive heat, scarcity of water and duststorms, the field operations were temporarily stopped in the middle of June 1912, and restarted on 1st September 1912. In all 55,000 rectangles were demarcated. Nearly 40 per cent. of the work was tested by the Naib Tahsildars, Tahsildars and the Survey Officers; and 15 per cent. was checked with theodolite traverse. Four thousand seven hundred and eighty-two linear miles of traverse were done and 13,788 theodolite stations were fixed. The whole of the demarcation was finished by December 1912.

The total expenditure on the riverain work from 1st October 1911 to 30th September 1912, excluding the pay of the *khalasis*, was Rs. 24,969, and that of the Lower Bari Doab work was Rs. 2,00,981 or annas 2·34 per acre.

The Upper Chenab rectangular survey was practically completed last year, and that on the Upper Jhelum Canal has now been finished.

The topographical survey parties surveyed 7,373 square miles on the 1-inch scale and a small portion on the 1½-inch scale in Gujranwala, Sialkot, Lahore, Amritsar, Ferozepore, Hoshiarpur and Jullundur and in Kapurthala State. Thirty-seven 1-inch standard sheets relating to the Punjab were published during the year.

Boundaries.

16. No important alterations in district boundaries were made during the year.

Several boundary disputes are in progress between the Ambala district and the Native States with which it marches. Some have been settled, and every effort is being made to settle the remainder at an early date. The Settlement Officer of Dehra-Hamirpur is settling boundary disputes between the Ambala and Hoshiarpur districts. Similar disputes between Ferozepore and Jullundur and Ferozepore and Lahore are under disposal. Fresh boundary questions in Mianwali are engaging the attention of the Deputy Commissioner.

Record rooms.

17. The periodical revision of revenue records in the course of settlement operations usually calls for an increase of record room space. In Ludhiana and Sialkot new record rooms have been built, but in the latter district accommodation still appears to be deficient and a re-arrangement of the space is being considered. The new record room at Dera Ghazi Khan has been completed, and the records are now being stored. The Commissioner notes that under the circumstances in that district work in connection with the records has been extremely well done. In Hissar allotment for a new building has been sanctioned, and the work will shortly be taken in hand. It is hoped that the new room in Gurdaspur will be completed by the end of March 1913. More accommodation is required in Hoshiarpur, Amritsar and Gurdaspur, and proposals will shortly be submitted.

Damage to records by insects is reported from Ambala and Gujranwala. In the latter district a mixture of methylated spirit, corrosive sublimate and carbolic acid recommended by the Imperial Entomologist is being experimented on.

The Government of India are being asked for an assignment to cover the loss to provincial revenues caused by fees for inspection of records being now taken in stamps. The proposal to realize copying fees in stamps has been dropped. Draft rules for the amalgamation of the Copying Agency with the Copying Department and the regulation of this branch of district administration have been submitted to Government. It is proposed to work the new rules experimentally in two selected districts before their general introduction.

Other matters.

18. The remission by money order of sums due to Government is reported by every district except Simla. The amounts so remitted varied from two and-a-quarter of lakhs in Lahore to Rs. 3,672 in Kangra. The total sum remitted by money order amounted to nineteen and-a-half lakhs against fourteen lakhs remitted last year. The system is certainly growing into popularity,

especially where communications are bad and distances great, as for example in the Una tahsil of Hoshiarpur. On a reference from the Financial Commissioners the Postmaster-General expressed his inability to recommend any reduction in the money order fee, owing to the increasing cost of transport.

The use of currency notes for remittance of land revenue continues in Lyallpur and Gujranwala, and has been sanctioned tentatively in Rohtak, but it gathers little favour. In the Amritsar and Jhelum reports mention is made of the practice, of which the adoption was authorised generally by Sir James Wilson in 1908, of requiring the tahsil revenue accountant to attend at the sadr treasury for a fortnight twice a year when payments are heaviest. The arrangement is a good one and saves trouble to the lambardars, and the extent to which it has been adopted in other districts should be mentioned in next year's district reports. In Jullundur and Ludhiana rosters have been prepared by zails, and lambardars are required to pay their instalments in batches of convenient size to obviate the usual rush during the last few days of the period of payment.

19. Suits against occupancy tenants for enhancement of rent show a decrease from 1,813 to 1,666. In 1,314 cases enhancements were decreed. The most notable decrease is in Hissar, where only 87 cases were instituted as compared with 708 in the preceding year,—an abnormally large number, due to the announcement of the new assessment. Institutions were heavy in Hoshiarpur (479), Jullundur (466) and Gurdaspur (255). In Hoshiarpur and Jullundur the Commissioner attributes the activity of landlords in this behalf partly to the settlements which are in progress in one district and in prospect in the other, but partly also to the general rise in agricultural values. In Hoshiarpur Mr. Fagan adds that occupancy status is generally disputed. The Deputy Commissioners of Rohtak, Lahore and Jhang notice the strong position of tenants in general which is largely due to plague and partly to the extension of irrigation. From Attock it is reported that landlords in the Chhach are discontented with the low rents paid by their occupancy tenants. In one case a landlord who sued was found to be paying more to Government for land revenue and cesses than he received as rent. The expense of litigation apparently deters these landlords from bringing suits for enhancement in considerable numbers.

Enhancement of rent of occupancy tenants.
Statement No. XV.

Suits for reduction of rent were brought by 54 occupancy tenants in the province as against 14 last year.

20. Suits to eject occupancy tenants continue to be few in number and unimportant.

Ejectments.
Statement No. XVI.

Applications to eject tenants-at-will have fallen from 11,293 to 10,145, ejectments ordered from 6,270 to 5,974, and ejectments actually made from 5,251 to 4,404. A noticeable decrease in actual ejectments—948 to 597—is in Hissar, where the Deputy Commissioner attributes it to the conclusion of settlement. In Delhi applications fell from 918 to 543, probably owing to the same cause. Large increases in notices issued are reported from Hoshiarpur, where the Commissioner observes that ejectment proceedings will naturally tend to increase, as proprietary holdings are small and the pressure of population on cultivated area grows more and more acute in spite of plague. Applications increased in Ferozepore, principally in the Fazilka tahsil, and here the Deputy Commissioner attributes the litigation to a desire on the part of landlords to prevent their tenants obtaining a higher status by long and undisputed possession. In Lahore notices rose from 1,005 to 1,919 owing to the impending settlement. In Montgomery and Jullundur tenants are said to be hard to find. In Dera Ghazi Khan 610 notices resulted in only 14 ejectments. The Deputy Commissioner observes that in most cases these notices are issued to recover rent in the cheapest manner.

Suits by tenants to contest their liability to ejectment resulted in the tenants' favour in 661 cases as against 977 last year. The Deputy Commissioner of Ambala reports that an astonishing number of tenants fail to realise

that length of tenure is no bar to ejectment. In Hoshiarpur tenants were successful in 82 cases out of 234 in contesting liability to ejectment, while in Lahore 15 tenants established their claims to occupancy rights.

Descent of Jagirs Act.

21. Nine jagirs were notified during the year under Punjab Act IV of 1900, – one in the Kangra district and 8 in the Lahore district.

The declarations of a rule of integral descent were based on written instruments.

The approximate value of the jagirs thus notified was Rs. 12,450. The total number of jagirs gazetted under the Act is now 139, valued at nearly 8 lakhs of rupees. In view of the number of families to which are thus applicable the statutory provisions requiring the approval of Government to each succession, some measure of delegation seems desirable. Such delegation might take the form of empowering Commissioners to approve successions, except in cases in which a departure from the rule of primogeniture is proposed.

Northern India Canal and Drainage Act.

22. The comparative failure of the monsoon led to a largely increased demand for water in the kharif harvest, which was especially marked in the districts watered by the Western Jumna, Sirhind and Upper Bari Doab Canals. The canals were in practically every case able to meet the demand. The Commissioner of Jullundur comments on the immense boon conferred by the Sirhind Canal, which has since last settlement entirely revolutionised agricultural and economic conditions. The security afforded against a serious failure of the crops is brought out this year equally clearly in respect of the Western Jumna Canal. In the rabi harvest abundant rain secured the crops in the Delhi and Jullundur divisions, and the Deputy Commissioner of Rohtak remarks that canal-water went abegging.

There are complaints of faulty distribution on the Upper Bari Doab Canal, while from Gujranwala come complaints that rotational closures in March and April leave the crops so long without water that they wither. A similar complaint of lack of water in the spring has been made in Jhang. These complaints are receiving attention.

The Upper Chenab Canal was opened during the year and irrigated land in Sialkot and Gujranwala for kharif 1912.

The rules for adapting the *nahri parta* system to increases and decreases of irrigation, which were introduced at the recent settlements of Gurgaon, Rohtak, Karnal, Delhi and Hissar were in operation during the year and are favourably reported on. A perfect set of rules for the system has not yet been devised, but various drafts have been tentatively sanctioned and their comparative merits will be further examined in connection with the settlements of Ferozepore, Amritsar and Lahore.

Progress has been made with the scheme for prevention of damage by percolation near Indri on the Western Jumna Canal, which was noticed last year, and various expedients are being tested. The only extension of importance on the major canals is the Niaz Beg extension of the Upper Bari Doab Canal which was completed during the year.

The working of the inundation canals varied from district to district. In Montgomery the Upper Sutlej Canals ran well and the Ravi canals badly. In Multan the Chenab canals ran well at first and badly later on. In Shahpur and Muzaffargarh the canals did well; in Dera Ghazi Khan they did badly. On the Lower Sutlej Canals the local authorities regard a *kharaba* percentage of 40 in the kharif as an improvement, which the figures for the last few years show it to be, though it is high as judged by experience on other inundation canals. Arrangements are under consideration for more effective co-operation between Revenue and Canal officials in *kharaba* inspections on these canals. Various protests were received during the year against the remodelling of the Upper Sutlej Canals in Multan. In Muzaffargarh the Deputy Commissioner reported last year that an inundation canal had for the first time been kept running throughout the year. It now appears that this was no new thing, but the Deputy Commissioner is opposed to it on principle as tending to increase

water-logging. This may be the case locally as on the Maggasan and Maggi Canals where the whole commanded area is water-logged, and it is desirable to take steps radically to reduce the total irrigation. But where water-logging is non-existent or is confined to a small area, there does not seem to be reason to suppose that it is likely to be induced or increased by the canal being kept open during the cold weather.

In Dera Ghazi Khan the schedule of water rates has been revised and raised with effect from kharif 1913.

Minor Canals Act.

23. No new canals were notified during the year under the Minor Canals Act.

Working of minor canals and irrigation works.

24. The area matured by the Gurgaon bunds has largely increased and the income slightly, while the cost of establishment shows a satisfactory decrease. The Delhi bunds and the Sarusti Canal in Karnal also worked with satisfactory results. Investigations into the working of the Shah Nahr in Hoshiarpur resulted in a definite scheme for improvement and realignment and for a regulator, head and escape. These improvements are now being carried out. The Grey Canals in Ferozepore show a decrease in area watered from 111,737 to 102,781 acres. A full report on this system is still awaited. In Mianwali the Nammal dam is under construction by the Public Works Department. In Montgomery the remodelling of the Gharak and Gharkana Canals is under consideration. The receipts credited to Government from the Kitchin Canals rose from Rs. 12,998 to Rs. 20,270. In Dipalpur a short lead of half a mile from the Sutlej to a natural depression has resulted in the irrigation of 10,000 acres, and a detailed survey is now being made with a view to further developments.

Land Acquisition Act.

25. The large area, 17,698 acres, acquired for public purposes marks the expansion of Railway and Irrigation works and includes land required for new Delhi. Land for the Jullundur Doab Railway and the Hissar-Jakhal and Sarai Kala-Hawelian lines was acquired during the year, while the canals of the triple project account for more than half the total area taken up under the Act.

The figures showing the number of years' purchase of the land revenue represented by the price of the land acquired have been in most cases carefully reported by the Deputy Commissioners, and the result goes to confirm the remarks in paragraph 25 of last year's report regarding the increasing value of agricultural land in the Punjab and the enormous prices paid for urban and suburban sites.

Loans Acts.
Statements Nos. XVII, XVIII, XIX, XX, XXI and XXII.

26. Loans amounting to rather over 2 lakhs were advanced under the Land Improvement Loans Act, and nearly 6 lakhs under the Agriculturists' Loans Act. Nearly 17 lakhs under both Acts were outstanding from previous years, making a total of 25 lakhs. Five-and-a-half lakhs were due for collection during the year, of which some Rs. 5,30,000 were collected. The outstanding balance at the close of the year was rather over 19¾ lakhs, more than half a lakh of which was suspended by competent authority and some Rs. 29,000 were overdue. Interest due for collection amounted to Rs. 1,23,000, all of which was recovered with the exception of some Rs. 3,300. The loan operations during the year gave a profit to the Local Government of rather over half a lakh.

Under the Land Improvement Loans Acts, the Multan division took nearly ¾ of a lakh, the Ferozepore district more than half a lakh, and the Attock district Rs. 15,500. With regard to Ferozepore the Commissioner thinks that the granting of loans may have been pushed too far. The Deputy Commissioner of Hoshiarpur considers that the establishment of co-operative credit societies is diminishing the necessity for takkavi. The amount of loans under this Act still out is large in the following districts :—Gurgaon 1½ lakhs, Attock over 2 lakhs, Multan nearly 3¾ lakhs and Muzaffargarh rather over one lakh. The

reports of Deputy Commissioners show that the improvements for which the loans are granted receive on the whole a thorough inspection.

Progress has been made in the preparation of district reports dealing with the advisability of well-boring operations and the necessity for takkavi.

Only about Rs. 64,000 out of the 6 lakhs distributed as loans under the Agriculturists' Loans Act for cattle and seed were required in the Delhi and Jullundur divisions. The scarcity of fodder was acute in Sialkot, Gujranwala and Montgomery and in all districts of the Rawalpindi division except Rawalpindi. The Commissioner of that division remarks that a very large proportion of the money advanced was for the purchase of fodder, and it is satisfactory that so small a proportion of the demand had to be suspended.

Forest Act.

Statement No, XXIII.

27. The necessity of associating the Financial Commissioner with important questions of forest administration has recently been emphasised by Government, and the old procedure has been restored to by which cases of first importance are either referred to him for opinion or sent through him to Government by the Conservator. In pursuance of this policy, the Financial Commissioner was consulted as to the punitive measures to be taken in Rawalpindi to stop forest fires. The subject has been fully dealt with in the Forest Report, and it is only necessary to say here that the measures taken had the full support of the Financial Commissioners.

The experiment introduced by Mr. Kitchin of associating non-officials with the management of *guzara* forests in Murree and Kahuta has been officially recognized by Government, and revised rules were sent up during the year, and were notified shortly after its close. The system appears to be working well, though the Deputy Commissioner reports that one of the three non-officials appointed is in arrears with his work.

The question of forest conservancy in Kangra continued to engage the attention of the Financial Commissioner and district officials in consultation with the Forest Department, and a definite scheme for checking the deterioration of the forest by reducing excessive grazing was worked out during the year, and has since been submitted for the orders of Government.

The management by the Deputy Commissioner of the Shahpur Kandi forests in Gurdaspur continues satisfactory. In Dera Ghazi Khan it was decided to bring all the forests under the control of the Deputy Commissioner with a Forest Ranger deputed to assist him.

Scarcity of fodder rendered it necessary to give free grazing in Government forests in various districts, and consequently the receipts from grazing fees have fallen off.

Government lands.

Statement No. XXIII.

28. There is little to record as to the management of State lands by Deputy Commissioners during the year. The management of the rakhs in Attock is reported to be in an unsatisfactory condition. The staff is inadequate and the rakhs are very scattered. The Deputy Commissioner is investigating the matter, which will probably come to the notice of Government during the current year. Small leases for cultivation were sanctioned in Dera Ghazi Khan, Multan and Mianwali.

Very large remissions in the *tirni* demand of Montgomery were necessitated by the failure of the rains, which produced a fodder famine. There was no grass in the Bar and the Government rakhs which normally support large herds were deserted.

Punjab Land Preservation (Chos) Act.

29. The small sums that have been allotted in recent years for prevention of damage in Ambala due to torrent action have not been spent, and it has been realised that action on a larger scale is necessary. The co-operation of the Native States of Patiala and Nalagarh has accordingly been invited and

a comprehensive scheme of planting and closing affected areas was drawn up on a report made by Mr. Holland, I. F. S.

In Hoshiarpur the Maili and Dada Chos are being dealt with under the Act. In the Maili Cho the stone-bunds have proved ineffective to control the heavy floods, and the local officers reported to Government that though considerable progress had been made since the Act was passed in afforestation, the time has now come for the work to be carried on on more scientific lines. To this end they recommended the deputation of a forest expert who would be in a position to suggest 'initiate' and supervise measures for the further progress of afforestation.

It has been suggested that Mr. Holland, who drew up the Ambala report, should be in charge of these operations throughout the Siwaliks, and that is the proposal which the Financial Commissioner has recommended to Government.

30. The total number of villages in the Province is ten more than last year, owing principally to the formation of new estates in Lyallpur and Gujranwala. The total number of land-owners and share-holders is 3,622,082, an increase of 33,368 since last year, and the number of holdings has increased from 3,082,348 to 3,135,472. The figures suggest that sub-division of holdings is once more becoming a feature of life in the rural Punjab, perhaps owing to the diminution of plague. The average size of a holding is 12 acres, of which 8 are cultivated. Last year it was reported that of the total area held in proprietary right one-sixth was owned by persons who are not members of notified agricultural tribes. This year the fraction is nearer one-seventh. The cultivated area under mortgage has risen only from 11·9 to 12 per cent. of the whole. The heaviest percentage of cultivation under mortgage is, as last year, in Sialkot and Gurdaspur. In this connexion an interesting development is reported from Hoshiarpur. Mortgagees are commonly permitting part of the mortgaged area to be redeemed without any payment being made, the reason being that they are afraid that if they refuse, the mortgagor will redeem the whole area and remortgage a part of it elsewhere on better terms. This is a luminous illustration of the growing value of land.

General statement of owned and mortgaged land.
Statement No. III.

31. The number of exchanges of land made during the year shows a considerable increase, while the area involved shows a small increase. These exchanges are generally made to consolidate holdings and facilitate cultivation, and are of little importance. The area transferred by gift is little more than last year, but the Deputy Commissioners of Ambala and Sialkot comment on the increase in their districts. In Ambala there is some reason to believe that the form of gift is some times used to cloak transactions violating the Land Alienation Act, and all such transactions are investigated.

Transfers.
Statement No. XXIV.

The value of land is steadily rising. Two years ago the mortgage money per acre of cultivation was Rs. 95. Last year it was Rs. 101. This year it is Rs. 106, in spite of the poor kharif, when many owners were anxious to mortgage part of their holdings. The stress of the kharif scarcity is better reflected by the price realised in sales, which fell from Rs. 124 to Rs. 119 per acre of cultivation. The multiple of the land revenue represented by the sale price of land is shown in statement XXIV. The variations since last year are remarkable. The multiple has fallen in Lyallpur from 273 to 99, and in Shahpur from 241 to 188, owing to re-assessment. The fall in Jhang from 182 to 27 is hard to explain. In Gujrat the fall from 157 to 101 may be due to poor harvests. In Hoshiarpur the fall from 191 to 145 is unexplained. In Lahore, on the other land, the figure has risen from 332 to 399; in Montgomery from 189 to 242; and in Sialkot from 78 to 102. Most remarkable of all is the fact that the multiple remains the same in Delhi--39—in spite of the appreciation in the value of land which the removal of the capital may be assumed to have caused. The column giving this information was only introduced in the previous year. It will add to its utility if Deputy Commissioners will comment on the variations from year to year.

32. The number of sales of land held in proprietary right was higher in 1911-12 than in any year since 1900-01. The area sold exceeded the last quinquennial average by 13 per cent. At the same time the price realised exceeded the quinquennial average by Rs. 12 per acre of gross, and Rs. 9 per acre of cultivated land. Sales by agricultural tribes were more in area than they have ever been since the passing of the Land Alienation Act except in 1909-10. On the other hand sales to agricultural tribes reached 214,000 acres as against a maximum previously of 199,000 and a quinquennial average of 178,000. The corresponding figures for sales among non-agriculturists show that they have sold 84,000 acres, which is a record, while they have bought only 53,000 as against a quinquennial average of 61,000.

Abstract of transfers. Statements Nos. XXVI and XXVII..

The mortgage money per rupee of land revenue rises steadily and now stands at Rs. 89. The area under mortgage to non-agriculturists is the same as last year.

33. The additions made during the year to the list of agricultural tribes have been made chiefly on the principle that tribes who were omitted originally either on account of numerical insignificance or difficulty of grouping should from time to time be notified if they wish to be.

Notification of tribes under the Land Alienation Act.

In Attock the Bati and Sadiqi Sheikhs and in Jullundur the Koreshis were added to the district lists of agricultural tribes. The Dogra Brahmins of Kangra were added to the separate Brahmin group of that district.

Very few applications for notification were unsuccessful. The Bati and Sadiqi Sheikhs, who were notified in Attock, failed to establish their claim in Ambala. The Beldars of Jehazgarh (Rohtak) again applied for notification and their case is under consideration. The claim of the Lahore Brahmins is under enquiry. Various other groups whose applications were considered during the year have since been notified. The status of the Mahtons in Hoshiarpur, who claim to be Rajputs, is the subject of a case pending with the Financial Commissioner.

The most interesting phenomenon at present is the endeavour of those who are not notified and see no prospect of notification to alter their tribal designation to that of a scheduled tribe. Sometimes whole tribes or sub-divisions make the attempt, but more often individuals apply to have their tribal name altered in the revenue records. The indefiniteness of tribal distinctions in the Punjab and the immense variety of sub-tribal designations make questions of status unusually hard to decide. If his application is rejected by the Collector the aspirant goes off to the civil court, where he may obtain a decree against a dummy adversary declaring him to be a Jat or Rajput. Armed with this he confronts the Collector once more—only to learn that as Government was not a party to the civil suit the decision is not necessarily binding on the Collector. Cases of this kind are reported from Ludhiana, Amritsar, Gujranwala, Sialkot, Rawalpindi, Attock and Multan.

34. No special instructions were issued during the year except as regards *benami* transactions. In Rohtak where the Deputy Commissioner pays special attention to the subject, a list was prepared of the mortgages sanctioned under section 6 (1) (*a*) whose period had expired. It is satisfactory to know that in every case the land had been released, and in some the mortgagors had been able to redeem before its expiry.

Rules and orders.

Sales of small plots of land to menials are freely sanctioned, in accordance with the principle approved in Punjab Government letter No. 47, dated 25th February 1909. The Deputy Commissioner of Rawalpindi anticipates that this privilege will be abused by the menials who will be tempted to act as intermediaries as time goes on. The Financial Commissioner agrees with Mr. Maynard that until there is good reason to believe that menials are acting in this way no restriction should be placed on transfers to artisans. One such in-

stance has already come to light in Kangra. In Muzaffargarh it was found that the provisions of section 21 (*a*) of the Act were being neglected by the civil courts.

Evasions.

35. District Officers are fully alive to the necessity of watching carefully for attempts to evade the Act. Such attempts have come to light during the year in 15 districts, while there is every reason to believe, as the Commissioner of Multan observes, that other districts are not free from them. Detailed reports have been sent to the Financial Commissioner for information, and from these it has been possible to obtain a clearer view of the methods adopted to get over the restrictions of the Act. In nearly all cases the system is to put up a dummy transferee who pays the money before the sub-registrar and is entered as vendee in the sale-deed. As Mr. Fagan remarks such cases are inevitable, and it is impossible to close every loop-hole. The refusal of mutation where the real transferee is found to be a money-lender merely delays the inevitable as the dummy then, gets a decree for possession from a civil court to which the revenue officers under section 37 of the Land Revenue Act are bound to give effect. An instance of this is reported from Rohtak. Converse cases are reported from Mianwali in which vendors try to shuffle out of their genuine obligations by raising a false plea that the transaction was *benami*. As the Deputy Commissioner observes between these two extremes the pendulum swings fairly evenly while it is very doubtful whether non-agriculturists will ever acquire by means of such transactions any permanent interest in agricultural land. They are entirely dependent on the good faith of the intermediary whom they dare not put into court.

Another form of evasion which has come into notice lately is sale disguised as gift. Such cases are reported from Ambala and Ludhiana.

A more important method of evasion is the substitution of a lease for a mortgage—the consideration being a lump sum payment. The Financial Commissioners are enquiring into the prevalence of this practice and will, if necessary, report on the matter.

Working of the Act.
Statement No. XXV.

36. Agricultural tribes mortgaged 237,446 acres and redeemed 242,794 acres. Of the total area mortgaged 214,460 acres were mortgaged to agricultural tribes, while only 68,571 acres in all were mortgaged to non-agriculturists. Of the area redeemed 267,599 acres were redeemed from agricultural tribes. These figures show that the great bulk of both mortgages and redemptions is entirely in the hands of the agricultural population, and the money-lending class has very little interest in the land. Indeed it is reported from Rohtak that money-lenders are giving up the attempt to acquire land and are relinquishing such pieces of land as they hold.

The sale figures show more clearly a gain to the agricultural classes. Out of a total area of 267,878 acres sold, 83,977 were sold by non-agriculturists, while this class bought 53,440 acres only. Agricultural tribes on the other hand bought 214,438 acres and sold only 183,901 acres. Here again the transactions do not greatly concern the non-agricultural classes. According to statement III the total area owned by agricultural tribes is 33,425,498 acres as against 33,474,002 acres last year. References to districts have however brought out the fact that this statement is prepared from the quadrennial *jamabandis*, and cannot be relied on until all *jamabandis* have been revised. As the statement has only been prepared for the last three years it will not be trustworthy until next year, if then. The results shown by it this year are entirely at variance with those given by more detailed statements and also with the facts stated in the district reports. The attention of District Officers will be drawn to the necessity of scrutinising these figures and correcting them where they are wrong.

Business returns.
Statements Nos. XXVIII and XXIX.

37. Revenue cases under the Land Revenue and Tenancy Acts show a decrease. Under the Land Alienation Act there is a slight increase from 4,452 to 4,759, while miscellaneous revenue officers' cases have also risen from

37,385 to 39,298. The total number of revenue cases, however, is 161,661 as against 163,532 last year. Two thousand more cases are pending than were pending last year, but the total number of revenue officers employed was only 702, while last year it was 727.

The appellate and revisional work of Commissioners and Financial Commissioners shows 4,359 new cases against 4,424 last year. Four thousand one hundred and thirty-seven cases were decided in the year, and 778 were pending at the end of it, against 626 at the end of last year. Of these, 172 were pending more than three months.

With regard to original cases, the pending file is heaviest in Hoshiarpur, and is heavy in Multan, Gujrat, Muzaffargarh, Sialkot and Lahore. In all these districts, however, with the possible exceptions of Hoshiarpur and Multan, disposals were satisfactory. In Hissar a partition case has been pending since 1906 owing to a multitude of appeals. Land alienation cases are still most numerous in Rawalpindi and are heavy in Jullundur. Seventy appeals are pending for more than three months in the Lahore division and 73 in the Delhi division. Of the judicial appeals in the province 19 per cent. were decided in favour of the appellants, and of the executive appeals 15 per cent.

Tours of Commissioners.

38. The returns for touring done by Commissioners are for the financial year 1911-12—

Delhi.—Lieutenant-Colonel C. M. Dallas, C.S.I., was Commissioner for the whole year and spent 54 days on tour. More touring could not be done on account of preparations for the Coronation Darbar.

Jullundur.—Mr. R. Sykes held charge for 212 days and spent 28 days on tour; Mr. P. J. Fagan for 154 days, of which he spent 77 days on tour.

Lahore.—The late Lieutenant-Colonel C. G. Parsons held charge for 140 days and spent 32 days on tour; Diwan Bahadur Diwan Narendra Nath for 184 days and spent 20 days on tour; Lieutenant-Colonel C. P. Egerton was in charge for 42 days and spent 4 days on tour.

Rawalpindi.—Lieutenant-Colonel F. Popham Young, C.I.E., held charge for 85 days, Lieutenant-Colonel M. W. Douglas, C.I.E., for 27 days, and Mr. H. J. Maynard for 254 days. The last-named officer spent 4 months on tour.

Multan.—Lieutenant-Colonel C. P. Egerton held charge for 248 days and spent 36 days on tour; Mr. C. J. Hallifax was Commissioner for 118 days and spent 49 days on tour.

XXVII.—Mortgages of land.
XXVIII.—Work done by Revenue Officers.
XXIX.—Appellate and revisional work of Commissioners and Financial Commissioners.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Department of Revenue and Agriculture (Revenue), No. 60, dated 4th April 1914.

READ—

The Annual Report on the Land Revenue Administration of the Punjab for the year ending 30th September 1913, forwarded with letter No. 194, dated 26th February 1914, from the Junior Secretary to the Financial Commissioners, Punjab.

REMARKS.—The year under report was on the whole a favourable one. The monsoon was late in arrival, but it was sufficiently abundant to allow full sowings in the greater part of the Province. The rain, however, was somewhat unevenly distributed, and this fact and the early cessation of the monsoon in the western half of the Punjab reduced what promised to be an excellent kharif harvest to slightly above normal. The rabi sowings were somewhat short owing to lack of rain in parts of the Province and delay in the winter rains generally. The copious, though long deferred, falls in February and March did much to save the situation not only on unirrigated but on irrigated lands and to secure a good average outturn on the reduced area sown. In this harvest as in the kharif the unirrigated districts of the Rawalpindi Division suffered most. The prices obtained, however, were excellent, and considerably higher than in the preceding year for all crops except sugarcane, and the total results of the year may be said to have been generally satisfactory.

2. The fixed land revenue demand is just under Rs. 2·13 crores. The exclusion of the Delhi Province meant a reduction of about 3½ lakhs. Of the total fixed demand, 97·3 per cent. was collected, and the high standard of collection was well maintained in all parts of the Province, except in the three northern districts of Jhelum, Attock and Rawalpindi, where both crops were poor, and in Gujranwala, where the delay was caused by re-assessment operations. The fact that over 95 per cent. was collected without any difficulty in all the remaining districts, many of which have recently been re-assessed, is a very clear indication that the resources of the zamindars of these tracts are fully capable of meeting the increased demands. It was found necessary to suspend a little over 4½ lakhs altogether, of which the three northern districts already mentioned account for nearly three lakhs. Of the outstanding balance of last year amounting to Rs. 7,85,597, Rs. 2,31,324 were recovered.

3. Owing partly to recent re-assessments of the colony areas in Gujranwala, Lyallpur and Shahpur, in which the land revenue is almost entirely fluctuating, and partly to favourable river floods, there has been a further large increase in the amount of fluctuating land revenue which has risen from 87 lakhs to nearly 110 lakhs. No less than 20 lakhs of the increase is due to the re-assessment or rather the first regular assessment of the colony lands. Of the remaining 3 lakhs, it is probable that the increase is partly due to more careful supervision. It is only in Montgomery that the amounts fell seriously short of the Settlement Officer's estimate which was admittedly a high one. In other districts, where fluctuating assessments are a prominent feature of the land revenue administration, such as Mianwali, Multan and Muzaffargarh, there has been a satisfactory excess over the estimate. This excess is the result of favourable agricultural conditions, and when those conditions become unfavourable in these very precarious tracts, it must be expected that the realisations will be below the estimate. Constant attention is, however, necessary to ensure that crops are correctly classified and that the allowances for failure are not excessive, and the Lieutenant-Governor is glad that the Financial Commissioner is taking steps to ensure this. The fact that on 44 per cent. of the area irrigated from the Sidhnai Canal the revenue demand was remitted on account of failure of the crop indicates the necessity for strict supervision in the interests both of the revenue-payers and of Government.

Out of a fluctuating demand of 110 lakhs, all but about Rs. 20,000 was collected during the year, and those figures in the Lieutenant-Governor's opinion bear eloquent testimony to the leniency of the demand and the efficiency of the collecting agency.

Receipts under the head 'other land revenue' have fallen from 69 lakhs to 51 lakhs, the decrease being due to the contraction of receipts from sale of proprietary rights in the Lower Chenab and Chunian Colonies which show a drop of 22 lakhs. The preliminary payments of the purchase money for land sold by auction on the Upper Chenab Canal towards the close of the year brought in 1½ lakhs. Large sums may be expected from the auction sales on this canal and the Lower Bari Doab Canal in the future. The collections of other land revenue fell short of the demand by Rs. 33,662, the principal deficiencies being in the Gurgaon and Shahpur Districts. In the former case the arrears are due to the failure of the Crown tenants in the Ballabgarh Tahsil to complete their purchase of proprietary rights, and the matter is engaging the Financial Commissioner's attention: in the latter the deficiency of over Rs. 24,000 is not fully explained, and His Honour will be glad if the Financial Commissioner will inquire into the reason for this balance.

4. His Honour is glad to observe that there has been a continued decrease in the number of coercive processes issued, whether against lambardars or at their instance, and that the cases in which it was found necessary to resort to sale of property or imprisonment were very few in number. The magnitude of the operations may be gathered from the fact that though 3¼ crores of rupees were collected from some four million proprietary or occupancy holdings, in only 11 cases was resort made to arrest of the defaulter, and in 36 to sale of movable property, while in only 2 cases was it found necessary to sell immovable property. These figures the Lieutenant-Governor considers to be eminently satisfactory. Lambardars continue to avail themselves freely of the permission to pay in land revenue by money-order, and over 18 lakhs was thus paid in, though the total amount so remitted was less than last year's total by 1½ lakhs. On the other hand, the system of remitting the revenue in currency notes is still regarded with some distrust. It has been sanctioned experimentally in a few districts.

5. Ten settlements were in progress during the year, by the end of which the Kulu and Gujranwala settlements were completed. In the former the cost was 25 per cent. below the estimate, but the Gujranwala settlement has been both more lengthy and more costly than was anticipated. Its cost, however, will be recovered in two years. In Shahpur and the Dera-Hamirpur-Una Tahsils also unforeseen difficulties have delayed progress, and the estimated cost and duration will probably be exceeded. A similar result may be expected in Gujrat and Lahore where the system of preliminary revision of records before the arrival of the Settlement Officer has been tried. The experiment has not proved successful and has now been finally abandoned. Considerable progress was made with re-assessment during the year, and the new assessments were on the whole well received. An exception must perhaps be made in the case of the Rakh Branch of the Lower Chenab Canal where the large increases of revenue in a prosperous and highly developed tract which was for the first time being assessed on regular lines gave rise to some excitement. The Lieutenant-Governor, on personal enquiry, found that there were absolutely no grounds for the complaints of general over-assessment, but that in some cases it was advisable to graduate the enhancements, or to impose intermediate rates of assessment, and action has now been taken on these lines under the orders of the Commissioners of Lahore and Multan. That the enhancements were moderate is established by the fact that the value of land has shown no tendency to fall, and though the landlord's margin of profit may have in some cases been reduced by Re. 1 or even Re. 1½ per acre, the rent is still from 3 to 6 times the enhanced land revenue. Cases have come to His Honour's notice in which landlords have leased their squares for a term of years at a profit of Rs. 600 per square or Rs. 22 per acre, the lessee bearing all charges.

6. The Lieutenant-Governor's thanks are due to the Survey Department whose operations in the riverain and other areas have been of great assistance in connection with settlements.

The only important alteration in district boundaries was the transfer of 140 villages from the Montgomery to the Lyallpur District.

7. There has been a slight increase in the volume of revenue litigation. The number of suits against occupancy tenants for enhancement of rent rose from 1,666 to 1,772. The bulk of the suits were in Jullundur, Hoshiarpur and Gurdaspur: in the first-named district the figures have risen from 466 to 730. The increase is said to be due to the expiry of the term of settlement. The number of cases of ejectments of occupancy tenants has fallen from 108 to 34, but, on the other hand, the number of cases in which tenants-at-will were ejected was 6,163 as against 4,404 in the previous year. The increase is most marked in the districts of Hissar, Gujrat and Ferozepore, the two latter of which are under settlement, but has occurred in most districts. It is difficult to account fully for this rise, but it would appear that the demand for tenants in the colonies has not had so far-reaching an effect as was supposed, and that the position of a tenant is not so secure as the ejectment figures of the last three years tended to indicate. If the number of tenancy holdings in the Province is considered the litigation between landlord and tenant is satisfactorily meagre and the opening of the new colonies has contributed and will continue to contribute to this very desirable result.

8. The demand for canal water was generally heavy, except on the Sirhind Canal, where ample rainfall reduced the irrigated area by 70,000 acres. An important feature of the year was the completion of another link in the great Triple Canal Project by the commencement of irrigation from the Upper Chenab Canal in the districts of Sialkot and Gujranwala. Irrigation arrangements were generally satisfactory. Efforts are still being made to equalise the distribution of water by remodelling of outlets at the head reaches of distributaries. Such alterations where possible are very desirable, but are likely to arouse discontent among the zamindars and may cause injury to individual irrigators. The Lieutenant-Governor agrees, therefore, with the Financial Commissioner that schemes of this nature should not be adopted without previous consultation with the Revenue authorities and a careful consideration of all the factors of the case.

The year was not a very successful one for the inundation canals which for the most part started late and closed early. On the Upper Sutlej conditions were satisfactory, but on other canals the supply was below average and insufficient to mature the crops sown. The experiment of introducing iron pipes in place of *kachcha* outlets on the Muzaffargarh Canals gives every promise of success.

9. Minor canals and minor irrigation works have done well. Increases of irrigation are reported on the Shah Nahr, Sarusti, Grey and Kitchin Canals. On the Kitchin Canal, however, the rabi harvest failed owing to lack of rain. Various improvements are projected or already in hand on the Shah Nahr and Kitchin Canals, and should result inconsiderable further extension of irrigation. The Nammal Dam in Mianwali was opened after the close of the year and its working will be watched with interest.

10. There was a small diminution in the amount of the advances under the Loans Acts which amounted to Rs. 7,56,989 as compared with Rs. 8,16,001 last year. Collections and recoveries also show an improvement, and only Rs. 19,000 remained overdue at the end of the year. The loan account between the Government of India and the Local Government shows a profit to the latter of over Rs. 92,000.

While it is gratifying to learn that *taqavi* advances are still widely appreciated by the people, the Lieutenant-Governor finds much satisfaction in the steadily increasing tendency of the agriculturists to utilise advances from the co-operative credit societies for the purposes to which *taqavi* loans are generally applied. The scope for agricultural improvement is almost unlimited

and there is still ample room for both agencies, but the tendency towards self-help by means of the co-operative societies should receive every legitimate encouragement.

11. There has been a slight fall in the cultivated area under mortgage which now amounts to 11·7 per cent. of the whole, but though the redemptions exceeded the transfers, so far as actual area was concerned they fell far short of them expressed in terms of money owing to the enhanced value of land. Notwithstanding the steady increase in cultivation, the actual area under mortgage is now 260,000 acres less than it was in 1903-04, and no better tribute could be paid to the policy and the working of the Land Alienation Act. It is interesting to observe that the owners of encumbered holdings are taking full advantage of the high price of land now prevailing. Agricultural tribes continue to maintain their position, and of the total area transferred by sale or mortgage only 127,304 acres or 20·8 per cent. were alienated in favour of other than agricultural tribes.

Statistics of sale show a decrease in the price per acre of cultivated land from Rs. 123 to Rs. 107. This, however, is due to the inclusion of sales of proprietary rights in parts of the colonies at the price of Rs. 12-8-0 an acre. Their inclusion is decidedly misleading. In Lyallpur alone in recent years some 700,000 acres have been purchased from Government by colony tenants, mostly at the privileged rate of Rs. 12-8 0 per acre, whereas the market value is rarely less than Rs. 150 per acre. His Honour agrees with the Financial Commissioner that these returns should be entirely excluded from the statements in future. Omitting 'the colony districts,' there is only one district (Gurgaon) in which the sale price represented less than 60 years' purchase of the land revenue, and over the greater part of the Province it works out to well over 100 years' purchase. Reports from all parts of the Province show that the market value of land continues to rise steadily even in districts recently re-assessed, and the mortgage statistics show a rise in the price per acre from Rs 106 to Rs. 109, which is Rs. 2 more than the recorded sale price.

12. It is seldom that some new device for evasion of the Land Alienation Act is not brought to light, and the year under report is similar to previous ones in this respect. The working of the Act, however, is being watched very carefully and fresh attempts at evasion are soon discovered and frustrated, and the results show that the Act is effectually protecting the classes for whose benefit it was intended. Several tribes were notified under the Act during the year, but any large amplification of the existing lists is improbable.

13. The all-round increase in revenue work, and the completion of settlement operations in many districts, doubtless render the existing record room inadequate in many districts as explained by the Financial Commissioners. At the same time the Lieutenant-Governor would observe that having seen most of the record rooms of the Province during his tours, he is of opinion that much more could be done to make better use of the existing accommodation by improved lighting arrangements, by substituting light iron racks for heavy wooden shelves, and by getting rid of much of the useless lumber that now cumbers the record rooms. He wishes also to draw the attention of all district and inspecting officers to the slovenly and untidy manner in which most district offices and their surroundings are now kept, which ill-befits the dignity of the administration. He hopes to see a decided improvement in this respect.

14. The work of revenue courts increased materially, but His Honour is glad to observe that, in spite of this and of the fact that fewer revenue officials were employed, disposals have kept pace with institutions, and the total outturn of work has been eminently satisfactory. In appellate work the Commissioners of Ambala and Jullundur had heavy revenue judicial files, but their executive appeals were comparatively few as compared with those of the Commissioners of Lahore, Rawalpindi and Multan, and the pending file continues to be heavy in Multan. The Financial Commissioners are to be congratulated on having kept pace so well with their heavy appellate work notwithstanding the

increasing burden of controlling the revenue administration. The Lieutenant-Governor's acknowledgments are due to the revenue staff generally for the efficient and energetic administration of the Department, and in particular he desires to thank the Financial Commissioners for an interesting and instructive report.

ORDER.—Ordered that the above remarks be printed and circulated with the report, that they be published in the *Punjab Gazette*, communicated to the Financial Commissioners, Punjab, and forwarded to the Government of India, Department of Revenue and Agriculture, with the usual number of spare copies.

Ordered also that a copy of the report and of the above review be forwarded to the Surveyor-General with reference to paragraph 6.

By order of His Honour the Lieutenant-Governor, Punjab,

J. P. THOMPSON,

Revenue Secretary to Government, Punjab.

3441 CS—385—6-4-14—SGPP—Lahore.

No. 194.

FINANCIAL COMMISSIONERS' OFFICE:

Dated Lahore, 26th February 1914.

FROM

J. M. DUNNETT, ESQUIRE,

Junior Secretary to the Financial Commissioners,

Punjab,

To

THE HON'BLE MR. C. A. BARRON, C.I.E., I.C.S.,

Chief Secretary to Government, Punjab.

The Hon'ble Mr. A. H. Diack, C. V. O.
The Hon'ble Mr. H J. Maynard.

SIR,

I AM directed to submit the Annual Report on the Land Revenue Administration of the Punjab for the agricultural year ending the 30th September 1913.

2. The office of Financial Commissioner was held by the Hon'ble Mr. A. H. Diack, C.V.O., from 1st October 1912 to 15th May 1913 and on his proceeding on leave Mr. P. J. Fagan officiated from the 16th May to the end of the year.

The Hon'ble Mr. M. W. Fenton, C.S.I., was Financial Commissioner for the whole year.

I have the honour to be,

SIR,

Your most obedient servant,

J. M. DUNNETT,

Junior Secretary to the Financial Commissioners, Punjab.

REPORT

ON THE

LAND REVENUE ADMINISTRATION

OF THE

PUNJAB

FOR THE

AGRICULTURAL YEAR ENDING THE 30TH SEPTEMBER 1913.

Introductory.

1. The present report deals with 28 districts compared with 29 in previous years. The Delhi Enclave was lost to the Province on 1st October 1912 and from that date the Ballabgarh Tahsil was included in the Gurgaon District and the Sonepat Tahsil in the Rohtak District.

General summary of agricultural conditions.

2. (*a*) *Kharif*, 1912.—The first burst of rainfall did not take place until July 9th, but the showers then received were copious, and nearly normal sowings were made on unirrigated lands. The monsoon ended in the western half of the Province on the 3rd September, but in the eastern half it was prolonged until 27th September. Twenty-four per cent. of the sowings failed, the failure being all in unirrigated land in the south-east, south- west and north-west.

(*b*) *Rabi* 1913.—The early cessation of the monsoon in the western half of the Province restricted sowings on unirrigated lands, and the situation did not improve until the end of November and the beginning of December when the light showers which fell then in most districts permitted further sowings being made. The rabi sown area was only 4 per cent. below normal, and 87 per cent. of the sowings matured.

(*c*) *General result.*—The year was a considerable improvement on its predecessor, and was only slightly below normal. The defect in the *rabi* was almost made up for by the excess over normal in the *kharif*. Generally the year was favourable for irrigated crops, but somewhat unfavourable for the unirrigated crops, especially in the north-west dry area.

(*d*) *Irrigation.*—In both harvests an unusually large proportion of the sown area was irrigated. This was due to the late arrival and early withdrawal of the monsoon and to the dry weather which prevailed in January and the first half of February. Deficiencies of canal water-supply in Multan and Lyallpur Districts caused a contraction of cultivation, but in Dera Ghāzi Khan the opening of the Talai Bund Canal and the comparātively abundant flow of hill torrents, and in Ferozepore the satisfactory running of the Grey Canals led to wider sowings.

(*e*) *Prices.*—The only valuable crop which fell in price was cane, the price of raw sugar having dropped seriously from Rs. 5-6-0 to Rs. 4-7-0 per maund. The harvest prices of the most important crops, however, rose even higher than in 1912. The average price per maund of wheat was Rs. 3-1-0 as compared with Rs. 2-15-0 in the previous year, and of cotton Rs. 7-15-0 as compared with Rs. 7-10-0. The year on the whole was a favourable one for the farmer.

3. The fixed land revenue of the Province stands at Rs. 2,12,77,155, a decrease of Rs. 96,814 on last year's figures. The exclusion from the Province of the Delhi enclave caused a reduction in the demand of almost 3½ lakhs, which considerably exceeded the increase due to reassessment in the Gurdaspur and Ludhiana Districts. Alluvion and diluvion assessments also resulted in a loss of close on Rs. 12,500. Other variations in the demand were normal.

Fixed Land Revenue Statements—V, VI and VII.

As much as 97·3 per cent. of the current demand was collected. The result is satisfactory, considering the very varying success which attended agriculture in different parts of the province and even in different parts of the same district. The outstanding recoverable balance of the current demand is Rs. 4,06,038, all of which is under suspension except the small sum of Rs. 2,945. The irrecoverable balance is Rs. 1,52,315, of which Rs. 22,503 were remitted on account of calamities of season.

The outstanding balance at the close of last year was Rs. 7,85,597, of which Rs. 6,45,921 were classed as recoverable and Rs. 1,39,676 as undetermined or irrecoverable. Of these sums Rs. 1,30,339 were struck off during the year, while Rs 2,31,324 were recovered, and Rs. 4,20,965 remain as balance. The sum of Rs 2,969 not accounted for was due from the portion of Delhi District now excluded from the province.

Collections of the current demand were over 95 per cent. in all districts except Jhelum, Rawalpindi and Attock, where both harvests were very poor, and Gujranwala, where there was some delay in collecting the demand in the tahsils under settlement. Almost all the districts of the Central Punjab report that collections are made with great ease and there can be no doubt that the assessments are lenient and easily borne, even when harvests are somewhat below normal, and in the most recently assessed districts. The unpunctuality in payment which is reported as characteristic of portions of one or two districts is ascribed to the dilatory habits of the revenue-payers and has nothing to do with the pitch of the demand.

The excellent *rabi* of the previous year made suspensions in the *kharif* less necessary than they would otherwise have been, but the *rabi* of the year under report was poor in *barani* tracts, and caused large suspensions in Jhelum, Rawalpindi and Attock Districts, which account for nearly three lakhs out of the rather more than four lakhs placed under suspension. In these districts the prospects for the present *rabi* are excellent and large collections of arrears are expected. The voluntary payment by zamindars of Rs. 17,410 from the revenue suspended in Jhelum District points to some excess of liberality in deferring collections, but elsewhere no more revenue was suspended than was advisable. In the rest of the province collections on account of previous years were double the amount of fresh suspensions, a phenomenon due to the irregular results of agriculture in different tracts consequent on a badly distributed rainfall.

4. The area removed from assessment owing to diluvion amounted to 28,056 acres compared with 29,648 acres last year. The area newly assessed was 44,291 acres. For the first time for several years provincial revenues have benefitted from river action. The net increase in the fixed land revenue demand is Rs. 10,069.

Alluvion and diluvion, Statement No. IX.

The season generally was favourable. No heavy floods are reported. The only marked features of the year are the restoration of culturable land by the Jhelum river in Jhelum, Shahpur and Jhang Districts and the destructive action of the Ravi in Lahore, where a decrease of Rs. 3,615 occurred in the land revenue demand. The Sutlej gave a considerable increase of assessable land in Jullundur and a smaller increase in Lahore without causing any great loss in the districts on its southern bank.

5. The amount of land revenue temporarily off the fixed land revenue roll was Rs. 2,52,000 of which the introduction of the new demand in Amritsar accounts for Rs. 1,66,000. The amount of land revenue permanently excluded from the fixed land revenue roll rose from 87 lakhs to nearly 110 lakhs. Reassessment yielded increases of 7½ lakhs in Gujranwala, 3½ lakhs in Shahpur and 8½ lakhs in Lyallpur, while the greater success of cultivation from river flood and from inundation canals in Hissar, Ferozepore, Mianwali, Montgomery, Multan and Muzaffargarh caused an improvement of nearly 3 lakhs. The balance outstanding at the beginning of the year was Rs. 15,811, of which all but Rs. 3,720 has been collected. The balance carried forward to next year is Rs. 19,806, more than half of which is due in Gujranwala.

Fluctuating Land Revenue. Statement No. VIII.

During the year the Financial Commissioner has had occasion to examine the working of fluctuating assessments in districts where they are in force. In Jhang the Settlement Officer's estimate has again been exceeded by nearly 12 per cent., an increase attributed to greater alluvion and to timely floods in the Chenab and Jhelum rivers. In Mianwali the percentage of crop failure was high, but the sown area was much above previous figures, and the Settlement Officer's estimate was reached or exceeded in all three tahsils. The district total was above the estimate to the extent of 6½ per cent.

Favourable river floods and increased attention to the correct record of harvest inspections in Montgomery have resulted in a demand of Rs. 54,000 for the Bet circles of Dipalpur and Pakpattan. This is Rs. 16,000 better than the highest amount realised since settlement, but falls considerably short of the Settlement Officer's estimate of Rs. 60,000, which is not likely to be reached except in the most favourable years. The Settlement Officer's estimate of 10 lakhs in Multan has been exceeded by Rs. 80,000. There is still a shortage in the Shujabad Tahsil and the Sidhnai colony, which is the subject of investigation. In Muzaffargarh the demand exceeds the estimate of settlement by Rs. 28,000. The results are less satisfactory in Sinanwan tahsil than elsewhere, and there is reason to believe that the increase in Alipur is not commensurate with the extension of the cultivated area and the greater importance of the more highly assessed crops. The demand in Dera Ghazi Khan fell short of the Settlement Officer's estimate by Rs. 5,000.

The Financial Commissioner agrees with the Commissioner, Multan, who has given constant attention to this branch of administration, that careful harvest inspections and a correct *girdawari* are the root of the matter. In his review of the annual report of the Director of Land Records Mr. Diack has drawn attention to certain defects in the work of the revenue establishment in the field, and he hopes that by the correction of these defects and by a constant examination of the results of fluctuating assessments, the not inconsiderable success which has been obtained in safeguarding the rights of Government will be more than maintained.

The system is popular with the revenue payers in most districts, but there are complaints from Fazilka that assessment by different crop rates affords too many opportunities to dishonest patwaris. It is possible that the area under fluctuating assessment there will be curtailed at the present settlement. The remark in the Dera Ghazi Khan report that the fluctuating demand is not popular in the canal-irrigated tract because the canal supply is "generally precarious and fails just when the crops are about to come to maturity" requires explanation, because it was precisely because of the precarious water-supply that the fluctuating system, with allowance for crop failure, was introduced at the last settlement.

6. The total demand of the year, nearly 52 lakhs, included a sum of over 2½ lakhs on account of mutation fees, which are included this year for the first time in Statement VIII. For the purposes of comparison with last year's demand of 69 lakhs the demand of the year under report, therefore, was 49 lakhs. The only noticeable decrease was under the head of sale of Government

Other Land Revenue. Statement No. VIII.

estates, which gave 22 lakhs less than last year, owing to the greater number of the tenants in the Lower Chenab Canal Colony having taken advantage in that year of their option to purchase. The receipts from sale of waste lands showed an increase of 1½ lakhs, due to the payments of purchase money for waste land on the Upper Chenab Canal in Gujranwala. *Tirni* improved by Rs. 2,000, the most important increase accruing in Montgomery, where an advance of over Rs. 17,000 is attributed to more vigorous collection, which appears to have been justified by favourable rains obviating any necessity for remitting. Rs. 42,000, were recovered from assignees as the cost of reassessment, and the whole of this represents an increase on last year's demand. Other variations are normal.

Of the total demand of Rs. 51,95,872 collections amounted Rs. 51,62,210. The collection of grazing fees causes trouble in Multan and about Rs. 4,000 under this head are outstanding, but in the adjoining district of Montgomery with a much bigger *tirni* demand, the outstanding balance is inconsiderable. The balance of nearly Rs. 6,500 in Gurdaspur due from assignees on account of cost of settlement should be recovered without delay. The failure of tenants of Crown lands in Ballabgarh to complete their purchase of proprietary rights is responsible for large balances both from the current demand and the demand of last year in the Gurgaon District. A report on the subject is due from the Deputy Commissioner. The arrears of Rs. 16,500 in Shahpur are on account of *nazarana* due from the proprietors of the Jalpanna estate which is being paid by the Court of Wards from time to time as the income of the estate permits.

Land Revenue assignments, Statement No. X

7. The total land revenue assigned now stands at Rs. 29,82,973 an increase of nearly Rs 36,500 as compared with last year. There is a decrease in all assignments for limited terms, the total increase being due chiefly to the reassessment of large perpetual *jagirs* in Amritsar, Gujranwala and Ludhiana. The percentage of the land revenue assigned to the total land revenue of the Province was 8·4 per cent. against 9 2 per cent. last year. The decrease of one lakh in the acreage of land whose revenue is assigned is due partly to the exclusion of the Delhi enclave but chiefly to more accurate returns from several districts in which the statistics of previous years were compiled from the village note-books and not from the detailed records prepared at Settlement.

Two new assignments of the total annual value of Rs. 475 in favour of religious institutions were made in Gurdaspur, and two retired Military Officers received grants of Rs. 600 and Rs. 100 each in the Gujrat and Shahpur Districts respectively. A life grant of Rs. 1,280 per annum in Jullundur District was resumed on the death of the holder. Otherwise the grants resumed were petty.

Registers are reported to be in good condition. New registers were prepared in Amritsar and Gujranwala and for Attock Tahsil, and are under preparation in several Settlements.

Coercive processes. Statement No. XI.

8. Coercive processes against lambardars issued in 2,831 cases as against 3,386 cases last year and 4,683 cases in the year preceding last. The amount of revenue involved was almost 7¼ lakhs, and 97 per cent. was recovered.

Processes issued at the instance of lambardars numbered 7,233 against 8,176 last year, and over 91 per cent. of the 1¾ lakhs at stake was realized. The decrease in the number of processes issued is considerable, and, following a similar decrease last year, is satisfactory.

Warrants for the imprisonment of three lambardars only were issued, and were executed in two cases, but in 203 cases it was found necessary to distrain lambardars' moveable property, and in 10 cases property of that description was sold. In several districts a much larger number of warrants of arrest than writs of demand were issued against lambardars. In ordinary cases a writ of

demand should issue in the first instance, and arrest should be resorted to only when the milder process has failed. It is generally necessary only to issue a process without going to the extreme limit of fully executing it to enforce payment of the demand, and the Commissioner of Multan's remark that "there is no real difficulty in collecting, and it is only slackness that has to be dealt with" is probably true over a wider area than that Division.

Gurdaspur, Jhang, Muzaffargarh and Dera Ghazi Khan were the districts in which lambardars required most assistance from the Tahsil, and in each of these districts 80 or more warrants for the arrest of khewatdars were executed. In Kangra, where numerous writs of demand issue to khewatdars but resort to the more severe forms of coercion is rare, many lambardars were found to be paying out of their own pockets the land revenue due from non-resident landowners. The Deputy Commissioner's action in encouraging lambardars to apply for the recovery of even the pettiest sums from defaulters has the approval of the Financial Commissioner and the Commissioner.

Process-serving establishment.

9. As usual the processes issued were served by the permanent tahsil establishment in the great majority of cases. In fifteen districts, however, a few temporary peons were entertained for limited periods at a total cost of Rs. 850. The receipts from *talbana* amounted to Rs. 16,993 against Rs. 20,326 in the previous year.

Progress made in remeasurements, revision of records, etc.
Statements XII, XII-A and XIII.

10. The districts under settlement during the year were Kangra, Hoshiarpur, Ferozepore, Lahore, Amritsar, Sialkot, Gujranwala, Gujrat, Shahpur and Lyallpur.

In *Kulu* the small amount of record work remaining at the end of last year was overtaken and the reassessment of portions of the sub-division outside Kulu Proper completed the revision of the demand. Mr. Coldstream is to be congratulated on the successful completion of an arduous task.

In the *Kangra* settlement, which comprised during the year the Dera and Hamirpur Tahsils, along with the Una Tahsil of Hoshiarpur, the imperfection of the existing record and the relative inferiority of the subordinate staff continued to cause difficulty. The rate of progress however has been more than maintained. Over 313,000 acres were mapped, remeasurement being resorted to in practically every case and the records of 244 estates (858 *tikas*) were completed and attested. But at least a full year's record work remains to be done. In addition to his settlement work and to the task of recording the rights of Government in trees growing on private waste the Settlement Officer has to assess and distribute the grazing tax which was sanctioned during the year, and it may be found necessary to recommend some extension of the duration of settlement operations. The assessment report of tahsil Una was submitted. The orders of Government were received after the close of the year and communicated to the Settlement Officer. The assessment of the estates of the other two tahsils must in many cases await the preparation of reliable statistics, but a large number of villages were inspected for assessment and this branch of the work is well in hand

The measurements in *Hoshiarpur* have now been completed, and the new records have been filed for the Sadr Tahsil. A considerable amount of record work, however still remained to be done at the end of the year in the other tahsils. The new demand has been announced and distributed in the Hoshiarpur and Dasuya Tahsils. The assessment reports for these tahsils were prepared by the late Faqir Sayad Iftikhar-ud-din, who had to be relieved of the charge of the settlement in April, in consequence of an illness which terminated fatally eight months later. He had shown great zeal in his conduct of the work and his loss is much regretted. The assessment of the third tahsil, Garhshankar, is being carried out by Mr. Humphreys who succeeded him.

In *Ferozepore* record work keeps pace with measurements. Field work is complete in Moga, Ferozepore, Zira and Muktsar, and the records have been

completed and attested. Fazilka was taken in hand at the beginning of the year. Rather more than half the maps have been prepared, the record work also being kept well up to date Three assessment reports were submitted (for Mamdot, Muktsar and Zira), and the new demand was announced and distributed in Moga and Ferozepore.

The Settlement Officer of *Lahore* took up his appointment at the beginning of the year. Measurements are complete in practically all villages except those in the Sutlej and Ravi riverains where re-measurements await the completion of the Survey Department's traverse. Village records were completed and attested during the year for half the estates in the district.

The records of *Amritsar* District are now complete. The last assessment report, that of Ajnala, was submitted, and the new demand has been sanctioned and distributed since the close of the year.

In *Sialkot* rather more than half the measurements have been finished, but final attestation of the records is somewhat in arrears. Settlement operations are nearly complete in Daska and Raya. Good progress has been made with *killabandi* in Pasrur and Raya in the area coming under irrigation from the Upper Chenab Canal. The assessment reports of Daska and Raya were submitted by the Settlement Officer and the orders of Government on the former have been received.

The *Gujranwala* settlement was concluded at the end of the year. The year's work consisted chiefly in finally attesting the records of 200 villages, announcing and distributing the new demand throughout the settlement, and winding up operations. Settlement field operations in *Gujrat* were confined to remeasurement combined in some villages with map correction in the riverain villages of tahsil Gujrat and *killabandi* on the area coming under irrigation from the Upper Jhelum Canal in tahsils Phalia and Kharian. Record work is complete in the rest of the district having been carried out, along with map correction, in advance of the settlement by an officer placed on special duty for the purpose. The work of laying down *killas* has almost been finished, but repartition is not so far advanced and all the records have still to be prepared The assessment report of the Gujrat Tahsil was submitted during the year and the orders of Government have been received upon it.

Record work is complete in the portions of the Bhera Tahsil included in the *Shahpur* settlement, and in the Shahpur tahsil, where the work is almost complete, attestation has been brought in line with field work. The assessment report for these two tahsils was submitted, and is now with Government. Progress was made with map correction in portions of the Khushab Tahsil and with remeasurement in the riverain, and arrangements were made for remeasuring the Thal during the present cold weather with the aid of a traverse by a detachment of the Survey of India. A full year's work is still to be done.

In Lyallpur remeasurement work and records are now complete, and during the year Mr. Dobson's assessment report for the Rakh Branch circle received the orders of the Financial Commissioner and Government and the new demand was announced and distributed.

Final settlement reports.

11. The final settlement reports of Hissar and Gurdaspur were submitted to Government during the year, and orders on these were received. Mr. Coldstream's reports on the revision of the settlement of the Kulu sub-division which were received during the year, constitute his final settlement report under the orders of Government sanctioning the beginning of settlement. They were submitted to Government after the close of the year.

Comparison of estimates and forecasts in regard to duration, cost and results. Statement XIV.

12. In Kulu the settlement was completed three months before the prescribed date, and cost 25 per cent. less than the estimate. The expenditure will be recovered in 2½ years.

The Gujranwala Settlement was completed in four years against an estimated period of three years, and has cost Rs. 4,38,000, or Rs. 38,000 more than was expected. The assessments imposed which are largely of a fluctuating nature are expected to yield on the average practically the enhancement of Rs. 2 lakhs anticipated in the forecast, and the cost of settlement will be recovered in a little over 2 years.

In Amritsar a saving of Rs. 35,000 is expected, and the duration allowed will not be exceeded. Reassessment has resulted in an enhancement of Rs. 3,37,000 against an expected enhancement of Rs. 3,00,000, and the cost of settlement will be recovered in one year. The Settlement Officer of Dera-Hamirpur and Una expects to wind up his settlement at the end of the present year. The expectation is perhaps over-sanguine. The settlement has proved more difficult than was foreseen, and the estimated cost has already been exceeded. The cost is now expected to be rather over 5½ lakhs. Ferozepore Settlement will finish on the date laid down in the forecast and Hoshiarpur will be completed about the end of June 1914. In both the financial results of reassessment will considerably exceed the forecast, but the expenditure will be slightly more than the estimate. Both will be profitable.

In Lahore and Gujrat in which the revision of records was undertaken in advance of Settlement by an officer on special duty, the results anticipated from the experiment in reduction of duration and cost have not been realised, and both settlements will take longer than was anticipated in the forecast. It has now been decided to maintain the old practice under which a Settlement Officer has a full year at the beginning of settlement in which to supervise record work and obtain a general acquaintance with his district before beginning the work of assessment.

In Shahpur it has been found necessary to undertake remeasurement on a larger scale than was estimated to be required when the schedule was drawn up, and duration and cost will exceed the forecast, but the Settlement Officer is hopeful of finishing in March 1915. In Sialkot circumstances are similar but the Settlement Officer does not think the estimate of cost will be exceeded.

The assessment of the Lower Chenab Colony will be completed by April 1914—the date anticipated. The cost has been negligible as no measurements are in progress, and the Settlement Officer's staff consists of two naib-tahsildars and a small office establishment. The profits have far exceeded those of any other settlement conducted in the Punjab. On the Rakh Branch alone, where the new rates of assessment were announced during the year under report, the estimated increase is 13 lakhs of rupees per annum.

Proposed future settlement operations.

13. Sanction to the inception of settlement operations in Jullundur and in the remaining tahsils of Kangra was received during the year and both settlements began on 1st October 1913. Forecast reports are awaited from Simla and Montgomery, which are due for resettlement from October 1914.

Settlement staff.

14. One settlement was concluded at the beginning of the year, and in two districts, in which establishment for record work was already employed, assessment work began. The Kulu settlement came to a close during the year, and successive reductions of the staff were made in five other settlements. There was therefore no lack of trained men. By the end of the year, in consequence of the revised scheme of settlement operations providing for a gradual decrease in the number of settlements in progress, the number of settlement kanungos was in considerable excess of present and future requirements The opening of the Jullundur settlement did not entirely relieve the congestion, and the Financial Commissioner has under consideration the best means of reducing the excess which it is estimated will shortly amount to 150. The amalgamation of the lists of district and settlement naib-

tahsildars which was carried out three years ago promises to give us a very efficient combined establishment. No doubt Settlement Officers would prefer experienced settlement naib tahsildars to untrained men from a district establishment, but there is no reason why the average district naib tahsildar should not soon become a useful and efficient settlement naib tahsildar provided his transfer to settlement is not too long delayed. The practice in Lahore Division of making settlement, as far as possible, the first part of every naib tahsildar's career is a good one, and is what was contemplated when the lists were amalgamated.

Surveys.

15. The riverain detachment of the Survey Department continued its work of traversing and laying down base lines during the year. Theodolite stations were fixed, circuits traversed and bases demarcated along the Sutlej, Ravi, Chenab and Jhelum rivers in connection with the Ferozepore, Lahore, Sialkot, Gujrat and Shahpur settlements, and plotted sheets were supplied to the Settlement Officers. Twelve hundred square miles of circuit were traversed, and the expenditure amcunted to Rs. 21,906.

The Lower Bari Doab rectangular survey was completed. Nearly 15,000 rectangles of 25 acres each were laid down and over a thousand linear miles were traversed. More than half the work was tested by Naib Tahsildars, Tahsildars and Survey Officers. 16 per cent. was checked by theodolite traverse. The expenditure during the year amounted to Rs. 70,256. Operations extended over three seasons at a total cost of Rs. 3,18,278 against an estimated expenditure of Rs. 4,63,586. In all 2,883 square miles have been surveyed.

The services of the detachment were also obtained in providing an accurate framework for field measurements in the Khushab Thal and in compiling maps showing village boundaries. The traverse covered 1,967 linear and 1,070 square miles and 3,803 theodolite stations were laid out at a cost of Rs. 17,335.

In order to facilitate measurements in the Dera-Hamirpur settlement and to gain experience for the future patwari survey of the remaining tahsils of the Kangra District, an experimental survey was carried out in that district by the detachment on the basis of previous triangulation by the Survey Department. Points in suitable places in cultivation and along "*tika*" and village boundaries were picked up and plotted, and mapping sheets for 256 *tikas* were supplied to the Settlement Officer. The experiment proved successful and will be extended to the other tahsils. The triangulation and traverse of 637 linear and 81 square miles cost Rs. 5,712.

A topographical survey of 388 square miles in the Ludhiana District was made by the Survey Department.

Boundaries.

16. The trans-Ravi villages of the Gugera Tahsil of the Montgomery District, 140 in number, were transferred to Lyallpur during the year. This was the only important alteration in district boundaries, but discrepancies between Lahore and Ferozepore maps were cleared up by the Settlement Officer of the latter district, while the Settlement Officer of Hoshiarpur reconciled the maps of his district with those of Ambala and Ludhiana. In Ambala and Karnal several boundary disputes with the adjoining native states were settled, and in Sialkot the boundary with Jammu is being determined. In Mianwali the dispute with villages of Dera Ismail Khan has been disposed of, but similar questions in which villages of Kohat and Shahpur are involved are under consideration. The adjustments of the boundaries of Gurgaon and Rohtak consequent on the formation of the province of Delhi have already been referred to.

Record Rooms.

17. Year by year complaints become more frequent of the want of accommodation for Government records. At the present time space is reported to be insufficient in Rohtak, Gurgaon, Hoshiarpur, Lahore, Amritsar, Sialkot,

Gujrat and Jhang. New record rooms, or additions to existing buildings are in process of construction in Hissar, Kulu and Gurdaspur, and have been proposed in Rohtak and Gujrat. Arrangement of files in the new record room at Dera Ghazi Khan is complete, but the records of the two southern tahsils are still kept at Rajanpur.

The chemical preparation for the destruction of insects, mentioned in last year's report, has been entirely successful in Gujranwala, and will be recommended for use in all district record rooms.

Greater attention is now being given to destruction work which is up to date in most districts. The Clerical Establishment Committee has criticised the new draft rules for the destruction of records, and the draft will shortly be submitted for the sanction of Government.

The Copying Agency worked well during the year. The new rules under this head have been introduced experimentally in the districts of Jhelum and Sialkot and are reported to work well. It is hoped to introduce them shortly throughout the Province.

Other matters.

18. Over 18 lakhs of rupees due to Government were remitted by money-order. This method of payment is employed in every district except Simla. In Karnal and Montgomery sums remitted in this way exceeded two lakhs, and the Lahore, Gujranwala and Jhang figures are Rs. 1,90,024, Rs. 1,85,000 and Rs. 1,55,000, respectively. The system is said to be unpopular in Ludhiana (Rs. 7,285) and Lyallpur (Rs. 49,515), but is welcomed elsewhere, especially where communications are bad and the sums to be paid in are small. Almost half the total sum received in this way in Rawalpindi came from the Murree tahsil, where about one-quarter of the total revenue demand is paid through the post office, and Una was responsible for 60 per cent. of the total amount remitted in Hoshiarpur. The preference shown by lambardars for direct payment into the tahsil where the sums due are considerable and the tahsil is fairly accessible indicates that the tahsil officials are not really extortionate, but it is useful even in those cases to leave the lambardar this alternative method.

Small use is made of currency notes in paying the demand. Rupees 47,310 were paid in this way in Gujranwala, but the amount fell short of Rs. 8,000 in Lyallpur. The experiment in this direction made in Rohtak was attended with little success. Sanction became widely known too late to affect the payment of the kharif demand while in some villages there is difficulty in obtaining notes and lambardars are timid of entrusting them to the post. The system will be continued for a further term of 2 years. The system of requiring the Sadr tahsil revenue accountant to attend at the Sadr treasury when payments are heaviest, noticed last year as in force in Amritsar and Jhelum, has extended to Hoshiarpur, Multan and Dera Ghazi Khan, and has proved a convenience. It is now the custom for Settlement Officers in reporting their proposals for the payments of the revenue demand to arrange, by fixing different dates for different villages that only a manageable amount should fall due on each day of the period of payment Not only is the work of accounts facilitated by this arrangement, but the tahsildar and his naib are also enabled to supervise the work of lambardars more conveniently, and the feasibility of adopting it generally might be considered by district officers.

Enhancement of rent.
Statement No XV.

19. Suits against occupancy tenants for enhancement of rent show an increase from Rs 1,666 to Rs. 1,772. Plaintiffs were successful in 1,446 cases. Delhi, which was responsible for 63 decrees last year, is no longer a Punjab district, and in Hoshiarpur only 362 suits were decreed against 479 last year. But in Jullundur suits of this kind rose from 466 to 730 and in Rohtak from 50 to 102. The general rule is that owners revise the rents of their occupancy tenants when Government revises its demand and this is not surprising when it is remembered that rents at revenue rates with or without *malikana* are taken on almost 71 per cent. of

the occupancy tenancies throughout the province. The Deputy Commissioner, Rohtak, explains the increase in his district by the awakening of the owners in the Jhajjar tahsil to the fact that they are entitled to recover some "*malikana*" at least, over and above the land revenue and the cesses, and the explanation from Jullundur is the expiry of the term of Settlement. Suits of this class are rare in the Rawalpindi division and are practically unknown in the Multan division, where the owner generally takes in kind. Institutions were heaviest in Jullundur (730), Hoshiarpur (362) and Gurdaspur (247), but in Ambala and Ferozepore where occupancy tenants are numerous there were no suits at all for decision. Twenty-two suits for reduction of rent were decided in Jullundur District, and 9 in Sialkot, the tenant failing in them all. The Commissioner of Lahore notes a divergence of practice in Sialkot as to the principles governing enhancement of rent, and has the necessity of issuing instructions under consideration. In Hoshiarpur rents show no tendency to rise or fall. In Sialkot the pitch of cash rents is rising, but rents in kind are preferred by landlords and are more common while *chakota* rents remain at the traditional rates.

Ejectments.
Statement No. XVI.

20. Applications to eject occupancy tenants continue to be rare, but more tenants-at-will have been ejected during the year by legal process than in any of the three preceding years. In the south-west and western portions of the Province comparatively little action was taken under the ejectment sections of the Act. In Dera Ghazi Khan tenants are hard to find and in Montgomery the scarcity of tenants is said to be growing acute, while the Deputy Commissioner, Lyallpur, writes—"Increased assessments, and the colonization of the Ganji Bar, have reacted on the tenancy question, and landlords will have to treat their tenants well to keep them in future". But in the rest of the province, Hoshiarpur, Jullundur and Amritsar are the only districts in which applications to evict tenants-at-will have fallen off. In Hoshiarpur the decrease from 1,897 to 1,498 has occurred, it is said, because the rush caused by settlement is over, and the decrease from 1,824 to 849 in Amritsar may be explained in a similar way. The small increase in applications in Sialkot and the enormous increase in Gujrat, where the number has risen from 652 to 1,115, are also ascribed to settlement, and in Lahore the volume of business of this kind is much larger than in the years before the record came under revision. Other causes, however, are also at work. The Commissioner of Ambala notices the landlords' fear that long continued unbroken possession by a tenant may mature into occupancy rights. As tenants' profits rise with the rise in yields and prices there is doubtless a greater reluctance to return the land to the owner. It is curious that in Gurgaon the good harvest of last *rabi* is assigned as the cause of the increase in applications from 364 to 732, while in Rawalpindi the increase in both applications and notices is put, down to the bad *kharif* of 1912. In the whole province 26,368 notices of ejectment were issued against 23,094 in 1912, and decrees of ejectment were made in 2,593 contested cases. In 6801 cases the tenants did not contest liability to ejectment, and this represents 56½ per cent. of the applications made as compared with 59 per cent. in 1912, 55½ per cent. in 1911 and 67½ per cent. in 1910. Tenants' suits to contest ejectment were successful in 916 cases. The ejectments actually made under order or process of court numbered 6,163, a somewhat higher proportion of the applications than in the two preceding years.

The Deputy Commissioner, Rohtak, reports that the procedure under chapter IV of the Tenancy Act is adopted in the original tahsils of his district as a cheap means of collecting rent, whereas in Sonepat, the tahsil added to the district in consequence of the formation of the province of Delhi, it is more a result of real disputes between landlord and tenant. In Hissar a practice which had crept in and which the Deputy Commissioner after consulting the Commissioner has rightly stopped, of absolving parties from producing documentary evidence and of calling on the Sadr Kanungo to prepare an extract from the revenue records had encouraged litigation of a speculative kind.

In spite of plague and colonization, throughout the greater protion of the province landlords are in a strong position, able to select their own tenants, and to choose between and realize in full the customary rates of rent. And the small extent to which tenants have been able to assert successfully a claim to occupancy rights is a good indication of the accuracy with which tenant right has been recorded in the revenue papers.

Descent of Jagirs Act.

21. No notifications under Punjab Act IV of 1900 were made during the year. The total number of jagirs gazetted under the Act remains at 139 with an annual value of nearly 8 lakhs of rupees.

Northern India Canal and Drainage Act.

22. Local variations in the rainfall caused wide differences in the keenness of the demand for water from the perennial canals. Sufficient rainfall in Ludhiana and Ferozepore Districts led to a decrease of 70,000 acres in the area irrigated from the Sirhind Canal. On the other hand a weak monsoon and late winter rains in the Ambala Division occasioned a large extension of irrigation from the Western Jumna Canal, the increase in Karnal being as much as 25 per cent. The supply generally was equal to the demand.

Irrigation from the Upper Bari Doab Canal appears to have been normal, but in the west of the province the conditions of the Ambala Division repeated themselves. There was an unusually large demand for water in Lyallpur throughout the *kharif* and especially for *rabi* sowings. The supply proved unequal to the demand and closures were long and inopportune. Fortunately the rain which fell at the end of the February saved the situation. The Upper Chenab Canal irrigated for the first time during *kharif* 1912. In Sialkot the irrigation was of a make-shift character as the water-courses had not yet been dug. In Gujranwala the unexpected opening of this canal was a great boon and wholly beneficial.

There are complaints from Lahore that alteration of outlets is giving rise to some agitation and the Deputy Commissioner observes that in only one case has he been consulted by the Executive Engineer on the subject. It is highly important that the orders issued in 1910 * for free consultation between district and irrigation officers should be cordially carried out. Reduction in the size of outlets in the upper reaches has led in Lyallpur to marked improvement in the supply to tail villages, and may lead to increased and better irrigation in Jhang, where complaints are again made that a fair share of water, especially in the spring is not received.

* Correction Slip No. 19 to Standing Order No. 61.

The rules for the periodical revision of the *nahri parta* gave a reduction of Rs. 2,916 on the assessment in Gurgaon and there were smaller remissions in Hissar and Rohtak. The system is reported to be appreciated by the zamindars, but it is not clear that increases, when due, are secured to Government. The Financial Commissioner will take an early opportunity of examining the working of the rules. Very varying success attended the working of the inundation canals. In Montgomery the Upper Sutlej Canals started early and ran successfully, and the matured area rose 12 per cent. The Lower Sutlej Canals in Multan, however, had a poor year. Floods were of fair frequency and more than average intensity, but the river rose late and slowly and fell early, and there was an almost total absence of rain. Supplies were not sufficient to mature the crops sown, and both sown and matured areas were below average. Although there was practically no flood in the Ravi, the Sidhnai Canal irrigated the same area as last year but *kharaba* was as high as 44 per cent. The Chenab Canals in Multan had a fair year. In Muzaffargarh the supply was below average. The canals did not run at all in April, the supply was below average in every succeeding month, and the rivers fell early The gross area irrigated, however, reached the high figures of last year. This may be due to the introduction of iron pipes in place of *kachha* outlets, a change which enabled

water to be taken to the tail villages without the use of rotational closures of the upper outlets.. The innovation caused numerous complaints when the canals began to run, but was gradually accepted by the irrigators as the season went on. Its effects should be mentioned in next year's district report.

Minor Canals and Irrigation Works.

23. Four private canals in the Hoshiarpur district were scheduled during the year under the Minor Canals Act. In the same district the construction of a head works regulator for the Shah Nahr canal has been taken in hand. There was an increase of almost 3,000 acres in the area irrigated, and the financial result was a profit of Rs. 4,000. The Rangoi Canal in Hissar, which was constructed as a famine relief work and was till recently in the hands of the Irrigation Department, has been placed under the management of the District Board as the result of recommendations made at the recent settlement of the district, but it is recognised that its chances of proving profitable are small. The September and early winter rains proved useful to the Sarusti Canal in Karnal, which irrigated 22,000 acres, compared with 11,000 last year, and gave a profit of nearly Rs. 18,000. The Grey Canals also had a successful year. The irrigated area exceeded 1,40,000 acres, an increase of about 37 per cent. on last year, and the water advantage rate yielded Rs. 51,208 against a previous demand of Rs. 42,248. Improvements effected on the Kitchin Canals in Montgomery led to an increase in the irrigated area from 22,700 acres to 30,116 acres, but the failure of winter rains resulted in wholesale failure of the *rabi*, particularly in the crown waste, and the revenue fell from Rs. 20,270 to Rs. 17,000. The remodelling of the Gharak and Gharkana Canals has been held in abeyance owing to the prohibitive cost and apprehension of the effect on the Ravi of the completion of the Balloki weir. Judicious silt clearances, however, caused a considerable increase in the area matured. The Nammal Dam in Mianwali is now completed and has been opened by His Honour the Lieutenant-Governor. Distributaries have still to be constructed, and funds have been provided for this purpose. Proposals regarding the agency by which the canal will be worked will be submitted shortly. The Kurram Canals in the same district ran satisfactorily. Several new dams have been constructed in villages beyond river action, and irrigation through cuts from the Indus has been attended with success. On the whole the *bunds* in Gurgaon worked well. Unfortunately, heavy rain in September caused many of them to breach, and the matured area fell from 13,265 acres to 8,749 acres. An expenditure of over Rs. 10,000 was incurred on the maintenance of the *bunds*, and more would have been done had funds been available. The year's demand of Rs. 12,677 has been collected practically in full. Expenditure exceeded income, however, by about Rs. 4,000.

Land Acquisition Act.

24. Compared with last year the area of land taken up for public purposes was very small—5,473 acres as against 17,698. Of the area taken up four-fifths was for canals, and most of this was acquired for the canals of the Triple Project. The price averaged Rs. 121 per acre as against Rs. 123 per acre last year. The high prices paid for urban land are as remarkable as last year. In Amritsar a small plot was acquired at the phenomenal rate of Rs. 79 per square foot. The number of years purchase of the land revenue represented by the acquisition price varied from 22 to 1,947.

Loans Acts.

Statements XVII, XVIII, XIX, XX, XXI, XXII.

25. Loans amounting to nearly 2½ lakhs were advanced under the Land Improvement Loans Act, and rather more than 5 lakhs under the Agriculturists' Loans Act. The outstanding balance at the beginning of the year was rather over 19¾ lakhs. Over 6½ lakhs were due for collection during the year, and the actual collections made amounted to Rs. 6,35,000. The outstanding balance at the close of the year was almost 21 lakhs, of which over Rs. 43,000 were suspended by competent authority and rather more than Rs. 16,000 were overdue.

Interest due for collection amounted, according to district officers' returns from which statement XX is compiled, to Rs. 1,18,000, of which Rs. 3,000 were suspended, Rs. 1,11,600 were collected, and Rs. 2,633 remained overdue. But statement XXII which is prepared from the Accountant-General's returns and takes full account of supplementary credits ascertained at the end of the financial year closing on March 31st, shows that the interest collected amounted really to nearly Rs. 1,68,000 and that the net profit to Government from loans made under both Acts amounted to over Rs. 92,000, a result better than in any of the five preceding years with one exception.

Under the Land Improvement Loans Act, the amount of loans made varies with the requirements of each district and with the interest of District Officers. In the Ambala Division where there was no great activity in sinking wells, the advances made during the year fell well short of Rs. 20,000. In the Multan Division on the other hand, where the wells constructed or repaired during the year numbered 2,187, fresh loans exceeded Rs. 88,000. Of this sum only Rs. 650 were taken by Jhang District, while as many as 111 new wells were constructed at private expense during the year. In Ferozepore advances have risen from Rs. 1,450 in 1909-10 to Rs. 56,827 in 1911-12, and Rs. 46,765 in the year under report, and the apprehension expressed by the Commissioner last year that the granting of loans may have been pushed too far was not without foundation, for during the year it was found necessary to recover over Rs. 7,000 advanced to *mala fide* applicants. Roughly one well in every eight is sunk with Government assistance.

The Deputy Commissioner, Hoshiarpur, again reports that the assistance afforded by Co-operative Societies enables the zamindars to dispense with Government loans, and the demand is said to be falling off in Gujranwala for the same reason.

The outstanding balance exceeds a lakh or rupees in Multan, Attock, Gurgaon, Muzaffargarh and Ferozepore. In Multan it exceeds 3½ lakhs, but is somewhat less than the balance of last year, and in all the above-mentioned districts some reduction has been made in outstandings except in Ferozepore where most of the advances are of recent date and there has been an increase of Rs. 29,000. The value of Government loans in Attock District, where an extension of irrigated cultivation is particularly desirable, is indicated by the fact that out of close on 200 new wells almost one-third were constructed from *takavi* advances. The loans generally are applied to the purposes for which they were granted, and the reports received show that improvements made receive on the whole satisfactory inspection.

The Commissioner of Lahore notes that owners of wells frequently fail to apply for remission of the demand, and that their right to certificates does not come to light till settlement operations begin. In Gujranwala in particular out of 1,956 exemption certificates granted no fewer than 1,933 were granted by the Settlement Officer in the three tahsils under settlement Periodical statements are now submitted to the Financial Commissioner showing the extent to which improvements have been relieved of the land revenue demand, and the duties of District Officers in this respect are, where necessary, kept prominently before their eyes.

No advances under the Agricultural Loans Act were made in the Rohtak, Simla, Kangra, Hoshiarpur, Jullundur and Lyallpur Districts, and the Ambala and Jullundur Divisions took only Rs. 12,000 out of the total amount of over 5 lakhs advanced. The majority of the loans were required for the purchase of bullocks, but considerable advances for fodder were made in Attock, Rawalpindi, Jhelum, Sialkot, Gujrat, Mianwali and Muzaffargarh, and in some of these districts loans for the provision of seed were also necessary. The Deputy Commissioner, Sialkot, notes that loans made for the purchase of cattle are generally applied to the purposes for which they were made, but the same cannot be said of those given for seed and fodder, and the Deputy Commissioner, Muzaffargarh, has a similer experience.

The necessity of legislation with a view to legalise *takavi* advances to Co-operative Societies was under discussion during the year. A suggestion to that effect was made by the Conference of Registrars, but was negatived by the Government of India. There is, however, no legal objection to loans intended for members of Co-operative Societies being distributed through the agency of the societies, and the Financial Commissioner has under consideration the advisability of adopting this method.

The District Officer of Rohtak is alone in thinking *takavi* unpopular, and the Deputy Commissioner of the neighbouring district of Gurgaon notes that the system is very popular, and loans are generally applied for and punctually paid. The system is growing in popularity in Multan, and similar reports come from half a dozen other districts. Punctuality in repayment is a virtue still to be learned by many Punjab peasants, and the Financial Commissioner does not think that our methods are open to the objection of undue rigidity. Multan and Muzaffargarh alone notice any difficulty in collections.

Forest Act.
Statement No. XXIII.

26. Mr. Sheepshanks has submitted a report on the forests in the Kangra *jagirs*. The intention is to notify them on the lines followed in dealing with the forest in the remainder of the district. The Financial Commissioner hopes to submit the report to Government during the current year after receiving the Conservator's opinion. Proposals from the same district to transfer to the Deputy Commissioner certain undemarcated scrub forests have received the general approval of Government, and arrangements are being made to introduce district management as an experiment in selected portions of the Nurpur Tahsil. In the Dera Hamirpur settlement progress continues to be made with the demarcation of private owned waste on which the trees belong to Government. The management of the Shahpur Kandi forests in Gurdaspur district continues to be satisfactory.

The honorary forest naib tahsildars in charge of the *guzara* forests in Murree and Kahuta tahsils are reported to be working well and to have the confidence of the people. It is not easy to find men fit for these posts, but so far suitable pensioned military officers have been available when necessity arose. The payment of income from thinnings in village *guzaras* to the right-holders should still further impress on the people that Government preserves the *guzaras* in their interests alone. Punitive measures, however, were necessary to check thefts of wood from *guzaras* within easy reach of markets, and especially from those bordering on the Jhelum.

In Dera Ghazi Khan where all the *rakhs*, including those on the books of the Forest Department, are now under the control of the Deputy Commissioner a plan of operations remains to be drawn up by that officer.

Government Lands.
Statement No. XXIII.

27. There is again little to record as to the management of State lands by Deputy Commissioners. The area under district management in Montgomery has fallen 85,000 acres owing to the rectification of the district boundary and to acquisition by the Canal Department. In Gujranwala District 3,864 acres in various rakhs commanded by the Upper Chenab Canal were sold at an average price of Rs 227 per acre. The prices obtained were very high as much of the land sold will receive *kharif* irrigation alone. General proposals are awaited for the leasing of the detached rakhs in the Attock District with a view to obviating difficulties in management.

The fall of over 30 per cent. in the area of Government land held by colonizing tenants is due to the widespread acquisition of proprietary rights in Lyallpur, where nearly 700,000 acres have been purchased by the previous tenants. Last year's returns continued to show as Government land in column 9 of Statement XXIII the area which, though purchased by peasant grantees, had not yet been transferred to their names in the revenue records owing to the mutation procedure not having been completed and the figures

of the year, therefore, give effect to the transactions of two years. The same readiness to acquire proprietary rights has not been shown in Jhang where purchasers are said to be deterred by the fear that the water-supply may be reduced.

Punjab Land Preservation (Chos) Act.

28. he whole question of the measures necessary to prevent the destructive action of chos in the Hoshiarpur and Ambala Districts and to reclaim land previously affected was discussed during the year. The policy of constructing expensive bands to restrain chos in their lower reaches has been abandoned, and work of this nature will be confined to maintaining in repair a few of the less expensive and more effectual bands in the Hoshiarpur District. With this will be combined reclamation operations by the planting of *kharkhana* grass in suitable localities. But in future the line of main action will be in the direction of reafforesting the western slopes of the Siwaliks. The general proposals in this connection made by Mr. Holland, I. F. S. while on special duty received the approval of Government, and he was deputed to carry them into effect in both districts concerned. He joined his appointment at the end of the year. Proposals to extend the Katardhar area in Hoshiarpur and to make certain further uses of the provisions of the Act were exhaustively reviewed by Mr. Fagan, while officiating as Financial Commissioner, and are now with Government. Pending the decision of future lines of action, protective and reclamation work was practically suspended during the year.

General Statement of owned and mortgaged land. Statement III.

29. The decrease of 325 villages in the province is chiefly due to the exclusion of the Delhi enclave, but the consequent loss of cultivated area is almost counterbalanced by an extension of cultivation elsewhere, and the cultivated area has fallen only 9,558 acres. The total number of landowners and shareholders has fallen by 3,000, but jamabandi holdings are practically as before, which suggests that sub-division of holdings continues to increase.

The average size of a holding is 12½ acres of which 8 acres are cultivated. Members of notified agricultural tribes hold 86 per cent. of the cultivated area, and their holdings average 11½ acres of which 7½ acres are cultivated. The incidence of the assessment on the cultivated area is Rs. 1-2-11 per acre.

The cultivated area under mortgage has fallen from 12 per cent. to 11·7 per cent. of the whole. The heaviest percentage of the total cultivated area mortgaged is in Sialkot (24 per cent.), Gurdaspur (22 per cent.) and Gurgaon (20 per cent.).

Transfers. Statement No. XXIV.

30. Exchanges show a considerable decrease in number, but are still numerous, as the process of sub-dividing and consolidating holdings continues. Gifts were also less frequently made than before.

The cultivated area (including taluqdari and occupancy rights as well as ownership) sold during the year amounted to 198,027 acres. Mortgages were effected on 247,345 acres of cultivated land, while 297,625 acres were redeemed, but the new mortgages were at the high rates now prevailing and consequently debt secured by mortgage as measured by the excess of the mortgage-money secured by new mortgages over the value of mortgages redeemed rose by over 72 lakhs of rupees. Rohtak is the only district in which the burden of debt on the land has been reduced. It is noteworthy that in Lyallpur the acquisition of proprietary rights by colonists on the easy terms offered by Government was accompanied by a rise in the mortgage debt from Rs. 47,190 to Rs. 7,35,016.

The areas sold were largest in Gujranwala, Hissar, Jhang, Ferozepore and Multan. In the first named district and in Jhang the figures are swollen

by the inclusion of sales by Government of proprietary rights in Colony lands, but sales in old villages are also numerous. In Hissar the returns include three entire villages sold by the Skinner family. Permanent alienations are avoided as far as possible in the central districts of the province On the other hand, temporary alienations are most numerous in the central districts of Ferozepore, Sialkot, Lahore and Gurdaspur and in Hissar, Rohtak and Gurgaon. Redemption of mortgages goes on fastest in practically the same districts, and it is evident that even where the encumbrances on the land are increasing the landowner is alive to the possibility of benefitting from the rise in the value of land by redeeming and remortgaging encumbered holdings.

Several District Officers notice the popularity of the Punjab Redemption of Mortgages Act (II of 1913), and in Attock, Gujrat, Gurdaspur, Rohtak and Amritsar the passing of the Act was followed by a rush of applications. In other districts also the new enactment is becoming known, and is welcomed as a boon by mortgagees. Very little opposition has been offered by money-lenders, and the Act is reported to be working smoothly.

Abstract of Transfers.

Statements Nos. XXV XXVI and XXVII.

31. The statistics of sales and sale price are largely vitiated by the inclusion in the Gujranwala, Lahore and Jhang returns of sales of proprietary rights by Government to colonists, and by their exclusion from the Lyallpur returns. In future a uniform practice should be observed, and it will be convenient to exclude such sales from the statements, the area sold, with detail of cultivation and price realised, being noted in the explanatory paragraph. All that can be said this year about the amount of transfer by sale is that it probably does not exceed the average of the years following the passing of the Land Alienation Act and preceding the sale of rights to colonists. Sales by Government in Gujranwala exceeded 49,000 acres, and it is evident from column 19 of statement VIII that the areas of a similar kind in Lahore and Jhang, included in Statements XXIV—XXVI, which represent the areas for which mutation of names has been effected in the revenue records, must be considerable. Sales of a normal nature are probably not much in excess of 210,000 acres. They have increased in Karnal, Jullundur, Ferozepore, Gurdaspur, Sialkot, Multan and Muzaffargarh, but have fallen in Amritsar, Lahore, Gujranwala, Gujrat, Attock and Mianwali. All districts notice a rise in the value of land except Jullundur and in that district the acquisition by Government of considerable areas for railway and other public purposes is said to have affected the price. If so, the circumstance is unusual for the price paid for compulsory acquisition is generally much in excess of the market price. The average sale price for the province of Rs. 107 per acre cultivated is depressed by sales to colonists on the Lower Chenab Canal at Rs. 12½ per acre, and the mortgage money per acre, which is not affected by abnormal transactions, has risen, from Rs. 106 to Rs. 109. The multiple of the land revenue represented by the sale price of land is shown in Statement XXIV. It is very noticable that in none of the recently assessed districts has the multiple fallen. The increases in Sialkot (from 102 to 141), Gujrat (101 to 149) and Mianwali (146 to 202) are ascribed to enormous rises in the value of land, and a similar explanation is given of less striking increases in Ludhiana, Rawalpindi and Attock. In Montgomery, where well-to-do people are keen to acquire land even at high prices in anticipation of changes in the condition of the district the multiple has risen from 242 to 320. The district officers of both Hissar and Muzaffargarh note that the multiple varies with the nature of the land sold. In Hissar the multiple has fallen from 71 to 64, as a smaller proportion than before of the land sold was irrigated. The conclusion is that vendors place a higher relative value on irrigated land even under the recently revised assessment, but the Deputy Commissioner of Rohtak, in whose district the multiple has risen from 53 to 86, remarks that the average zamindar, when he decides to invest in land, is in too great a hurry to stop to calculate whether the return will be a fair percentage on his capital.

In Muzaffargarh the multiple has risen from 127 to 152, and the explanation seems to be that about four-fifths of the land sold this year was unassessed waste against two-thirds last year.

Notification of tribes under the Land Alienation Act.

32. Several District Officers note that no alteration or amplification of the lists of agricultural tribes is required. All that remains now to be done is to include in the lists of agricultural tribes such bodies of true agriculturists as have so far been overlooked on account of their numerical unimportance. In Lyallpur the widespread creation of proprietary rights has made the Act of much more significance, and Awans and Labanas have applied for notification as agricultural tribes. The Bahrupias of Gujrat and the Chhangs of Kangra were notified during the year, and the cases of Bahtis and Sainis in the latter district were taken up. The application of the Brahmans of Lahore was rejected, but the Tarnaich Brahmans in Pathankot Tahsil, the Barsotra Brahmans in Shakargarh Tahsil and the Dat Brahmans of Gurdaspur District and the Raya Tahsil of Sialkot District were notified as separate groups. The same action was taken in the case of Native Christians in the Gujranwala and Lyallpur Districts.

Rules and orders.

33. No special instructions were issued during the year. The existing instructions for the suppression of benami transactions, however, were amended to make it clear that if a decree of a competent court is produced the Revenue Officer should unhesitatingly give effect to it in the mutation register. The question of amending section 14 of the Act was raised and opinions were called for from District Officers. These have been received, and the case will shortly be submitted to Government for orders.

Evasions.

34. The freedom with which permission is sought to alienations in contravention of the Act is a fair indication of the difficulty of evading its provisions. In one or two districts no addition to the burden of work is said to have been occasioned, but in other districts such applications were fairly numerous, and in Attock they numbered almost 400. Everywhere benami transactions are decreasing. The real alienee has little security, and the success of the orders passed last year for the scrutiny of suspicious cases has deterred others from attempting the same expedient. The most general form of evasion is by means of incorrect tribal designation, and this method is not open to the members of the main money-lending classes. In Karnal wrong entries are made in the deed of transfer, but in Amritsar, Multan, Rawalpindi and Attock application is made for correction of the entry in the Revenue Records. As many as 42 unsuccessful applications of this kind were made in Rawalpindi District, and there is a tendency in that district for men of menial castes to assume double-barrelled caste names such as "Julaha Janjua." In Attock correction of tribal entry was refused to Telis who claimed Awan descent and had obtained a collusive decree in a Civil Court. The question of entries of tribe in the Revenue Record is not free from legal difficulties. The immediate purposes of the Act in this respect are provided for in the Financial Commissioner's circular letter No. 6 of 13th December 1906, which the Financial Commissioner proposes to republish in the Standing Orders. But more general instructions are required, if only to provide for the cases which may arise on any modification in future of the lists of agricultural tribes.

The only new device for circumventing the Act is the practice reported from Gujrat and Mianwali of making additions to the debt secured by an existing mortgage effected before the Act was passed and thus bringing the amount of mortgage money up to the sale value of the land. In many of these cases the effect of increasing the mortgage burden is that it becomes unlikely that the mortgage will ever be redeemed. The Financial Commissioner has the question under consideration.

As promised in last year's report the prevalence of the practice of making long term leases, which are mortgages in disguise, was enquired into, and the result was to show that the Act has been so abused in only a very few districts, and even in those districts the abuse is not common. There is no necessity at present for legislation, but Collectors are being instructed to be on the look out for evasions of this kind so that if they become more common action may be taken.

Working of the Act. Statement XXV.

35. Agricultural tribes mortgaged 257,822 acres and redeemed 307,045. Of the total area mortgaged 230,605 acres were mortgaged to agricultural tribes, and 74,162 acres to non-agriculturists. Of the area redeemed 281,404 acres were redeemed from agricultural tribes. Transactions of all kinds were more numerous than in the preceding year, and the gain of 50,000 acres by release from mortgage of land belonging to members of notified tribes is particularly satisfactory in view of the unusally large amount of land purchased by them. The increase in the area mortgaged to non-agricultural tribes is evidence of their increased willingness to accept the temporary alienations permitted by the Act. The total area sold was 306,698 acres. Of this, agricultural tribes sold 182,941 acres, or a thousand acres less than last year, and acquired 253,556 acres, or about 39,000 acres more than last year. This includes proprietary rights purchased from Government in Gujranwala, Jhang and Lahore, but not land auctioned by Government in Gujranwala in August last Agricultural tribes have therefore gained over 70,000 acres. According to statement III, even after allowing for the exclusion of the Delhi enclave, the gain is 175,000 acres, but for the reasons given last year the comparison is misleading. Non-agricultural tribes acquired by purchase 53,142 acres, practically the same figure as last year, and sold 123,757 acres which includes the sale by Government of proprietary rights in about 60,000 acres The average sales by non-agricultural tribes in the years immediately preceding the sale of proprietary rights by Government was about 64,000 acres, so that they alienated only the normal amount of land. On the other hand they acquired less land than in any year since the passing of the Act, except 1910-11. It is clear that the Act is having its intended effect of confining the interest of non agricultural tribes in the land to temporary occupation, and the high prices prevailing during this and previous years have enabled the process of re-propriating the cultivating classes in land permanently alienated to go on at an increased rate. There is no evidence that the Act is working only in the interests of large investors who are members of agricultural tribes, and the extent to which alienations are made to members of the same village community is a proof of the general benefit to the cultivating classes.

Business Returns—Statements No. XXVIII and XXIX.

36. Revenue Court cases under each of the Acts (XVI and XVII of 1887) show an increase of 3,000 on last year. Cases under the Land Alienation Act have increased by 1,000 and miscellaneous Revenue Officers' cases have gone up by 9,000. But in spite of the smaller number of Revenue Officers employed disposals show a corresponding increase, and the pending file is very little heavier than at the end of last year. In Hoshiarpur over 3,000 cases more than last year were decided, but the pending file remains in excess of 2,000. Cases for disposal are also numerous in Multan, Muzaffargarh, Gujrat, Shahpur, Jullundur and all the districts of Lahore Division except Amritsar. In all these districts, however, except Shahpur, disposals were satisfactory. Land alienation cases are numerous in Hoshiarpur, Jullundur and Rawalpindi and have almost trebled in Gujrat. In Gujranwala there is a pending file of almost a thousand partition cases, and it has been necessary to employ a special temporary establishment. The increase in work of this kind is due to the anticipation of irrigation from the Upper Chenab Canal. In the Pindigheb sub-division of Attock several long-pending cases involving large areas of *shamilat* have been settled, but partition work is still heavy.

Institutions on appeal and for revision in the courts of Commissioners and Financial Commissioners rose from 4,359 to 5,793. Final orders were passed

in 5,143 cases. The pending file stands at over a thousand cases, of which 130 have been pending more than three months.

Tour of Commissioners.

37. The returns of touring done by Commissioners are for the financial year 1912-13 :—

Ambala.—Mr. A. Meredith, C.S.I., held charge for 329 days and spent 72 days on tour. Lieutenant-Colonel C. M. Dallas, C.S I., was in charge for 36 days and spent 12 days on tour.

Jullundur.—Mr. P. J. Fagan was Commissioner for the whole year and spent 119 days on tour.

Lahore.—Mr. R. Humphreys held charge for 14 days and Mr. H. A. Casson, C.S.I, for 216 days. The latter officer spent 44 days on tour. Lieutenant-Colonel C. M. Dallas, C.S.I., was in charge for 135 days and spent 67 days on tour.

Rawalpindi.—Mr. H. J. Maynard held charge for 271 days and Lieutenant-Colonel F. Popham Young, C.I.E., for 93 days. The former spent 139 days on tour.

Multan.—Mr. C. J. Hallifax was Commissioner for the whole year and spent 106 days on tour.

No.

I.—Analysis of chief statistics.

II.—Cultivating occupancy of land.

III.—Owned and mortgaged land.

IV.—Incidence of revenue.

V.—Fixed land revenue (including service commutation), demand, collections and balances.

VI.—Amount of land revenue held under suspension.

VII.—Alterations in the fixed land revenue demand.

VIII.—Collections and balances of fluctuating and other revenue.

IX.—Alluvion, diluvion and destructive inundation.

X.—Land revenue assignments.

XI.—Coercive processes for collection of land revenue.

XII.—Progress made in re-measurement and attestation.

XII-A.— Ditto ditto.

XIII.—Progress made in re-assessment.

XIV.—Duration and cost of settlement operations.

XV.—Enhancement or reduction of cash rents.

XVI.—Ejectment proceedings under the Tenancy Act.

XVII.—Disbursements, collections and outstandings on account of Act XIX of 1883.

XVIII.— Ditto ditto ditto Act XII of 1884.

XIX. Remission orders and certificates of exemption.

XX.—Account of Local Government with agriculturist borrowers.

XXI.—Loans made under the Land Improvement and Agriculturists' Loans Acts.

XXII.—Result of loan operations to Local Government.

XXIII.—Area and income of unclassed forests and of other Government lands.

XXIV.—Sales, mortgages, redemptions and other transfers.

XXV.—Abstract of mortgages, sales and redemptions.

XXVI.—Sales of land.

XXVII.—Mortgages of land.

XXVIII.—Work done by Revenue Officers.

XXIX.—Appellate and revisional work of Commissioners and Financial Commissioners.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Department of Revenue and Agriculture (Revenue), No. 44, dated 12th April 1915.

READ—

The Annual Report on the Land Revenue Administration of the Punjab for the year ending 30th September 1914, forwarded with letter No. 193, dated 25th February 1915, from the Junior Secretary to the Financial Commissioners, Punjab.

REMARKS.—In the south-east of the Province the early cessation of the monsoon in 1913 caused extensive failures of unirrigated kharif crops. Conditions in that area were unfavourable for the rabi as well, as the winter rains were long deferred and scanty. Elsewhere the crops were generally about average, but in the north-west they were particularly good. On the whole, sowings were 3 per cent. and crops 2 per cent. below normal; but the heavy and untimely rains over most of the Province early in May when the rabi crop was being reaped, considerably reduced the outturn. Prices of cotton and gur were not quite so favourable to the cultivator as in the preceding year, but prices of food-grains continued to rule high owing to the scarcity in the United Provinces rather than to the demand for export by sea which was less brisk than usual.

2. The effect of these conditions was that, while it was found necessary to suspend 7¼ lakhs in the Ambala Division, 4 lakhs of arrears were collected in the Rawalpindi Division. The fixed demand was over 212 lakhs, and the unsuspended outstandings at the close of the year were less than Rs. 16,000.

3. The fluctuating land revenue rose from 110 lakhs to over 118 lakhs owing partly to the resettlement of the colony areas under the fluctuating system and partly to the re-assessment of fixed land revenue which had not been brought on to the rent roll by the end of the year. Increases in the area irrigated by the Upper Chenab Canal and re-assessment of the extensions of the Gugera Branch account for an enhancement of over 6 lakhs; whilst an addition of Rs. 1,06,433 in Multan is attributed in part to more careful crop inspection and closer supervision. Assessments of fluctuating revenue are now being more carefully supervised, and as a rule the Settlement Officer's estimates are more closely worked up to. Collection is easy, and the system is generally appreciated in the canal colonies and the south-west of the Province where it has been in force long enough for the people to realise its advantages.

The demand under the head of "Other Land Revenue" shows a drop of 3 lakhs to 49 lakhs, due mainly to smaller sales of proprietary rights to colonists on the Lower Chenab Canal. Auctions of Government land on the Lower Bari Doab Canal and Upper Chenab Canal increased the receipts from sale of waste land to 18½ lakhs.

4. The total fixed and fluctuating revenue in the Province was 330 lakhs as compared with 233 lakhs in 1901-02. During that period the amount of the fixed revenue has risen very slightly; that of the fluctuating has increased more than four-fold. But whereas in 1901-02 nearly 40,000 processes were required for the collection of 206 lakhs, in 1913-14 no more than 12,500 were issued to aid in the collection of a demand more than half as high again. The contrast is striking, but there is still room for improvement.

In the districts of Jhang, Multan, Muzaffargarh and Dera Ghazi Khan the number of processes issued has always been large, and the big landlords appear to be the chief defaulters. The fact, however, that the number of processes issued on behalf of lambardars during the year was in Dera Ghazi Khan twice, and in Muzaffargarh three times, as high as last year, whilst the warrants of arrest executed in Muzaffargarh amounted to more than a quarter of the total for the Province, indicates that special causes existed to account for these figures. His Honour will be glad if the Financial Commissioner will enquire further into the matter. It is satisfactory to note that in only four cases was it found necessary to distrain immoveable property and in only three was resort made to the imprisonment of defaulters.

5. Settlement operations were in progress in ten districts during the year. The settlement of Jullundur was commenced, whilst work in Amritsar, Hoshiarpur and Lyallpur was completed. His Honour is satisfied that the work is being carried out with all reasonable despatch and economy. In paragraph 13 the Financial Commissioners refer to the embarrassment caused by the necessity of providing for the large establishments set free on the close of so many settlements when the few new settlements about to be started are incapable of absorbing them. This is a recurring difficulty in the Punjab which His Honour would like to see minimised as far as possible by a more carefully prepared settlement programme.

The Lieutenant-Governor recently caused enquiries to be made regarding the proportion borne by the revenue demand to the total value of the agricultural produce. In the nine most recently re-assessed districts in which the demand is fixed the percentage varies from 8·1 in Gurdaspur to 14 in Gurgaon. The average is rather under 11·5 or about one-ninth. The settlement figures are, however, based on the commutation prices, which are always fixed with a margin of safety. In only one of the nine settlements in question was the commutation price of wheat fixed at above 32 annas per maund. In the ninth, that of Amritsar, the highest rate assumed was 36 annas. It must be a long time since the cultivators had to sell at such low prices as these. The rates assumed for other crops are equally cautious. It may safely be asserted that the actual prices received by the cultivator in recent years are from 25 to 50 per cent. above the rates on which the assessment is based, and it follows that in practice the share of the produce represented by the revenue demand averages considerably less than one-tenth.

6. The Survey Department again gave valuable assistance, and completed the riverain survey and the survey of the Khushab Thal. Surveys were also completed of part of the area commanded by the Upper Chenab Canal and work is still proceeding in the Kangra District. Several minor boundary questions have been settled, and an inquiry has been instituted in conjunction with the United Provinces Government, preliminary to the determination of the inter-Provincial boundary along the Jumna.

7. In view of the re-adjustments of rent which must follow settlement operations in a district and of the fact that ten districts have been under settlement, the fall in the number of suits for enhancement of rent is satisfactory. On the other hand, proceedings against tenants-at-will for ejectment have increased, but relations between landlord and tenant are on the whole friendly; indeed, the position of the latter, already a strong one on account of the demand for cultivators in the colonies, will become still more favourable as soon as the area commanded by the Lower Bari Doab Canal is all available for cultivation.

8. The early cessation of the monsoon and the delay and, in certain areas, deficiency of the winter rains created a great demand for canal irrigation, and as river supplies were unusually low in the cold weather, the Irrigation Department had a delicate and difficult problem in adjusting the supply to the demand. The problem was satisfactorily solved. Except in some parts of the south-east of the Province, the perennial canals supplied as much water as was required. On the Lower Chenab Canal successful measures have been taken to ensure a more perfect distribution of the supply and to prevent over-irrigation in head villages. The Lieutenant-Governor would invite attention to his remarks in the review of the Irrigation Report as to the necessity of prompt and effective action to arrest further deterioration and to reclaim water-logged areas on certain canals, and Revenue Officers should not hesitate to bring such cases prominently to notice. The modules in Gujranwala are reported popular. It has not been found possible yet to introduce fixed assessments on the distributaries which have been provided with modules, but the experiment when made is one which may have far-reaching results. Irrigation from the Upper Chenab Canal has been extended, and the Multan District received its first supply of water from the Lower Bari Doab Canal. On both these canals irrigation must be confined to the kharif harvest until the Upper Jhelum Canal is completed and the waters of the Jhelum river

can be utilized. Perennial irrigation will, it is hoped, be available from the opening of the canal in the approaching cold weather. Proposals in regard to the completion of the Shahpur Branch of the Lower Jhelum Canal are now under the consideration of the Government of India.

The results of irrigation from inundation canals were, except in Multan, below the average, the supply being inadequate for the keen demand.

9. Minor irrigation works have met with varied success. The drought in Gurgaon led to a marked decrease in irrigation, the matured area in the tract irrigated from the bunds dropping to 695 acres as compared with 8,749 in the previous year. On the other hand, in Hoshiarpur the abundant rainfall considerably reduced the demand for water from the Shah Nahr. The Nammal Dam in Mianwali District was opened during the year, but there was lamentable delay in completing the distributaries, and it is too early at present to judge the results of this work.

The working of the Shah Nahr and the Grey Canals has been carefully investigated by the Settlement Officers of Hoshiarpur and Ferozepore, respectively, and as a result the systems of management will be reorganized and, it is hoped, materially improved.

10. The rise of Rs. 75,000 in the amount of takavi for land improvements is mainly due to the demand from Ferozepore District, which for some years has been one of the largest borrowers from Government. There was no great demand for loans for the purchase of cattle and seed, and they only amounted to a little over 2½ lakhs for the whole Province. Recoveries have been on the whole satisfactory, but there is clearly room for improvement in this respect in Multan.

11. The important and complicated question of rights in trees in Kangra and that of the levy of grazing fees under the Land Revenue Act in the same district are still under consideration. Orders have been issued in regard to the action to be taken under the Punjab Land Preservation (Chos) Act in Hoshiarpur, but it has been found necessary to call for further information regarding the Ambala proposals. Meantime the success achieved by the measures of conservancy hitherto carried out in Hoshiarpur has been gratifying, and a re assuring feature is the extent to which the villages affected, not only co-operate, but even take similar action on their own initiative.

12. The general prosperity of the Province may be gauged to some extent by the figures of alienation. The cultivated area redeemed exceeded that mortgaged by nearly 37,000 acres. During the five years ending 1891-92 the annual excess of cultivated area mortgaged over cultivated area redeemed amounted to no less than 143,000 acres, which, put in another way, means that at that period the net area under mortgage was increasing at the rate of half a tahsil a year. In the five years ending 1900-01 the annual excess was 115,000 acres. In 1904-05 for the first time the area released exceeded the area mortgaged, and since then it has never fallen below it. The percentage of the cultivated area now held on mortgage is 11½. The proportion mortgaged to agriculturists is increasing at the expense of that mortgaged to non-agriculturists and the latter class now holds only 5 per cent. of the cultivated area of the Province in usufructuary mortgage. The cultivated area in which proprietary rights were sold, exclusive of Government land sold to colonists, was only 121,809 acres, which is lower than the corresponding figure last year. At the same time, the report indicates a remarkable rise in the average price. How far the rise is real, it is difficult to say. The figures for Lahore, if correct, are very striking, but the Lieutenant-Governor hesitates to accept them without further verification. The Financial Commissioners, however, show good reason for thinking that prices in the ordinary land-markets were substantially higher than in the preceding year, and they attribute it in part to the crisis in the world of banking and commerce which has diverted capital on to the land and in part to the high prices of agricultural produce.

13. Several small tribes were notified under the Land Alienation Act, which has continued to work well. Various methods of evasion continue to be adopted, but without any considerable success. The practice reported from Rawalpindi District, by which the alienee, ignoring the provisions of the Act and

his failure to obtain mutation, takes possession of the land, is probably common in many districts, but His Honour agrees that attempted evasions of this nature are not likely seriously to interfere with the working of the Act.

During the year agriculturists have gained 14,015 acres in proprietary right, whilst they have lost 32,520 acres mortgaged for limited periods.

14. There has been a further material increase in the work of Revenue Officers, but disposals have on the whole kept pace with institutions. There is, however, room for considerable improvement in Shahpur, where the number of pending cases has more than doubled itself in the year, and is twice that of any other district in the Province, except Hoshiarpur and Sialkot, where revenue work is particularly heavy. Revenue judicial appellate work is especially heavy in the Jullundur Division, whilst in Multan the Commissioner is chiefly occupied with executive appeals. The Lieutenant-Governor is glad to see that Commissioners and the Financial Commissioners have their appellate work well in hand. Disposals considerably exceed the number of new institutions, and the pending file which at the beginning of the year numbered over 1,000 cases has now been reduced to 687.

15. His Honour during his cold weather tours has noticed with satisfaction that in many districts action has been taken on his suggestions in last year's review for improving the lighting of record-rooms, and as far as funds allow Government will endeavour to meet the demand, where the necessity is clearly established for additional record accommodation. Something has also been done to improve the surroundings of district offices, but the interiors are still in many cases squalid and untidy, and he trusts that district and inspecting officers will not relax their efforts till their offices and surroundings are maintained in a neat and orderly manner.

16. His Honour desires to acknowledge the work of the revenue staff which has maintained its high level of efficiency in the performance of its duties, and to thank the Financial Commissioners for their able administration of the Department and for an interesting report.

ORDER.—Ordered that the above remarks be printed and circulated with the report; that they be published in the *Punjab Gazette*, communicated to the Financial Commissioners, Punjab, and forwarded to the Government of India, Department of Revenue and Agriculture, with the usual number of spare copies.

Ordered, also, that a copy of the report and of the above review be forwarded to the Surveyor-General with reference to paragraph 6.

By order of His Honour the Lieutenant-Governor of the Punjab,

J. P. THOMPSON,

Revenue Secretary to Government, Punjab.

3233 CS—480—13-4-15 SGPP Lahore.

No. 193.

FINANCIAL COMMISSIONER'S OFFICE :

Dated Lahore, 25th February 1915.

FROM

J. M. DUNNETT, ESQUIRE,

Junior Secretary to the Financial Commissioners,

Punjab,

To

THE HON'BLE MR. C. A. BARRON, C I.E.,

Chief Secretary to Government, Punjab.

The Hon'ble Mr. A. H. Diack, C.V.O.
The Hon'ble Sir M. W. Fenton, K.C.S.I.

SIR,

I AM directed to submit the Annual Report on the Land Revenue Administration of the Punjab for the agricultural year ending the 30th September 1914.

2. The office of Financial Commissioner was held from 1st October 1913 to 16th November 1913 by the Hon'ble Mr. P. J. Fagan and from 17th November 1913 to the end of the year by the Hon'ble Mr. A. H. Diack, C.V.O.

Sir M. W. Fenton, K.C.S.I., was Financial Commissioner from 1st October 1913 to 28th November 1913, and on his proceeding on leave the Hon'ble Mr. H. J. Maynard officiated from 29th November 1913 to the end of the year.

I have the honour to be,

SIR,

Your most obedient Servant,

J. M. DUNNETT,

Junior Secretary to the Financial Commissioners, Punjab.

333 FC—317—26-2-15—SGPP Lahore.

ANNUAL REPORT

ON THE

LAND REVENUE ADMINISTRATION

OF THE

PUNJAB

FOR THE

Agricultural year ending the 30th September 1914.

1. The agricultural conditions of the year were on the whole favourable. The monsoon of 1913 set in early and gave a good sowing season. The complete withdrawal of the rainfall in the beginning of September however was disastrous to the south-east of the province where the unirrigated crops failed seriously. Parts of the north-west had a bumper crop, and all over the matured area was 4 per cent. in excess of that of the preceding year. The spring crop was good everywhere except in the south-east, and was especially good in the north-west and west. The total cropped area fell short of the area of 1912-13 by 1 per cent. only. The irrigated area of the year was nearly 2 per cent. more than in the preceding year and was considerably above the average. The inundation canals in the west generally ran well. Prices were not quite so favourable. The price of wheat averaged slightly higher than before, but those of cotton and raw sugar ruled lower.

General summary of agricultural conditions.

2. The total demand for the year on account of fixed land revenue was Rs. 2,12,19,540 or Rs. 57,615 less than the demand of the previous year. In Gujranwala re-assessment reduced the rent roll by over a lakh of rupees on account of the introduction of a fluctuating assessment in portions of the district, and in Sialkot nearly 4½ lakhs were temporarily excluded from the rent roll in the process of bringing the new assessment into the accounts, but in Kulu, Ferozepore, Amritsar and Gujrát additions of nearly Rs. 5 lakhs were made to the fixed demand. Alluvion and diluvion resulted in a gain of Rs. 9,492. The proportion of the demand collected was 96·2 per cent. and the outstanding balance of the current demand was Rs. 8,11,701. The whole of the balance was under suspension, except Rs. 15,960. Delay in introducing the new assessment in Kasur Tahsil accounted in Lahore for a recoverable balance of Rs. 11,770 at the end of the year, but collections were soon completed in October. No difficulty was experienced in realizing the demand beyond a certain amount of dilatoriness in Multan and Dera Ghazi Khan, where the large land-owners and even tumandars are in the habit of paying after due date, and in parts of Attock, where inamdars are said to give little assistance and where insufficient use was made of the provisions of the Act. The outstanding balance at the close of last year was Rs. 9,80,101. Of this amount Rs. 1,75,604 were struck off and Rs. 4,00,998 were collected, chiefly in the Rawalpindi Division, where two good harvests enabled the people to pay nearly Rs. 3¼ lakhs in addition to the current demand. At the same time bad harvests led to very considerable suspensions in Hissar, Rohtak and Gurgaon. The total amount of the current demand placed under suspension was Rs. 7,42,342. Practically the whole of this is accounted for by the relief (Rs. 7,23,458) given in the Ambala Division. Remissions of sums under suspension were allowed chiefly in connection with the revision of assessment and in weak villages in

Fixed land revenue.
Statements V, VI and VIII.

Ferozepore, Gujranwala and Jhelum. The amount remitted was Rs. 65,872. Extraordinary calamities, usually hailstorms, led to further remissions of Rs. 18,045.

Alluvion and diluvion. Statement IX.

3. The action of rivers in practically all districts was on the whole beneficial. During the kharif of 1914 heavy floods occurred in the Beas and the Ravi, but no such calamity affected the special assessments of the year under report. The area newly assessed was 45,757 acres, and on 43,086 acres, which were found to have improved, an assessment at higher rates was imposed. The diluviated area was 25,074 acres. Deterioration was confined to 15,181 acres. The net increase in the fixed land revenue roll was Rs. 26,107.

Fluctuating land revenue. Statement VIII.

4. The amount of land revenue temporarily off the fixed land revenue roll was Rs. 6,59,859 and was unusually large as it included the whole of the rabi instalment of the new demand in Raya and both instalments in Daska. It also included the difference between the old assessments and the new assessments introduced in rabi 1914 in Una, Muktsar, Kasur and Ajnala. The demand on account of land revenue permanently off the land revenue roll rose from 110 lakhs to over 118 lakhs. Unfavourable agricultural conditions led to decreases in the Ambala Division, where fluctuating assessments are comparatively unimportant, and also in Montgomery, where insufficient floods in kharif 1913 were followed by a poor rabi. In Muzaffargarh on account of the late opening of the canals and the insufficiency of river floods collections showed a slight decrease, but favourable floods and timely rainfall in Jhang and Mianwali caused an improvement of roughly half a lakh in each district. Increased cultivation of lands watered from the Upper Chenab Canal swelled the collections in Gujranwala by nearly 2½ lakhs, and water-advantage rates levied for the first time on the same canal in Pasrur yielded over Rs. 22,000. Re-assessment of the extensions of the Gugera Branch in Lyallpur resulted in an increase of over 4 lakhs The increase of Rs. 1,06,433 in the demand in Multan is due not only to the abundance and timeliness of the rainfall, the floods and the canal supply but also to stricter supervision of the work of annual assessment. The importance of careful crop inspection is, as the Commissioner reports, being more and more realised in practice, and the heavy percentages of kharaba which have been a feature of the recent past have been reduced to proportions more in accordance with the actual cropping. In consequence the assessments yield much more nearly what a normal demand was estimated at settlement to be. There is still a shortage in Shujabad, the Sidhnai colony and in the Montgomery Sutlej Bet, but the Settlement Officer's estimates are considerably exceeded in Mianwali, Muzaffargarh and Multan generally. Practically the whole demand was collected. The balance which accrued, Rs. 29,207, included Rs. 15,313, a portion of the new demand in Muktsar which could not be collected before the close of the year on account of the late introduction of the new assessment and Rs. 5,250 in Multan wrongly treated as assigned, but now determined as khalsa. The balance which existed at the beginning of the year was Rs. 19,806 It has all been collected, except Rs. 2,318. The sum of Rs. 1,744 still outstanding in Gujranwala is all irrecoverable or undetermined. Fluctuating assessments are again said to be unpopular in Fazilka. The Financial Commissioner's views as to the suitability of the system to that tahsil were before Government in connection with the Settlement Officer's assessment report, and it has been decided to retain the system. In Dera Ghazi Khan the working of the system is said to cause dissatisfaction "on account of the precarious nature of the working of the canals". As observed last year this is precisely what makes a fluctuating assessment necessary in the interests of the people. In the tracts where the system is now in force it is beyond doubt the most suitable method of assessment and is generally appreciated

Other land revenue. Statement VIII.

5. The demand on account of other land revenue was nearly Rs. 49 lakhs, or 3 lakhs less than in the preceding year. The proceeds of sales of Government estates fell from 40 lakhs to 22 lakhs on account of the decreased sale of proprietary rights to

colonists on the Lower Chenab Canal in Lyallpur and Gujranwala. In Jhang however sales increased from 1 lakh to nearly 5 in consequence of a rumour that Government intended either to limit the right of purchase or to enhance the price. Auctions of Government waste in Gujranwala and Montgomery raised receipts from the sale of waste from 3¼ lakhs to 18¼ lakhs, and the extension of irrigation from the Lower Bari Doab Canal was the cause of an increase in the rents for single harvest cultivation from Rs. 68,500 to Rs. 1,68,500. Tirni is in consequence a declining source of income in Montgomery, but remains constant elsewhere. The total receipts fell by Rs. 11,500 to Rs. 1,36,250. Other sources of income gave their normal yield.

The balance on account of other land revenue at the beginning of the year was Rs. 69,996. Of this Rs. 22,951 remains uncollected. The failure of purchasers of Government lands in Ballabgarh to complete their purchase is the cause of balances of Rs. 17,618 on account of previous years and of Rs. 18,507 on account of the year under report. The lines on which recalcitrants are to be dealt with have been determined by Government, and steps are being taken to complete the sales where possible and in other cases to rescind them. The outstanding balances in Shahpur are being reduced as the arrears of nazrana due from the Jalpanna estate are gradually collected. Tirni collections in Montgomery have caused some difficulty due to the unfavourable grazing season and the extension of irrigation. It is proposed to remit the balance of Rs. 7,210. The uncollected balance of the year's demand was Rs. 39,564.

Land revenue assignments.
Statement X.

6. No large lapses occurred during the year and the only new assignments made were two military reward grants. Assignments for life or lives and for term of settlement declined slightly in value, but the jama assigned in perpetuity increased by 1 lakh. The cause of both changes was reassessment. The largest increases took place in Ferozepore (Rs. 46,000) and Gujranwala (Rs. 37,000). In the latter district the important question of the division between *khalsa* and *jagir* of the assessment of waste lands brought under cultivation with the aid of canal irrigation was decided, the assignees being allowed all but what is assessed on profits directly due to State expenditure. The instructions on this subject which are not printed in any of the hand-books now in use are being included in the reprint of the Settlement Manual. The percentage of the total demand enjoyed by assignees was 8·3 per cent., which was practically the same proportion as in the preceding year. Assignment registers are reported to be in good condition.

Coercive processes.
Statement XI.

7. Coercive processes against lambardars issued in 2,230 cases for the collection of 7¾ lakhs, of which 96 per cent. was recovered. These processes were more numerous than in the preceding year, but much less numerous than in earlier years. Processes issued on the application of lambardars numbered 9,267 and resulted in the collection of 90 per cent. of the amount of nearly 2 lakhs for which they were granted. The severer processes of imprisonment, direct management and attachment of immoveable property were practically not resorted to, and much less use than in the preceding year was made of the power to proceed against moveable property, but the number of warrants issued and executed for the arrest of lambardars and revenue-payers increased considerably. In some districts it is still the practice to issue warrants in the first instance. In Kangra more caution is needed in the use of writs which have been freely issued for the smallest sums. Forty per cent. of the total number of processes for the province were issued in the four districts of Jhang, Multan, Muzaffargarh and Dera Ghazi Khan. As the Commissioner remarks, the prompt collection of revenue in these districts is a matter in which revenue-payers have not hitherto been kept up to the mark. More attention was paid to punctual collections during the year under report. Similarly, in Lahore the Commissioner notes that the increased number of processes are due to efforts to improve collections in Lahore Tahsil where there has been slackness in the past. Generally coercive action is as freely resorted to in districts where the assessment is notoriously lenient as elsewhere, and the same is true of assessment circles within districts.

Two-thirds of the processes in Rawalpindi were issued in the Sadr Tahsil where the difficulty of realizing the demand is always greater than elsewhere in the district owing to the dilatoriness of revenue-payers in the city and the neighbouring villages. On the whole, the demand is collected easily, and what difficulties are experienced are due more to dilatoriness than to the pitch of the demand.

Process-serving establishment.

8. The service of processes was as usual effected in the great majority of cases by the ordinary tahsil establishment. In ten districts no other establishment was required. Elsewhere a few temporary peons were employed for a few days at a time at a total cost of Rs. 2,826. The receipts from talbana amounted to Rs. 17,462. The practice obtaining in Kangra of allowing the peon who executes the process to receive payment of the arrears is irregular. It is also irregular to employ peons on the execution of warrants of attachment and distress, as has been done in some districts.

Progress made in remeasurements, revision of records, etc.

Statements XII, XII-A and XIII.

9. The districts under settlement during the year were Kangra, Hoshiarpur, Jullundur, Ferozepore, Lahore, Amritsar, Sialkot, Gujrat, Shahpur and Lyallpur. In *Kangra* remeasurements were finished in Dehra and Hamirpur and record work was nearly completed. The new assessments were announced in all tikas of both tahsils. The most important work that remains to be done is the completion of the record by the entry of the new demand and of Government's rights in the trees. In the remaining tahsils operations were begun as a separate settlement. Remeasurements will be based on traverse data supplied by the Survey Department and it has therefore been decided to take up one tahsil at a time. The field measurements in *Hoshiarpur* had been overtaken before the beginning of the year under report. Record work has now been completed, the new assessments have been sanctioned and announced in Una and Garhshankar, and settlement work is complete throughout the district. *Jullundur* came under resettlement at the beginning of the year. Field operations began in two tahsils and in them revision of maps and records was carried out in about half the total number of estates. Later in the year settlement staff was deputed to the remaining tahsils and in them also progress has been made. Village inspections were begun and other preparations made for reassessment. In *Ferozepore* the preparation of new maps and records in Fazilka completed the record work of the district. The new assessment was introduced in Zira, Muktsar and the Mamdot Jagir, and the Fazilka report was submitted. Little remains to be done in *Lahore* in the way of revision of records, much of which was done in advance of the settlement. The new riverain maps were completed. The new demand in Kasur was announced and collected with the rabi instalment, and proposals for the reassessment of Chunian were made. The Settlement Officer of *Amritsar* introduced the new assessment in Ajnala and closed his settlement in April. In *Sialkot* floods retarded field work, but remeasurements were practically completed. Killabandi, which is necessary in the villages that are to receive irrigation from the Upper Chenab Canal, has been carried out in Raya, and is nearly over in Pasrur. The new demand was distributed and collected in Daska and Raya, where settlement is now over, and the assessment reports of Sialkot and Pasrur were prepared. The reassessment of the *Gujrat* tahsil was completed and a report for Kharian submitted. Good progress was made with killabandi in the estates commanded by the Upper Jhelum Canal, and remeasurements were finished except in the Chenab riverain of Phalia. Record work is up to date. In *Shahpur* field operations were finished and record work is well advanced. The Shahpur-Bhera assessment report is still under the consideration of Government, and that of Khushab is now in the press. The assessment of the extensions of the Lower Chenab Canal and of a few proprietary villages completed the settlement of *Lyallpur*.

Final Settlement Reports.

10. The final settlement reports of Amritsar and Gujranwala were submitted during the year. The question of the assessment of the Bhakkar Thal villages which had been reserved for further consideration in the orders

of Government on the Mianwali final settlement report was taken up and decided. The Settlement Officer's assessment was confirmed for the same term as was allowed to the rest of the district, and orders as to the method of collection were passed.

Comparison of estimates and forecasts in regard to duration, costs and results. Statements XIII and XIV.

11. The Amritsar settlement, which was conducted with commendable despatch, finished within the time allowed. The assessment exceeded the estimate by Rs. 22,000, and there was a saving of Rs. 35,000 on the expected expenditure. The Ferozepore and Hoshiarpur settlements will both be slightly more expensive than the estimate, but in both the increase of assessment will considerably exceed the amount arrived at in the forecast report. The improvement in Ferozepore will exceed 2 lakhs. The results of reassessment are likely to be less profitable than was expected in Dehra-Hamirpur and in Sialkot, but in all other settlements the estimates will be surpassed. In last year's report it was explained why the estimates of duration and cost will be exceeded in various settlements. There is little to add to the explanations then given. The settlement of Hoshiarpur has been somewhat delayed by the employment of the Settlement Officer on special duty, and that of Shahpur by the unavoidable delay in disposing of the first assessment report. In Gujrat, where the Settlement Officer will have colonization operations to undertake, an extension up to the end of the current year may be necessary. Otherwise the revised estimates of cost and duration are not likely to be exceeded. The schedules of Sialkot, Lahore and Shahpur were overhauled during the year in the light of the remarks made last year, and the new schedules are being worked up to. The decision to undertake only one tahsil at a time in Kangra has been rendered necessary by the adoption of a survey traverse as the basis of field measurements. The method is not expected to result in any increase of duration.

Proposed future settlement operations.

12. Forecast reports were received during the year from Simla and Montgomery. In the former case sanction to the inception of settlement was obtained and operations began after the close of the year; in the latter it was decided to postpone the resettlement of the Ravi tahsils which alone were ripe for resettlement, but a simple system of fluctuating assessment was introduced to meet the changes imminent through the opening of the Lower Bari Doab Canal.

Settlement staff.

13. The opening of the Kangra and Jullundur settlements at the beginning of the year afforded employment for a large number of naib tahsildars and kanungos released from other settlements. Elsewhere, however, reductions of establishment were carried out as tahsils were completed, and at the end of the year half of the settlements had each less than the full establishment of one tahsil. Considerable difficulty was therefore found in providing employment for the subordinate establishment, and the difficulty was aggravated by the decision to postpone the resettlement of the Ravi tahsils of Montgomery. As reductions proceeded it was found necessary to dispense with the services of all officiating and *sub. pro tem.* kanungos, and it is also proposed to retire men whose term of service is almost complete. If the settlement of Ambala is undertaken at the end of the current year the situation will be much relieved, but in the meantime it is difficult to find employment for the whole of the existing permanent establishment. The reductions resulted in an excess in the 1st grade of kanungos, and all grade promotion has now been stopped till the excess is absorbed. The naib tahsildar as well as the kanungo establishment has suffered from the contraction of settlement operations, for it has been found necessary materially to reduce the number of permanent posts in each division.

Surveys.

14. The riverain detachment of the Survey Department continued its work of traversing and laying down base lines during the year. The riverain survey of 485 square miles on the Sutlej, Ravi, Chenab and Jhelum rivers in

Jullundur, Lahore, Sialkot and Gujrat was completed at a cost of Rs. 32,375. The survey of the Khushab Thal was also concluded. The area worked over was 200 square miles and the cost Rs. 4,592. In Shahpur and Gujrat in part of the tract commanded by the Upper Jhelum Canal which had not previously been brought under survey 25-acre rectangles were demarcated over 359 square miles. The cost was Rs. 4,050. The special survey in Kangra was completed in Palampur and begun in Kangra, and mapping sheets for the former tahsil were supplied to the Settlement Officer. In spite of constant bad weather which impeded the work 400 square miles were traversed and triangulated. More numerous stations were supplied than was previously thought necessary, and the average cost of the work has risen from Rs. 70 per square mile to Rs. 117. The topographical survey of 8,161 miles in Hissar, Rohtak, Karnal, Ambala, Simla, Sialkot, Gujranwala and Gujrat was also overtaken.

Boundaries.

15. The only important alteration of district boundaries that took place was the transfer of 32 villages on the Bhangu Branch of the Lower Chenab Canal from Lyallpur to Jhang. Disputes affecting the boundaries between Hoshiarpur and Ambala on the Sutlej and between Gujrat and Gujranwala on the Chenab were enquired into and settled. The Commissioner of Ambala personally decided the boundary between Ambala and Nahan State. A careful examination of the whole boundary between Sialkot and Jammu State showed that only points of small importance were in dispute. Of much greater importance was the decision of the Government of the United Provinces to reconsider the necessity for determining the provincial boundary. As a result of that decision special officers from both provinces are now investigating the extent of fluctuation and discrepancy due to the operation of the deep stream rule and considering proposals for action.

Record rooms.

16. In last year's report the accommodation for records was reported as insufficient in Rohtak, Gurgaon, Hoshiarpur, Lahore, Amritsar, Sialkot, Gujrat and Jhang. A new building is now approaching completion in Rohtak. As regards Lahore the Commissioner considers that the case can be met by a little re-arrangement. A room has been added to the Revenue record room in Amritsar and there is now ample accommodation for revenue files, but the general record room is still congested. There is still congestion in Sialkot and the new record-of-rights has to be placed in an adjoining room. An additional room has been made available at Gujrat and administrative sanction has been obtained to the construction of a new record room. Improvement has been made in the accommodation at Jhang. At Hoshiarpur the records of the new settlement cannot be brought to head-quarters until the new record room, for which administrative sanction has been given, is built. Insufficient accommodation is also reported at Dera Ghazi Khan and Multan.

The additional record rooms at Hissar and Gurdaspur mentioned in last year's report have been completed; and the Kulu records have been removed from Dharmsala and placed in a room at Naggar.

The Dera Ghazi Khan report mentions that some of the Jampur records were found to contain forged entries which are now forming the subject of judicial trials. The matter has been referred to the Director of Land Records.

In consequence of recommendations made by the Clerical Establishments Committee revised rules for the destruction of records have been introduced with the approval of the Local Government in Financial Commissioner's notification No. 76, dated 2nd May 1914. The benefit of these rules in expediting the work of destruction has already made itself apparent in several districts.

A serious defalcation came to light in the funds of the copying agency of the Amritsar district. The revised rules for copying agencies will, it is hoped, prevent the recurrence of such defalcations; in the meantime Deputy

Commissioners have been asked to examine the funds of their districts to see whether similar irregularities have occurred. The only case detected in consequence of these instructions was at Mianwali where it is reported that the Head Copyist is being prosecuted.

The new copying rules are working satisfactorily in the districts of Jhelum and Sialkot. It is hoped that it will be possible to introduce them throughout the province on 1st April 1915.

Other matters.

17. In twenty-three districts 15½ lakhs of the land revenue demand were paid by money order. The extent to which remittances are made in this way varies greatly from district to district. Money orders to the value of nearly 2 lakhs were received in Karnal compared with Rs. 6,000 in Rohtak. The figures for Attock and Rawalpindi are respectively Rs. 1,13,000 and Rs. 27,000, for Muzaffargarh and Mianwali Rs. 90,000 and Rs. 19,000, and for Jhang and Lyallpur Rs. 1,48,000 and Rs. 43,000. This method continues to be used only for the payment of small sums and by lambardars residing at a distance from the tahsil. In Amritsar the reduction in the number of instalments in which the demand is collected has resulted in a less frequent use of money orders, and several districts report that the lambardars welcome the opportunity of visiting the tahsil twice a year. Little use is made of currency notes. Permission to make use of the Post Office in paying the demand is said to have led to delay on the part of lambardars in Gujrat, but it is not on that account necessary to withdraw the privilege. Dilatoriness can be checked in the same way as when payments are to be made by the lambardar in person. The plan of varying the dates of payment for different portions of the tahsil is generally found to work well. Difficulties are reported only from Rawalpindi, but are due rather to the dates fixed at settlement for the instalments being somewhat early than to the system being unsuitable. The Financial Commissioner will consider the advisability of revising the arrangement now in force.

Enhancement of rent.
Statement XV.

18. Suits for the enhancements of rents paid by occupancy tenants fell from 1,772 cases in the preceding year to 1,589. Plaintiffs were successful in 75 per cent. of the cases. Litigation of this description increased considerably when the districts in which occupancy tenants are numerous came under resettlement, but is now declining. Readjustments rendered necessary in Sialkot by the enhancement of the land revenue demand were effected amicably, and the statistics generally show that that usually happens. The volume of litigation is small particularly in view of the abnormally large number of districts now or recently under settlement. Only 3 out of the 40 suits for reduction of rent were successful.

Ejectments.
Statement XVI.

19. As in previous years, litigation for the ejectment of occupancy tenants was inconsiderable. Proceedings against other tenants were however more numerous than in the preceding year. Applications for ejectment rose from 12,003 to 13,417 and notices issued from 26,368 to 30,019, but ejectments ordered fell from 6,801 to 6,472 and ejectments actually made from 6,163 to 5,671. Decrees for ejectment numbered 2,400 or slightly less than in 1912-13. Decreases in litigation are ascribed in Gurgaon to bad harvests and in Rawalpindi to good harvests, and increases in districts under settlement or recently settled are put down to a desire on the landlord's part to forestall claims to occupancy rights. There is no evidence that the relations between landlord and tenant are other than normal, and in Sialkot they are described as cordial. Ejectments are most numerous in Hissar where claims to occupancy rights founded on the breaking-up of the waste are still numerous. In Montgomery and Lyallpur, on the other hand, the scarcity of tenants is reflected in the very trifling amount of litigation of this description. Tenants were successful in contesting liability to ejectment in only 955 cases.

Descent of Jagirs Act.

20. The jagirs of Thakurs Amar Chand of Kolang, Hira Chand of Gondla and Bhag Chand of Ghumrang in the Lahul Waziri of Kulu were notified under Punjab Act IV of 1900 during the year. Out of 553 jagirs capable of being notified 142 with an annual value of nearly 8 lakhs have been brought under the Act. In 378 cases the jagirdars have refused to accept the condition of primogeniture, and in 13 cases no action at present is possible chiefly because the assignee is a minor.

Northern India Canal and Drainage Act.

21. Perennial canals under the management of the Irrigation Department generally ran well. In the Ambala Division where the rainfall was short in both harvests the demand for water was particularly keen. The areas irrigated in Rohtak from the Western Jumna and Gurgaon from the Agra Canal much exceeded the figures of the previous year, but in Hissar and Karnal irrigated sowings were less extensive than before and there were complaints of inadequate supply. The Sirhind Canal irrigated a larger area than before in Ludhiana, where the rainfall was poor, but a smaller area in Ferozepore, Lahore, Amritsar and Gurdaspur got a good rainfall and took less canal water than in the previous year. In Amritsar the drains constructed to cope with water-logging worked well. The necessity for further measures to this end was considered by the Settlement Officer and the local canal officers, and proposals are awaited. The amount of nahri parta newly assessed was Rs. 4,737 and that remitted Rs. 5,108, the canals affected being the Agra and the Western Jumna. Irrigation from the Upper Chenab Canal was extended to the Raya tahsil and to new parts of Gujranwala, but was still confined to the kharif harvest. Distributaries remained incomplete and much of the irrigation was of the nature of flooding. On the Lower Chenab Canal the remodelling and reduction of outlets and the consequent tightening of the supply were continued without hardship to the irrigators, and in consultation with the Deputy Commissioner. The Deputy Commissioner of Lyallpur notes that the zamindars have few real grievances. The experimental introduction of modules on two distributaries in Gujranwala is popular and the prospect of a fixed assessment on distributaries where modules have been supplied is welcomed. The question whether the Shahpur Branch of the Lower Jhelum Canal should be completed was under discussion during the year. Irrigation from the Lower Bari Doab Canal for the first time reached the Multan District, a small supply being sent down in the kharif.

Inundation canals managed by the Irrigation Department had only a fair year. Generally the season was hot and dry, the demand for water was keen, and floods were low. Except on the Sidhnai, where the results were above average and on the other inundation canals in Multan, sown areas were rather smaller than in the previous year. Crop failure, however, partly on account of timely showers and improved distribution of canal water and partly on account of better crop inspection was low. The experiment of associating canal officers in crop inspections continued to work well in Muzaffargarh, and was successfully introduced in Multan also. The extension of the use of iron pipes in the former district in place of kachha outlets facilitates the distribution of water and allows of a reduction in rotational closures. The innovation, however, is not popular. The income of the year from water-advantage rate which is levied on inundation canals in the districts of Ferozepore, Lahore, Shahpur, Montgomery, Jhang and Muzaffargarh was Rs. 3,21,629.

Minor canals and irrigation works.

22. Owing to the failure of the rains the area irrigated from the Gurgaon bunds was much contracted. The matured area was only 695 acres compared with 8,749 in the previous year. The income from water-rates fell to Rs. 1,175 and the land revenue demand to Rs. 1,734. Balances of Rs. 293 are outstanding. Expenditure on repairs and maintenance had to be curtailed for lack of funds. The expenditure incurred was Rs. 7,679. The Sarusti Canal was also less efficient than last year. The canal remained closed for a large part of the year. The irrigated area fell from 22,000 to 12,000 acres

and the income from water-rates to Rs. 16,249. There was a slight loss on the year's working. Good rainfall led to a diminished demand for water from the Shah Nahr. The irrigated area was 14,035 acres and the matured area 13,348 acres. Water-rates yielded Rs. 26,060. The expenditure of Rs. 58,787 included capital expenditure of over Rs. 38,000 on the construction of a head regulator and an office for the manager. The head regulator unfortunately has been found defective in construction and has already been damaged by floods. The financial position of the canal and the methods of management were exhaustively examined by the Settlement Officer during the year, and his report is now with Government. The Settlement Officer of Ferozepore similarly reported on the position of the Grey Canals, and made recommendations for financial assistance to put them in proper order and for their more efficient management. Their working during the year was satisfactory. There was a slight decrease in the area irrigated which fell to 136,641 acres, but the demand on account of water-advantage rate rose in consequence of reassessment from Rs. 51,208 to Rs. 62,397. The Nammal dam was opened during the year, and the canal was notified under the Act, and a schedule of rates approved. Water-courses, however, were only in course of construction during the irrigation season and the irrigated area did not reach 2,000 acres. The Garak and Garakna canals in Montgomery received unusually low supplies from the Ravi. The matured area fell from 3,263 to 2,584 acres. The Kitchin Canals fared no better and matured only 7,670 acres of crops in place of 13,573 acres in the previous year. Irrigation by bunds was also less successful than before, but the Mehdi Khan Canal which was notified during the year benefited the same area as in 1912-13. Hill torrents in Dera Ghazi Khan flowed abundantly and much wider areas than usual were irrigated.

Land Acquisition Act.

23. Six thousand eight hundred and forty-seven acres were acquired for public purposes, of which 5,476 were for canals. The average price was Rs. 161 per acre as compared with Rs. 121 last year, and the number of years' purchase of the land revenue varied from 55 in Sialkot to 2,552 in Lahore. The average price per acre was Rs. 655 in Lahore and Rs. 723 in Amritsar.

Loans Acts.
Statements XVII, XVIII, XIX, XX, XXI and XXII.

24. The total amount of takavi advanced for land improvements was Rs. 3,23,365 or three-quarters of a lakh more than in the preceding years. The amount of loans advanced reached the level of the dry years, 1907 and 1908, and was not much below the level of 1902 and 1903. The increase, however, is not due to bad seasons. Most of the increase is accounted for by Ferozepore which took over a lakh of rupees, or one-third of the provincial total. There is no demand for takavi of this kind in Kangra, Hoshiarpur, Simla, Lyallpur and Jhang, and the demand is very limited in Hissar, Rohtak, Ambala and Lahore. The increasing prosperity of the people, the extension of canal irrigation and the growth of co-operative societies obviate the necessity for advances in several districts. Where takavi is required, however, the system is popular and loans are faithfully applied and punctually repaid. Dilatoriness in repayment is reported from Multan and the Ferozepore Bet alone. Works for the construction of which loans were given were mostly wells, but included embankments in Jhelum, Rawalpindi and Attock and water-courses from the Nammal Canal in Mianwali and they were in the majority of cases properly constructed. The principal outstanding at the beginning of the year was Rs. 14,63,750 and at the end Rs. 15,65,470. The amount due for collection was realized with the exception of Rs. 9,282, of which Rs. 6,786 are outstanding in Multan. The total interest for collection was Rs. 89,914. Only Rs. 4,054 remained uncollected. The balance in Multan was Rs. 3,087. As between the imperial and provincial governments the net financial result to the Punjab on the transactions of the year was a gain of Rs. 33,856. The profit is less than in the preceding year as the amount outstanding has risen considerably and interest is not usually payable till the improvement begins to yield a return to the borrower. The number of wells sunk or repaired out of Government loans was 501 or rather more than 10 per cent. of the total

number constructed. Protective leases were given to 6,929 new wells and remissions of revenue were granted for 812 old wells which had fallen out of use chiefly in Multan, Rohtak and Montgomery.

As the harvests were not unsatisfactory, the demand for loans under Act XII of 1884 was not keen. The amount advanced was Rs. 2,62,885, compared with upwards of 5 lakhs in the previous year. Loans were taken mostly for the purchase of cattle, and were seldom required for the provision of seed. In Hoshiarpur and Gurdaspur advances were made in villages which were damaged by the high floods of last July and in Montgomery to tenants on the Lower Bari Doab Canal. Recoveries were made with ease, although, as the Deputy Commissioner of Gujranwala remarks, tahsildars and lambardars are often lax in recovering takavi even from persons from whom the land revenue has been collected with ease. To such laxity is doubtless due the outstanding balance of Rs. 9,109 on account of principal. Interest falling due was realised almost in full. The outstanding balance of advances has been reduced from Rs. 6,34,941 to Rs. 4,97,652, and the year's working resulted in a profit of Rs. 10,464 to the provincial government.

25. Important questions of forest conservancy in Kangra were under discussion during the year. A beginning was made with the scheme for transferring the less valuable forests to the control of the Deputy Commissioner. A block of forests in 42 villages of Nurpur tahsil was transferred. Similar proposals for other tahsils have been invited, and will, under the orders of Government, be submitted without waiting for the result of the experiment in Nurpur. Portions of 14 chil forests of the Kangra and Palampur tahsils which are heavily overburdened with rights were closed for 20 years in order to permit regeneration, and a Forest Officer is now engaged in selecting other forests for the same treatment. The question of Government's rights in trees in waste and unassessed lands is still under consideration. The imposition under the Land Revenue Act of fees on the grazing of buffaloes, goats and sheep is to come in force simultaneously with the new settlement, but the rates have not yet been finally framed, and that on buffaloes is likely to be lower than was originally intended. The proceeds of the assessment will be devoted to local improvements of a special nature. The fees paid by Gaddi shepherds were revised and enhanced and the same action was taken in the Shahpur Kandi forests. Mr. Sheepshanks' report on the jagir forests was submitted to Government with the Financial Commissioner's recommendations. The management of the Shahpur Kandi forests continues satisfactory. Most of the profit on the year's working amounting to Rs. 584 was paid into the Pahari Co-operative Bank in which all the villages in the Shahpur Kandi tract are share-holders. The rules for the management of guzaras in Murree and Kahuta worked well. A small amendment in them was effected in order to provide for improvement fellings. The guzaras near Murree have for years suffered serious damage through the theft of forest produce, and in several cases which came to notice it was found necessary to inflict punishments of imprisonment. A local committee met to devise means for checking the manufacture and sale of illicitly obtained charcoal. No proposals have yet been made. A solution has been found for the much vexed question of the management of the Pindigheb rakhs. The rakhs are to be leased in such a way as to secure grazing to the surrounding villages, under certain rough rules of conservancy, and to allow the lessees a certain area for cultivation as an incentive to good management. The Deputy Commissioner, Dera Ghazi Khan, has not yet reported on the management of the rakhs which have been placed under his control. Difficulties which may prove insurmountable have been experienced in giving effect to the Camel Browsing Committee's proposals in the Shahpur rakhs, but provision has been made for the 50th and 51st Camel Corps in Rawalpindi and Attock and the 55th and 56th in Multan. The tirni contracts and assessments in Montgomery and Multan expired during the year. In both districts the extension of irrigation from the Lower Bari Doab Canal threatens to extinguish this source of income. It has not yet been decided what form the new

Forest Act and Government lands, Statement XXIII.

arrangements will take, but it is probable that quinquennial assessments will in tracts within the limits of irrigation give place to contract leases.

The total area of Government waste and unclassed forest let out for cultivation has fallen from 329,000 to 311,000 and the portion cultivated from 151,000 to 141,000 acres. There has been a great increase in the area cultivated in Multan and Montgomery owing to the grant of single harvest leases on the Lower Bari Doab Canal, but there has been a great decrease in Shahpur, which has not been explained. The sale of proprietary rights has reduced the area held by Government tenants on colony conditions from 14⅓ lakhs of acres to less than 12 lakhs. Little progress has been made with the sale of Crown lands in Ballabgarh, but lines of action have been approved for the decision of this complicated case.

Punjab Land Preservation (Chos) Act.

26. The orders of Government were received during the year on the proposals made by local officers to extend the scope of operations in the Hoshiarpur Siwaliks and to revise the protective measures. It was decided not to impose any restrictions outside the area already notified or to extend to the whole of it the restrictions of section 5, as had been proposed by the Inspector-General of Forests, but the local officers have been directed to select suitable areas, which will naturally be the catchment areas of the more destructive chos, to which that section may be applied. Less difficulty was experienced in dealing with goat grazing than with illicit cutting which is stimulated by the proximity of towns like Hoshiarpur, Garhshankar and Rupar where there is a good market for the stolen produce. In Ambala the areas to be protected were demarcated, and notifications under sections 3 and 4 were published. The areas to which the application of section 5 is suitable were also ascertained, and proposals were submitted at the close of the year. In both districts sowings of pine, phulai, sanattha and patas were made during the rains throughout the whole length of the Siwaliks, especially on the ridges and upper slopes. Seed germinated excellently, but owing to the break in the rains during the last three weeks of August and the first week of September half the seedlings died. Losses were to some extent repaired by later sowings, in which and in the earlier sowings parties of villagers joined. These measures will be continued, and it is hoped to secure the co-operation of the people more widely.

General statement of owned and mortgaged area.
Statement III.

27. The returns received from districts show that the total cultivated area of the province has fallen by 169,000 acres. Decreases are reported from 16 districts. It is probable that part of the difference is merely statistical, being due to more accurate soil classification when a new record-of-rights is prepared at settlement or at quadrennial attestation, but the large decreases in Jullundur and Hissar and the reduced areas in Gujranwala and Montgomery where canal irrigation is being introduced require further explanation. The causes of variation are being enquired into and the matter will be noticed in next year's report. The incidence of the assessment on the privately owned area returned as cultivated is Re. 1-3-6 per acre. The percentage of the cultivated area held on mortgage continues to fall, and is now 11½ per cent. The proportion held by members of non-agricultural tribes has fallen from 5·4 to 5·1 per cent.

Transfers.
Statements XXIV—XXVII.

28. With the increasing prosperity of the province the reluctance of the zamindar to make permanent alienations of land becomes more. The total cultivated area in which proprietary rights were sold during the year fell to 121,809 acres. The total area sold was 209,605 acres. These figures exclude sales of proprietary rights to colonists, and, in order to make a comparison with last year, sales of this nature in Jhang, Gujranwala and Lahore which were included in last year's returns must be added. If it be assumed that colonists purchased rights only in fully cultivated holdings, the comparison in respect of cultivated area is between 171,698 acres this year and 184,755 acres last year. The decrease in total area transferred is from 279,222

to 259,494. The area sold has increased in Gurgaon, mainly owing to the sale of Crown lands in the Ballabgarh tahsil, and in Lyallpur where many grantees, chiefly absentee landlords and notably army pensioners, are selling their land and severing their connection with the district. In most of the other districts the area sold was much less than in recent years. Proprietary rights were mortgaged with possession in 245,631 acres of cultivated land and redeemed in 282,290 acres. Last year's figures were 219,672 acres and 268,698 acres, respectively. The increase in the area freshly mortgaged in Rohtak and Gurgaon is said to be due to the bad harvests, but in the latter district a much larger, and in the former a much smaller area, has been redeemed than in the preceding year. The state of mutation work in Lahore and Gujranwala accounts for the decrease of mortgages and redemptions in the one district and for the increase in the other, arrears of attestation having been cleared off in the previous year in the former and in the year under report in the latter, and the same reason probably accounts for increases in Gujrat and Amritsar. In Lyallpur and Jhang transactions of both kinds increase as the area held in proprietary right extends, and in the latter district money is required for the purchase of rights and is raised by short term mortgages. The Redemption of Mortgages Act tends to increase the number of all transfers for value. Several district officers report that it is working well, and the volume of business under it is considerable in districts so dissimilar as Gurdaspur and Gujrat. In Mianwali, however, the Act has not been utilised to any appreciable extent. The Deputy Commissioner of Gurdaspur notices a growing tendency to use the simple and inexpensive procedure of the Act for the settling of complicated cases more suitable for the civil courts, but also notices that attempts of this kind were unsuccessful. Redemptions continue to gain on mortgages, and the area under usufructuary mortgages is decreasing and now stands at 11·5 per cent. of the cultivated area. Exchanges and gifts maintain a normal course.

Value of land.

29. Almost every district, even those in which during the year agricultural conditions were unfavourable, reports a very great rise in the transfer values of land. Calculations made in the usual way show that the sale price has risen from last year's figure of Rs. 107 per acre cultivated to Rs. 249 and the mortgage value from Rs. 109 to Rs. 124. The comparisons of sale prices and of the multiples—203 compared with 93—of rupee of land revenue which the sale price represents are, however, vitiated by the fact that the proportion of the cultivated area sold to the total area sold has this year fallen from 66 to 58 per cent. Last year's figures included purchases of proprietary rights by colonists in Jhang, Gujranwala and Lahore at favourable rates. If similar areas (49,889 acres at Rs. 12-8-0 per acre) be included and it be assumed that these areas are all cultivated, the average prices fall to Rs. 119 per acre and Rs. 180 per acre cultivated. An even larger cause of variation is the inclusion in this year's return of the sales of 3,335 acres for Rs. 1,01,68,347 in Lahore, where in the preceding year 5,411 acres were sold for Rs. 14,26,396. The land sold this year lay chiefly within municipal limits. If the Lahore figures be excluded from both years' returns and the current figures be corrected by the inclusion of colony sales, the comparison is between Rs. 71 per acre and Rs. 122 per acre cultivated in the present year and Rs. 66 and Rs. 101 in the preceding year. Whatever calculation be made it is apparent that there has been a real and considerable increase in the value of land. The recent bank crisis has increased the volume of money seeking a safe investment in land, and the high prices prevailing during the year under report made land additionally attractive. The comparative equality of sale and mortgage prices confirms the district reports that it is usually the poorest land that is sold.

Land Alienation Act. Statement XXV.

30. The policy continued to be followed of notifying small tribes of true agriculturists which had not been considered strong enough numerically to be included in the original notifications. The Abbasi, Ansari and Kureshi Sheikhs of Ambala, Sainis and Bahtis of Kangra, Brahmans of Saraj, Sayads of Hoshiarpur, Moghals of

Ferozepore, Kambohs of Gurdaspur and Awans of Muzaffargarh were notified as agricultural tribes of their respective district groups. The Bagri Kumhars and Sutras of Ferozepore were notified in a separate group, and the Rohtak list was extended to include the Tagas, Sainis, Chauhans and Arains who are found principally in the Sonepat tahsil and had been notified as tribes of the Delhi District when it included that tahsil. All these tribes are numerically of small importance. The only notification under section 4 which was of general importance was that by which the agricultural tribes of Kangra were re-notified in two separate local groups, the tribes of Kulu being kept distinct from those of Kangra proper. The working of the Act occasioned no special difficulty. A reference from the Commissioner of Rawalpindi relating to a mortgage by an Awan of Shahpur to an Awan of Attock led to the re-opening of the question whether groups of districts should be notified under section 4 of the Act, which was decided in the negative when notifications under the Act were first framed. The decision was that as the present system of having separate groups for separate districts works smoothly and prevents evasions and the people have grown accustomed to it, it should not be disturbed in the absence of strong reasons and a popular demand for a change. The advisability of dividing the Lyallpur tribes into two groups in order to protect the weaker from the more acquisitive was also examined, but the need for it was not established by statistics. Evasions are neither more frequent nor more successful than in the past. Benami transactions are said to be decreasing, no mortgages disguised as leases came to notice, and the only new methods of evading the Act that have been brought to light are those observed in Attock and Dera Ghazi Khan and noticed below. The Deputy Commissioner, Rawalpindi, who has made a careful enquiry into the working of the Act, reports that in his district 483 alienees are in possession after mutation had been refused, 194 have never sought mutation, 35 hold long leases which are mortgages in disguise and 203 are parties to benami transactions. The Financial Commissioner agrees with the Commissioner that the insecure possession which these alienees enjoy under section 14 of the Act is unlikely to be lasting, and that contracts of this kind will hardly become so numerous as to amount to a really serious problem. The Standing Order on the subject was amended to show that where an increase in a mortgage debt raises the aggregate to a figure in excess of the value of the land the Deputy Commissioner may take action under section 9 (1) of the Act. The contracts entered into by agriculturists of Dera Ghazi Khan to share the produce with the money-lender in return for payment of all Government demands form a crude evasion of section 15. They are confined to a small area in the Sangarh Tahsil. The device which offers most chance of success and which is still the common evasion is to allege the necessary tribal standing, and this method is frequently employed in Sialkot, Rawalpindi and Attock. It is in these districts that the amount of work thrown by the Act upon the district establishment is most considerable. In most of the other districts the additional work is trifling. The Deputy Commissioner of Attock has rightly checked the attempts of money-lenders to acquire rights in land by sinking a well in an agriculturist's land and claiming the status of *mokarridar*. The continued increase of the area mortgaged to non-agriculturists is evidence of their greater readiness to accept alienations in forms permitted by the Act. Sales to members of this class have again fallen. Members of agricultural tribes bought 207,097 acres and sold 193,082 acres. They gained by mortgage 254,507 acres, but lost 283,315 acres, and effected redemption of 304,397 acres, but suffered redemption of 308,009 acres. They are therefore better off to the extent of proprietary rights in 14,015 acres, but are worse off to the extent of rights of mortgage for limited periods in 32,520 acres. The conclusion is that the permanent rights in land are returning to the hands of the cultivating classes, and that the capital of the money-lending classes is being more freely devoted to the land under approved forms of security.

31. The total number of revenue cases has risen considerably from 178,654 to 194,199. Revenue court cases under the Tenancy Act and cases under the Land Alienation Act show little variation, but Revenue Officer's cases under the two principal Acts have increased from 95,423 to 107,188.

Business Returns.
Statements XXVIII and XXIX.

The bulk of the increase is in districts under settlement, but important increases in Muzaffargarh under Act XVII and in Gujrat under Act XVI remain unexplained. The increase of 3,000 in miscellaneous cases is partly statistical and partly due to the Redemption of Mortgages Act. In some districts takavi applications have been shown for the first time. In Lyallpur chaukidari cases which have previously been included have now been excluded. In Gujranwala progress has been made with the disposal of the numerous partition cases for which a special establishment was sanctioned and in nine months as many as 1,250 cases were decided. In spite of the increased number of cases the pending file is practically the same as last year, and the work is well in hand. In Shahpur alone is the pending file a considerable proportion of a year's work. New institutions in the courts of Commissioners and the Financial Commissioners numbered 5,342. Decisions were given in 5,843 cases and the pending file was reduced to 687 cases of which 148 have been pending for more than three months.

Tours of Commissioners.

32. The returns of touring done by Commissioners are for the financial year 1913-14:—

Ambala.—Lieutenant-Colonel C. M. Dallas, C.S.I., was Commissioner for the whole year and spent 99 days on tour.

Jullundur.—The Hon'ble Mr. P. J. Fagan held charge for 170 days and spent 65 days on tour. Lieutenant-Colonel F. Popham Young, C.I.E., was in charge for 195 days and spent 31 days on tour.

Lahore.—Mr. H. A. Casson, C.S.I., was Commissioner for the whole year and spent 134 days on tour.

Rawalpindi.—Mr. H. J. Maynard held charge for 240 days and spent 92 days on tour. Lieutenant-Colonel F. Popham Young, C.I.E, was Commissioner for 125 days and spent 62 days on tour.

Multan.—Mr. C. J. Hallifax was Commissioner for the whole year and spent 131 days on tour.
